| 5.2. Secondary Education | 236-256 |

Foreword

Progress in education is taken to be essential for sustainable development and participation in democratic social and political processes. Education is also currently becoming the most important contributor to national economic growth. Above all, it is the perfect weapon to realize the second of the Millennium Development Goals of achieving “Universal Primary Education” with the specific target of ensuring by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling. And it is also striving as a cornerstone for the realization of the eight Millennium Development Goals in general and Universal Primary Education in particular; for it is believed that education is the basis for other remaining goals. Meanwhile, this Education Statistic Annual Abstract is also gives emphasis to the provision of relevant and articulated information on all levels of education taking place in our region for implementation of MDGs. The charts, graphs and tables in this publication present a relevant and accurate picture of our progress on an annual basis. In presenting this overview, we are allowing the key partners and stakeholders to see at a glimpse how quickly the changes have taken place in our Region.

Accordingly, this document would definitely meet the need of planners, policy makers, researchers, and educational stakeholders in obtaining information for their decision. Besides, this annual educational abstract would enable educational planners and policy makers in targeting their future goals in terms of our educational standard by allocating the needed resource for improving and implementing quality of education. Finally, this educational annual abstract gives as the mission of reducing the gap seen in different indicators of the year, particularly in improving quality of education. Therefore, hard slog is expected from planners, policy makers and implementers of the regional education sector.

Introduction

The Education Statistics Annual Abstract is, intended to communicate to the stakeholders the performance of the education system on a yearly basis in targeted areas such as gender disparity, enrollment trends and the general quality and efficiency of our education system. It is a useful tool providing the most recent educational information of the Region. The education performance indicator presented in this document is calculated based on the projected school age population of Central Statistics Agency population and housing census held in 2006/07 G.C and the regional population growth rate, taken from the Oromia Region Finance and Economic Development Bureau.

This publication has been written by Oromia Education Bureau EMIS team, with the considerable support and cooperation of the thousands of teaching staff who submitted documentation of educational statistics from the school level to the zone education offices. We collected data on basic variables from all levels of education based on standard questionnaires designed for pre-primary (KG), Alternative Basic Education, Primary, Secondary, preparatory and Colleges of Teachers Education. This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education in detailed. The data are, also further disaggregated by the level of education, sex, and location in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and used for making a sound decisions starting points for policy makers, planners and also references for researchers as well.

Finally we want to thank all of our staffs who are involved in data collection, data entry and verification for this publication, from the school to the zonal level. The data collection, entry and verification would not have been possible without the invaluable contributions of our zonal, woredas and school staff members. A special note of thanks is also reserved for planning and budget experts of our regional bureau planning and project work process. EMIS team has special thanks for all of them for their cooperative effort for the publication of this Abstract.

1. EQUITABLE ACCESS

Access: Access to education can be defined as the extent to which the school age population is able to access the first grade of a particular level of education.

As education systems expand, however, they face more complex and more specific challenges. They must address the increasing number and diversity of student populations by ensuring that all children and youth, regardless of their backgrounds, gain access to a quality education. They must act upon the challenges of our era: rapid urbanization, the HIV/AIDS pandemic and the demands of knowledge societies. Any failure to deliver on these obligations breaches our commitment to universal basic education.

Access is, directly linked to UPE. Since it is only three years remaining for UPE attainment the access is serious concern for the achievement of EFA goal No 2. Concerning to UPE, our regional trend indicates that 13.1% of school-aged children to grade 1 are not admitted to school. Regarding to primary NER of the region, by 2003 (2010/11) it is 85.3%, this data indicates that 14.7% of primary school age children are still out of school. These low enrolment rates are the cumulative effect of a high dropout rate in every grade of the primary education. However, the primary school enrolment of the region has increased from 4,758,896 in 1998 (2004/05) to 6,120,572 in 2003 (2010/11) with annual average growth of 5.16%. The issue of creating access to all school age children particularly bringing all 7 years old children to school and retaining them to complete the final grade of primary schooling is vital to achieve UPE.

Equity: In this publication, the term describes fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance. Equity implies a reduction in disparities based on gender and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified staff necessary to achieve educational success. The achievement of the UPE goal is only realized when it is possible to provide equitable access of educational opportunity between sexes and urban/rural areas.

Access and Equity cannot be separated from each other; recently these two separate indicators became one indicator by the name called *equitable access*. Therefore, in this publication, we try to specify all indicators of Access and Equity side by side, where it is necessary to specify.

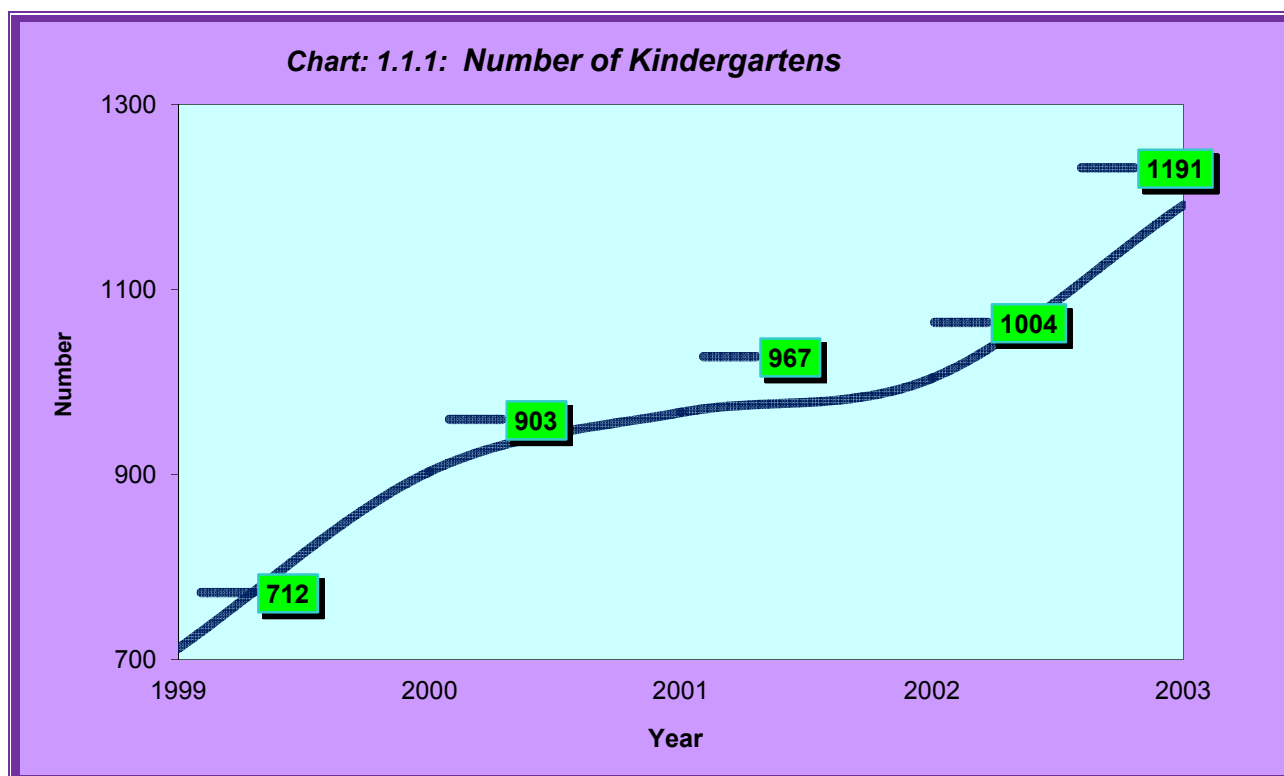

1.1. Pre Primary Education Program

This level normally includes children of ages 4-6 enrolled in the pre-primary education. Previously the only operators of kindergarten schools are Non-governmental organizations and private institutions, but recently as our regional education bureau context, pre-primary schools have opened with attachment to most of primary schools in the region. Additionally, the government involved in developing curriculum, training teachers, and providing supervisory support.

Pre-primary education is the initial stage of organized instruction; primarily designed to introduce very young children, aged at least 4-6 years, to a school-type environment and provide a bridge between home and school. Variously referred to as infant education, nursery education, pre-school education, kindergarten or pre-primary education, upon completion of these programs, children continue their education at primary education. Recently as research has shown early years of life, especially around age 3, are critical for brain development. Research has also shown that quality early childhood care and pre-primary education can significantly improve the cognitive, social, and emotional development of the child. These benefits have been found to last well into adulthood.

Accordingly participation of pre-primary education has been steadily increasing in our region since the PPAPS were established in 2001 E.C. So that 387,900 children were enrolled in pre-school programs in the region wide in 2003 E.C, up from 96,261 in 2001 E.C. The Gross Enrolment Ratio (GER) climbed from 3.4% to 13.7% over the same period, with the most pronounced increases in the region wide.

The distribution of private and NGOs kindergartens in Oromia region is mainly concentrated in urban areas. As shown from chart 1.1.1, during the last five years the number of kindergartens has increased from 712 to 1,191. Whereas, as shown from table 1.1.2 there are 5,701 government pre-primary schools attached to primary schools in the region.

Gross Enrolment Ratios in Pre-primary Education

GER of pre-primary education is defined as the percentage of total number of children in the level irrespective of age, out of total population of 4-6 age groups in the region or in a given zones. Table 1.1.1 shows the Gross Enrolment Rate and gender equity by zones of Kindergarten and pre primary attached to primary schools.

As shown from Table 1.1.1, Gross Enrolment Rate (GER) for Kindergarten (KG), Pre-Primary attached to Primary schools (PPAPS), and for both KG and (PPAPS) 4.2%, 8.9% and 13.1%; and their GPI (0.98, 0.87 & 0.90) respectively. To analyze the aggregated data by comparing zones against their GER and GPI towards the region, GER of 12 zones and all Administrative towns are greater than the regional average, among them the three highest are Bishoftu, Jima and Asella administrative towns which have GER of (91.9%, 73.8% & 73.3%) respectively. Whereas, regarding to gender equity 13 zones and all Administrative towns have greater than the regional aggregated GPI. Among them the highest were, Nekemte Shashemene and Adama administrative towns have GPI of (1.29, 1.12 & 1.09) respectively.

As Table 1.1.2 shows among all of Oromia zones Arsi, East Shoa and West Hararge are having more number of PPAPS and KG (600, 517 & 504) respectively, than the rest of Oromia zones. In respect of pre- primary enrolment West Hararge, west Arsi and East Hararge are having the enrolment of (36,020. 27,320 & 24,990) respectively.

As indicated on table 1.1.3, among all of Oromia zones 3 zones are having more than the standard of student to teacher ratio in kindergarten schools, Jima zone, Adama administrative towns and Hararge West are the zones having the ratio of (1:95, 1:54, & 1:53) respectively. Whereas, concerning student to section ratio only one zone /East Hararge having 1:57/ has greater than the standard. Pertaining to kindergarten teachers' qualification, among all zones, 16 zones are having above the regional average and six of them are having below regional average. Therefore, the issue needs attention to ensure the quality of pre-primary education.

Chart 1.1.2: Kindergarten Gross Enrollment Ratio for the last five years

As we can see from chart 1.1.2, the growth rate of GER is very slow from year to year (from 1999 EC to 2001 EC), but dramatically increases in 2002. The reason for the dramatic increment of GER of 2002 was that our regional bureau set the program of PPAPS. Therefore, for this reason 303,373 children were enrolled in 2002 E.C. But this increment was not sustained in 2003 E.C progressively. As shown on the chart it decreases from 14.21% to 13.1% GER and enrolled less than the preceding year. Even though, a little bit increment has seen in pre-primary education than the previous years, there are about 2.4 million children in the region who are still out of schools of this level have to come to school, so that we have an assignment to bring those children to education system.

1.2 Primary Education Program

In Ethiopia, primary education is defined as education in Grades 1-8 in two cycles 1st cycle, (grades 1-4) and 2nd cycle (grades 5-8). The program is normally designed on a unit or project basis to give pupils sound basic education in reading, writing, mathematics, and an elementary understanding of the subjects such as history, geography, natural sciences, social sciences, art, music etc, these subjects serve to develop pupils' ability to obtain and use information they need, about their home, environment/community or country.

Intake Rates

Intake rate is used to indicate the extent of access to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children) from the total population. Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters, Late Starters and Percentage of children not admitted are analyzed.

AIR or GIR: Apparent Intake Rate or Gross Intake Rate

AIR is the percentage of new entrants (irrespective of age) in Grade 1 out of the total number of children of the official primary admission age (age 7 for Ethiopia) in a given year. It is also, called the Gross Intake Rate. Apparent Intake Rates tend to reflect those students who may have not been enrolling in school at the appropriate time, and often reflects the “backlog” of students who could not enrolled before.

A high Apparent Intake Rate for primary cycle indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100% due to over- and under-aged children entering primary school for the first time and inconsistencies in population data. Calculation Method:

$$\text{AIR} = \frac{\text{Number of New Entrants in first Grade}}{\text{Population at the official school - entrance age}} \times 100$$

Chart 1.2.1 Trend of AIR for the Last Five Years

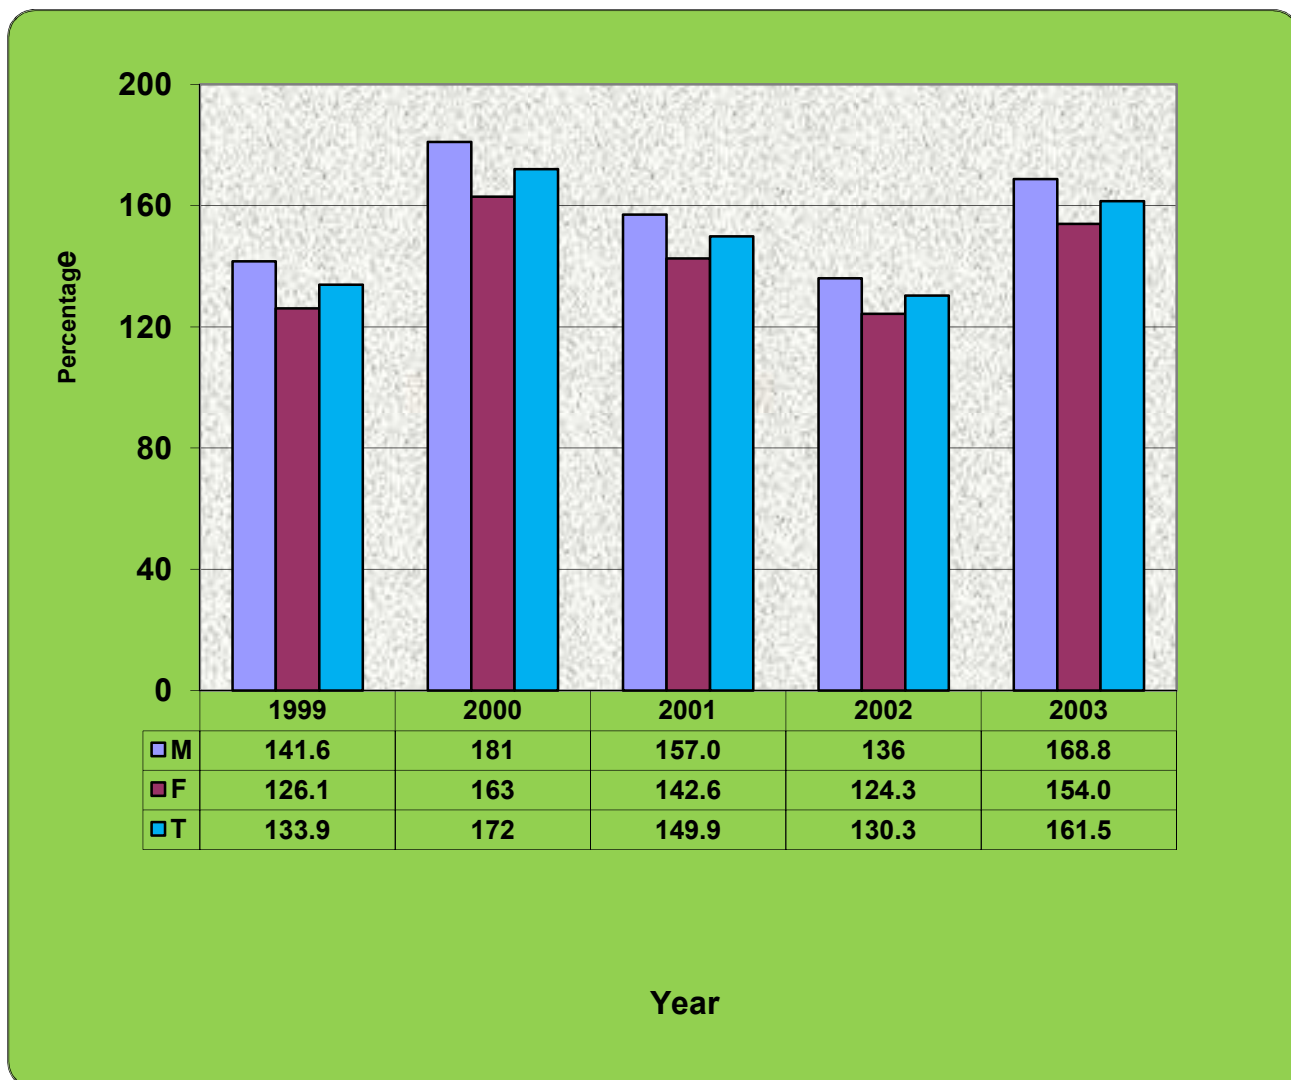

Table 1.2.1: AIR and Equity Indicators by zones, 2003 EC (2010-2011 G.C.)

| 23 | Wellega East | 132.0 | 122.1 | 127.1 | 231.4 | 236.7 | 234.0 | 139.28 | 130.64 | 134.99 | 0.94 | 0.54 | 8.6 | 106.9 |
| 24 | Wellega West | 133.5 | 125.7 | 129.6 | 160.0 | 162.0 | 161.0 | 136 | 129.29 | 132.67 | 0.95 | 0.81 | 6.7 | 31.4 |
| Total Oromia | | 167.5 | 150.9 | 159.4 | 179.7 | 179.8 | 179.7 | 168.8 | 154.02 | 161.51 | 0.91 | 0.89 | 14.8 | 20.4 |

As table 1.2.1 indicates, the AIR for Oromia in 2003 (2010/11) is 161.5% (Boys=168.8, Girls=154.0%). By this year **1,498,098** children were enrolled as new entrants, among them **807,384** (M=**422,233**, F=**385,151**) are 7 year old new entrants. In this regard Apparent Intake Rate is greater than 100% due to over aged and under aged children enrolments. The AIR of boys is greater than that of girls, and this indicates that, the access to the first grade of primary education is more preferable for boys than girls. As shows on the table, four zones have greater than the regional AIR of 161.5%. Regarding to GPI only four zones have less than the regional GPI, 0.91. Concerning Urban/Rural disparity, among 18 zones of Oromia only four of them have RUPI (Rural Urban Parity Index) greater than region. Specially, west Hararge, Guji, and East Shoa zones have ‘RUPI’ greater or equal to one. Table 5.1 on page 185-194 also indicates AIR by Woreda level.

NIR: Net Intake Rate

Net Intake Rate shows new entrants in the first grade of education cycle who are of the official school-entrance age, expressed as a percentage of the population of the same age.

The calculation requires new entrants in the first grade of education cycle who are of the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$(NIR) = \frac{\text{New entrants in the first grade of education cycle who are of the official school - entrance age}}{\text{Population at the official school - entrance age}} \times 100$$

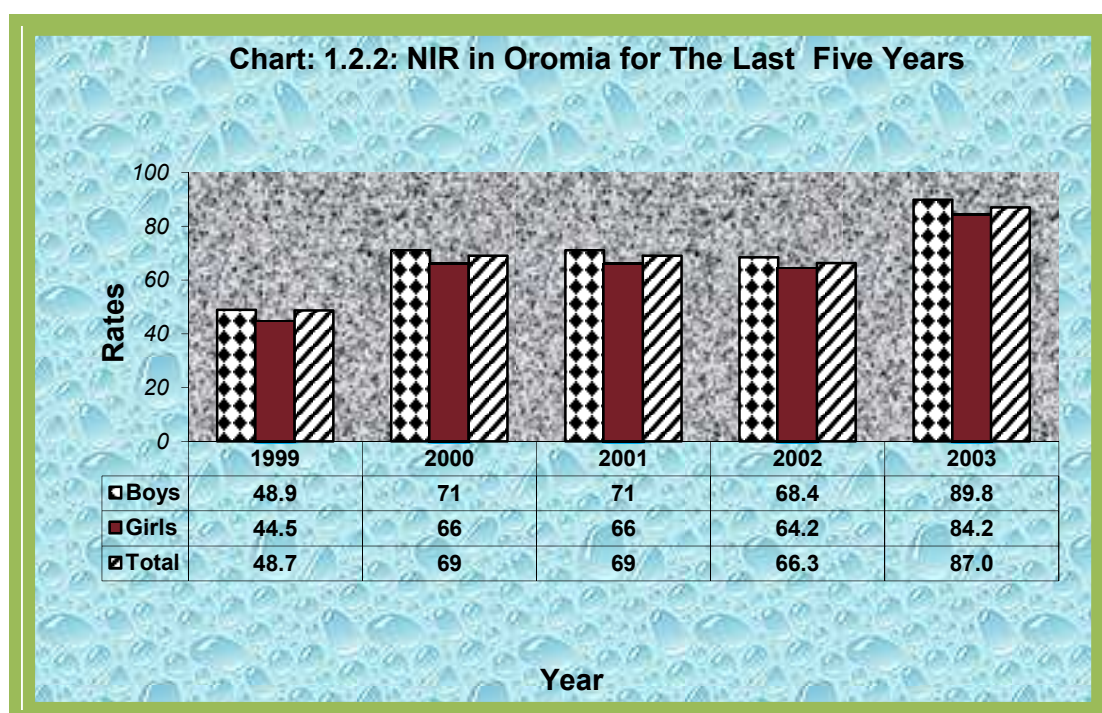

A high Net Intake Rate for primary education indicates a high degree of access to the first grade of primary education for the official primary school-entrance age children. For countries, which have subscribed to the policy goal of universal primary education, NIR of 100% will be a necessary condition.

Table 1.2.2: Net Intake Rate and Equity Indicators by zones in 2003 (2010/11)

| 23 | Wellega East | 70.6 | 66.0 | 68.3 | 120.8 | 127.4 | 124.1 | 74.3 | 70.6 | 72.4 | 0.95 | 0.55 | 3.7 | 55.8 |
| 24 | Wellega West | 87.9 | 83.8 | 85.9 | 120.0 | 123.3 | 121.7 | 91.0 | 87.7 | 89.3 | 0.96 | 0.71 | 3.3 | 35.8 |
| | Total Oromia | 89.5 | 83.1 | 86.3 | 92.7 | 93.4 | 93.0 | 89.8 | 84.2 | 87.0 | 0.94 | 0.93 | 5.6 | 6.7 |

As shown in Table 1.2.2, there are nine zones having more than regional NIR (87%). Amongst, three of them have more than 100% of NIR which is out of logical assumption; these are East Hararge, West Hararge and Jima. This may happens due to many reasons, among them wrong pupils age registration, errors of CSA data capturing, migration and some other reasons.

Concerning GPI 16 zones are having greater than or equal to regional GPI; among them seven of the zones have GPI more than 1.0, which means NIR of girls is more than that of the boys . Regarding RUPI, among 18 zones of Oromia, 4 of them have PI (Parity Index) greater than the region. Among the leading zones Hararge west, shoa East and Guji are having RUPI of (1.17, 1.09 & 1.05) respectively.

Early Starters

AIR can be over 100% due to the inclusion of under-aged and over-aged children. Therefore, timely entrance into the school system is important to minimize such gaps. Students said to be early starters if their actual age is less than that of official school admission age. As we can see from chart 1.2.3, percentage of early starters is getting decrease from year to year, for example 3.8% in 1999 (2005/06) and 2.7% in 2003 (2010/11) by AAGR (Annual Average Growth Rate) of 8.9%. We can also see, early starters by woreda on table 5.1, on page 185-194.

Late Starters

Late Starters are new entrants to grade one whose age is greater than the official school admission age (7 years old). This kind of indicator points out the proportion of children come to school for the first time after their official school admission age of the level. In the last five years the percentage of late starters fluctuated up and down from year to year, this shows that the number of over age children admitted to school has not decreased continuously. Chart 1.2.4 shows the progress of last five years trend, as indicated, 84.5% late starters in 1999 (2005/06) and 71.7% in 2003 (2010/11) with AAGR of 4.2%. We can also see late starters by woreda on table 5.1, page 185-194.

Percentage of Not Admitted

This percentage indicates the proportion of 7 years old children who did not enter school at the right age. It can be derived simply from the NIR in such a way that (100-NIR) for both boys and girls. In 2003 (2010/2011), therefore, 13 % (10.2% of boys and 15.8% of girls) whose age is seven were not admitted to grade one.

Gross Enrolment Rate (GER)

GER is, defined as the total enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. Moreover, it is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be higher than 100%, and frequently in countries attempting to address the backlog of students interested in attending school, but previously unable, because of financial need, family issues, or lack of schools.

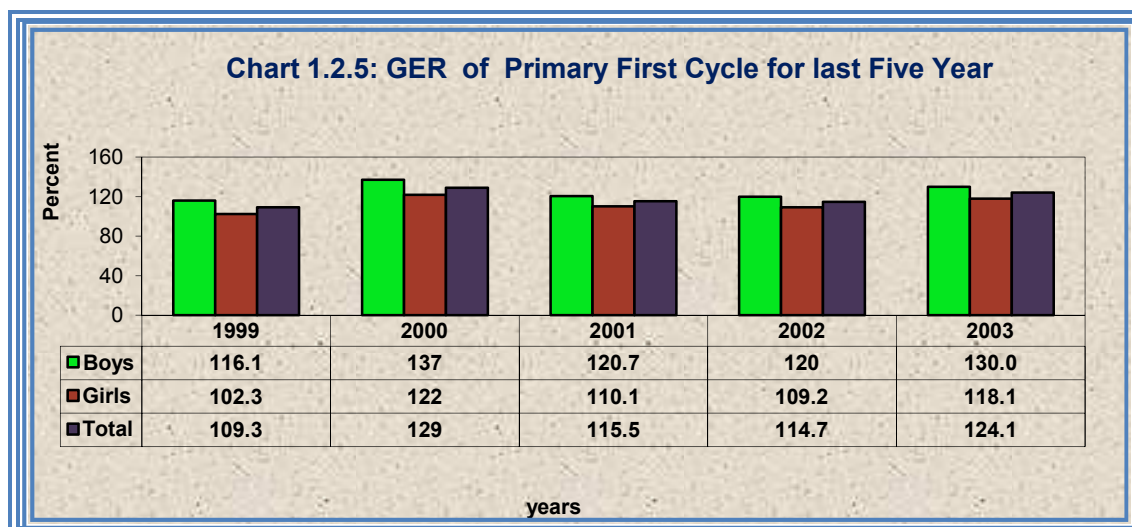

The data required to calculate GER is, total enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school - age population corresponding to the same level of education}} \times 100$$

A high GER interpreted as generally a high degree of participation, whether the pupils belong to the official age group or not. A GER value of 100 percent indicates that a country is able to accommodate all of its school-age population, but it does not indicate the proportion already enrolled. The achievement of GER of 100 percents therefore, is necessary but not a sufficient condition for enrolling all eligible children in the school. When the GER exceeds 90 percent for a particular level of education, the aggregate number of places for pupils is approaching the number required for universal access of the official age group. However, this is a meaningful interpretation only, if one can expect the under-aged and over aged enrolments to decline in the future to free places for pupils from the expected age group.

Gross Enrolment Rate of First Cycle Primary

This is the rate calculated simply dividing the total number of students enrolled in first cycle primary (irrespective of their age) by the total population of 7-10 years old. As shown from the chart 1.2.5 below, the GER registered 109.3% in 1999 (2005/06) and it reached 124.1% in 2003 (2010/11) by fluctuating up and down in the middle of the 1999 (2005/06) to 2003 (2010/11) years. As one can observe the data from this *chart* the number of over and under age children in the school system has not decreased continuously. We can also see GER of primary 1st cycle by worda on table 5.2, page 195-203.

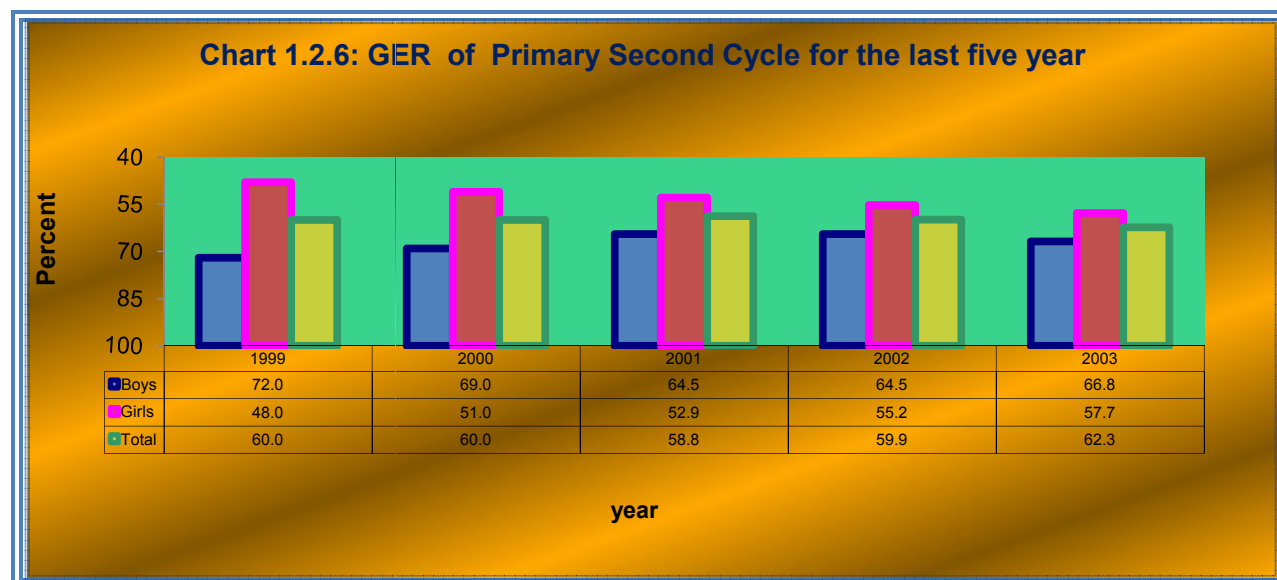

As Table 1.2.6 shows, 13 zones registered below the regional GER of first cycle primary (124.1%). Among them; Bale, Shashemene Adm.town and West Arsi were some of the least GER zones, having (95.0%, 95.3% & 100.8%) respectively; whereas, 5 administrative towns and six zones, are having more than the regional GER. Among them Jima, North Shoa and Bishoftu town are some of them and having GER of (163.2%, 152.2% & 140.8%) respectively. GER by woreda also placed in detailed approach on table 5.2, page 195-203.

Regarding to GPI, 18 zones and one Administrative Town of Oromia have greater than regional GPI (0.909), among them six zones have GPI of more than (1.0), this indicates, GER of girls are more than that of boys. Regarding to 'RUPI' (Rural/ Urban Parity Index) among 18 zones of Oromia only five of them have PI (Parity Index) greater than the region (0.809). Among them the top leading zones are South West Shoa, East Shoa and west Hararge have RUPI of (0.955, 0.965 & 1.012) respectively. Negative on the gender gap indicates that, rate of female is greater than male.

Gross Enrolment Rate of Primary Second Cycle

As shown from chart 1.2.6, the Gross Enrolment Rate of female for primary second cycle (5-8) shows a bit increment during last five years. On the other hand, GER of male for second cycle primary had continuously decreases from 1999 to 2002 E.C and a bit increment in 2003 E.C. whereas, the positive impact registered in last five years is the dramatic decrement of gender gap.

As Table 1.2.7 indicates, 10 zones and six administrative towns registered above the regional GER of second cycle primary (62.3%). Among them, the three highest GER are Bishoftu/**Town**/, Shashemene /**Town**/ and Adama /**Town**/ administrative towns, which were having (127.8, 102.0% & 100.0%) respectively. Whereas, 8 zones are having less than the regional GER. Among them the least of the three from the bottom are Bale, Hararge West and Borena, which are having GER of (45.5%, 44.0% & 43.1%) respectively.

Regarding to gender disparity, 18 zones have GPI greater than the region, which was (0.86), among them 7 zones have GPI of more than (1.0), that means GER of girls are more than that of boys. Concerning 'RUPI', among 18 zones of Oromia only 7 of them have PI (Parity Index) greater than the regional RUPI (0.38). Among the leading zones Shoa South West, West Shoa and Wellega West have PI of (0.63, 0.47& 0.47) respectively.

Gross Enrolment Rate Primary (1-8)

Gross Enrollment Rate is the percentage of total enrollment in primary schools, irrespective of age, out of the corresponding primary school age population, ages 7-14. GER is a crude measure of school coverage. Usually, since it includes under-aged and over aged pupils, GER can be higher than 100%, and frequently is in countries attempting to address the backlog of students interested in attending school, but previously unable to because of financial need, family issues, or lack of schools.

The GER of primary education of Oromia region by 2003 E.C is 95.4% (Boys=100.6%, Girls= 90.0%). As shown from chart 1.2.7, the GER 90% in 1999 (2005/06) increased to 101.4% in 2000 (2007/08), and then decreased to 95.4% in 2003 (2010/2011). The main reason for decreasing in GER is the increasing of SAP (School Age Population) of Central Statistics Agency (CSA) held in 2008 G.C, because the projection is much more than SAP of the previous census of CSA data.

As Table 1.2.8 indicates, 10 zones and 6 administrative towns registered above the regional GER of primary (95.4%). Among them, the three highest GER zones are Bishoftu administrative town, Jima and kelem Wollega zones are having (133.9%, 115.0% & 108.5%) respectively; whereas, eight zones are having less than the regional GER. Among them, the three least are Bale, Borena and Guji are having GER of (72.2%, 74.7% & 81.1%) respectively.

With regard to gender disparity, 18 zones are having GPI greater than the region, which is 0.9; among them 12 zones are having GPI more than or equal to 1.0, which means GER of girls are more than that of boys. Regarding to the regional disparity (Urban and Rural), among 18 zones of Oromia only four of them have RUPI greater than the region RUPI of (0.6). Among the leading zones South west Shoa, East Shoa and west Hararge are having PI of (0.8, 0.7 & 0.7) respectively.

| Mi'essoo | 113.1 | 90.0 | 101.9 | 117.3 | 93.7 | 105.9 | 105.9 | 93.7 | 101.9 | 40.1 | 19.2 | 30.0 | 80.5 | 58.6 | 69.9 | 82.8 | 60.6 | 72.1 | 0.7 | 22.2 |
| Shawaa Bahaa | 91.6 | 82.5 | 87.2 | 95.8 | 85.9 | 91.0 | 91.0 | 85.9 | 87.2 | 83.5 | 61.3 | 72.8 | 87.7 | 72.5 | 80.4 | 89.9 | 74.3 | 82.4 | 0.8 | 15.6 |
| Pastoralist Woredas Average | 114.5 | 85.2 | 100.3 | 121.7 | 90.6 | 106.6 | 106.6 | 90.6 | 100.3 | 56.3 | 23.8 | 31.7 | 80.4 | 57.3 | 69.2 | 84.3 | 60.2 | 72.6 | 0.7 | 24.1 |
| Oromia Rural | 122.1 | 109.3 | 115.8 | 127.6 | 114.0 | 120.9 | 120.9 | 114.0 | 115.8 | 56.3 | 45.8 | 51.1 | 91.9 | 80.2 | 86.1 | 94.9 | 82.7 | 88.9 | 0.87 | 12.3 |

As we can see from the Table 1.2.9, there are eight woredas having greater than the regional rural area GER **88.9%**. Among them the woredas registered highest GER is Burka Dintu, Moyale and Chinaksen having (115.8, 110.8, 106.0) respectively. In addition to that, 13 pastoralist woredas are having GER greater than pastoralist woredas average which is **72.6%**. However, the rest of them are less than the regional and pastoralist woredas average GER. Whereas, regarding to GPI, nine pastoralist woredas are greater than the regional rural GPI of 0.87, among them 7 woredas have more than or equal to GPI of 1.0, that indicates the GER of girls are greater than the GER of boys. Those woredas are Teltelle, Moyyaalee, Miyo, Dirree, Dhas, Areeroo and Yabelo which are having GPI of (1.1, 1.1, 1.1, 1.1, 1.0, 1.0 & 1.0) respectively.

Net Enrolment Ratio (NER)

It is the rate of the official age group for a given level of education expressed as a percentage of the corresponding school age population. NER is the best way of measuring organized on-time school participation and is a more refined indicator of school and enrollment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER is, calculated by dividing the number of properly aged primary students (for Ethiopia ages 7-14) by the number of children of school age population (7-14).

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age - group}}{\text{Official school age population corresponding to the some level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value is 100%. Increasing trends can be, considered as reflecting improvement in participation of official school age population at the specified level of education. When the NER compared with the GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children/youth could be, enrolled at other levels of education.

NER in first cycle Primary (1-4)

NER for first cycle primary is the percentage of students who enrolled in first cycle primary, whose age is 7-10, compared to the school age population of this level that is total population of 7-10 years old.

As shown from chart 1.2.8, The NER of primary in first cycle is 72% in 1999 E.C and then increased to 91.4% in 2003 E.C. Table 1.2.10 also indicates nine zones registered above the regional NER of first cycle primary (91.4%). Among them, Jima, East Hararge and West Hararge zones are the three highest Zones having NER of (123.4%, 109.2% & 106.5%) respectively. whereas; nine zones and six administrative towns are having less than the regional NER. Among them the three least zones from the bottom are shashemene Town Borena and Bale, having NER of (57.3%, 60.5% & 65.1%) respectively.

As we can see from the table, Jima, East and West Hararge, Ilubabora, and west wollegga zones are having NER more than 100%. However, logically NER never be more than 100%. There are different assumptions for such kinds of inaccuracy. Among them, firstly some students might be migrated to those zones from other places for attending the purpose of schooling, where as those students might not be included in the SAP of the zones, secondly wrong registration of Pupils age during registration and thirdly the CSA census problems, are the main assumptions.

Regarding to gender disparity, 16 zones and 6 Administrative town are having more than the region **GPI (0.94)**, among them 3 zones and 5 Administrative town are having GPI more than 1.0, this indicate that NER of girls are more than that of boys. Concerning to (Urban and Rural disparity) between 18 zones of Oromia only four of them are having **RUPI** of greater than the region (**0.82**). Among the leading zones Hararge west, South West Shoa and Shoa East are having RUPI of (1.03, 1.00 & 0.91 respectively).

NER in the Second cycle Primary (5-8)

NER is the proportion of enrolment of students in second cycle primary of the age (11-14), with eligible school population of age (11-14). Table 1.2.11, below indicates ten zones and six administrative towns registered above the regional NER of second cycle primary (43.9%). Among them, the three highest NER are Bishoftu, Shashemene administrative towns and Wellega west (79.62%, 66.5% & 64.6%) respectively. whereas, eight zones are having less than the regional NER. The three zones having least NER, Borena, Guji, and Bale, are having NER of (24.4%, 25%, & 29.83%) respectively.

Among the listed zones 12 zones and 6 Administrative towns are having greater than the regional GPI (0.94), from them 6 zones and 5 Administrative towns are having GPI more than 1.0. Concerning Rural/Urban parity Index, among 18 zones of Oromia, only 7 of them are having RUPI greater than the region (0.42). Among the leading zones of RUPI; South West Shoa, West Shoa and West Arsi and East Shoa are having RUPI of (0.70, 0.54, 0.52, 0.52).

Table 1.2.11: Net Enrolment Ratio of Primary Second Cycle (5-8) and Their Equity Indicators

| Nekemte /Town/ | | | | 59 | 66.7 | 62.93 | 59 | 66.7 | 62.9 | 1.13 | | -7.68 | |
| Shashemene /Town/ | | | | 60.8 | 72.4 | 66.5 | 60.8 | 72.4 | 66.5 | 1.19 | | -11.59 | |
| Shoa East | 38.4 | 42.1 | 40.2 | 75.1 | 80.8 | 77.97 | 45.5 | 50.4 | 47.9 | 1.11 | 0.52 | -4.86 | 37.813 |
| Shoa North | 30.5 | 28.6 | 29.6 | 92.3 | 102 | 97.14 | 37.2 | 36.8 | 37 | 0.99 | 0.30 | 0.40 | 67.57 |
| Shoa South West | 49.9 | 46.3 | 48.1 | 67.6 | 70.7 | 69.12 | 51.9 | 49.1 | 50.5 | 0.95 | 0.70 | 2.76 | 21.012 |
| Shoa West | 47.7 | 44.7 | 46.2 | 78.7 | 93.8 | 85.9 | 51.6 | 50.5 | 51.1 | 0.98 | 0.54 | 1.03 | 39.727 |
| Wellega East | 46.2 | 44.5 | 45.4 | 168 | 185 | 176.5 | 56.4 | 56.3 | 56.3 | 1.00 | 0.26 | 0.11 | 131.11 |
| Wellega West | 56.9 | 56.8 | 56.9 | 113 | 124 | 118.6 | 63.8 | 65.3 | 64.6 | 1.02 | 0.48 | -1.49 | 61.753 |
| Total Oromia | 39.1 | 35 | 37 | 86 | 91 | 88.5 | 45.3 | 42.4 | 43.9 | 0.94 | 0.42 | 2.87 | 51.55 |

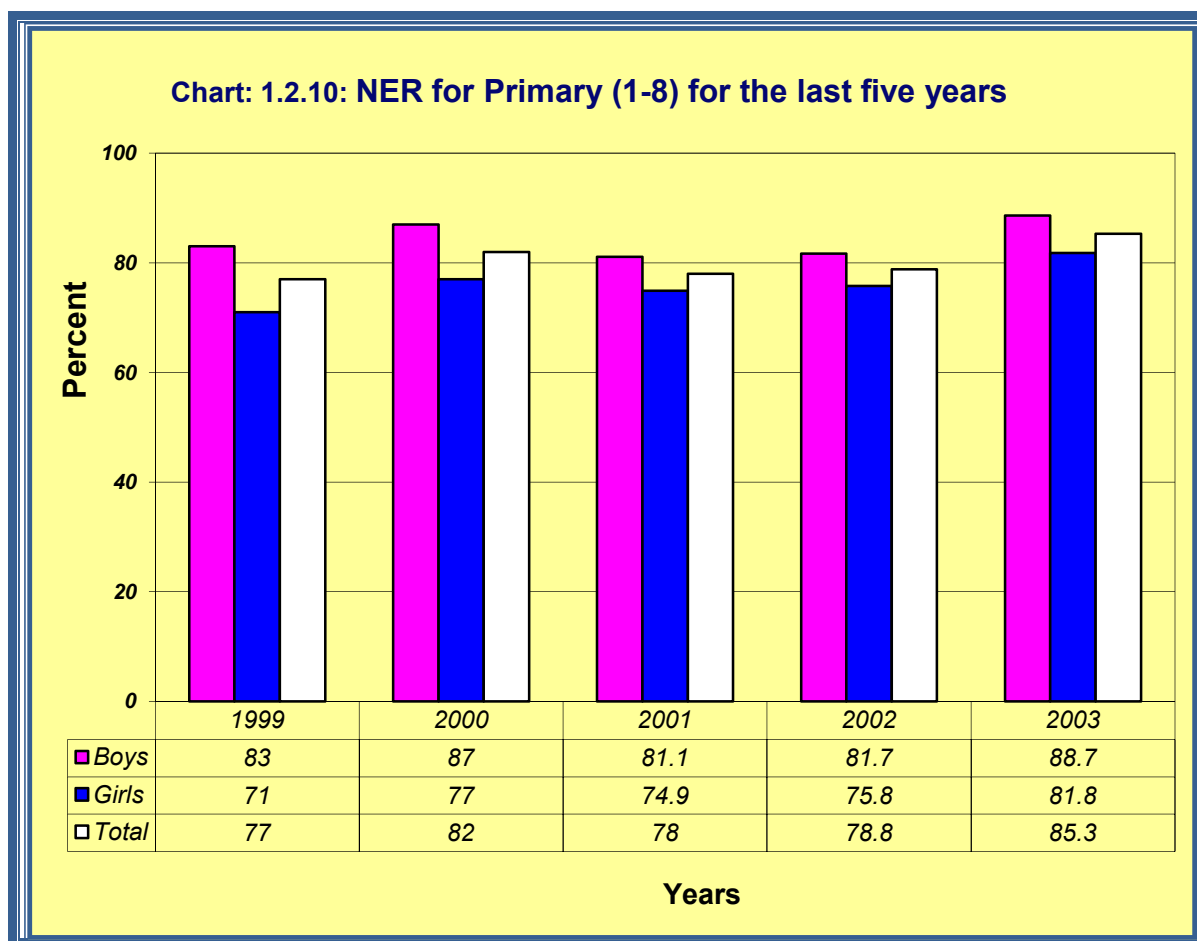

As chart 1.2.9 shows the NER of primary, second cycle in 1999 E.C is 37.8% and then increased to 43.9% in 2003 E.C with the annual growth rate of 3.81%. As the growth rate indicates, NER of the level increased insignificantly, so that educational policy makers, planners and implementers have to give serious attention to fill the gap.

Net Enrolment Rate in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also be calculated in a similar way of calculating NER for first cycle and second cycle primary. It is the proportion of the appropriate school age children enrolled (7-14) in primary school with the total school age population (7-14 ages).

If we consider NER for first cycle and second cycle separately, it would take more time to achieve 100% NER than when we consider NER of complete primary. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included, when we calculate NER for complete primary. As the chart 1.2.10 indicates, during the last five years NER of complete primary school has increased from 77% in 1999 E.C to 85.3% in 2003 E.C. with an annual average growth rate of 2.6%.

As Table 1.2.12, indicates ten zones one Administrative town registered above the regional NER of primary education (85.3%). Among the high NER registered zones Jima zone, Bishoftu administrative town and Kelem Wellega zones have NER of (107.2%, 101% & 96.5%) respectively. whereas, 13 zones have less than the regional NER, amongst the least of the three Borena, Bale, and Guji zones are having NER of (62.8%, 63% & 66.8%) respectively.

Regarding to gender disparity, 12 zones and 6 Administrative town are having greater than the region GPI of (0.9), among them four administrative towns are having GPI more than 1.0, that means NER of girls are more than that of boys. Concerning RUPI, between 18 zones of Oromia only five of them have PI (Parity Index) greater than the region RUPI of (0.68). Among the leading zones, South West Shoa, East Shoa and West Hararge are having PI of (0.91, 0.78 & 0.78) respectively.

Enrollment of Children with Special Needs

According to Table 1.2.13 and Table 1.2.14, the total number of students with Special Needs Education in 2003 E.C in primary is (19,302) and around 1,986 in secondary. However, the number of children with Special Needs Educational who are currently attending schools is, expected to exceed this figure. Therefore, the area needs attention to fill the gap by making children with disabilities to join opportunities for learning in an inclusive environment, so that it requires governmental attention, by investing on teachers training, physical infrastructure and the provision of learning equipments on the special needs education.

Primary and Secondary Gender Equity in the Last Five Years

The following tables show primary and secondary gender equity indicators for the last five years. As table 1.2.27 shows, gender gap of GER of primary (1-8) were decrease gradually from 19.0% in 1999 (2005/06) to 10.6% in 2003 (2010/11) with AAGR of 15.7%. Whereas gender gap of NER of primary (1-8), as shown from table 1.2.28 decreases from 12% in 1999 (2005/06) to 6.9% in 2003 (2010/11) with AAGR of 14.8%.

| Year | GER Primary (1-4) | | | GER Primary (5-8) | | | GER Primary (1-8) | | |
|------|-------------------|--------|------------|-------------------|--------|------------|-------------------|--------|------------|
| | Male | Female | Gender Gap | Male | Female | Gender Gap | Male | Female | Gender Gap |
| 1999 | 116.1 | 102.3 | 13.8 | 72 | 48 | 24.0 | 99 | 80 | 19.0 |
| 2000 | 137 | 122 | 15.0 | 69 | 51 | 18.0 | 110.1 | 92.6 | 17.5 |
| 2001 | 100.8 | 92.9 | 7.9 | 67.4 | 57.1 | 10.3 | 84.8 | 76.3 | 8.5 |
| 2002 | 120 | 109.2 | 10.8 | 64.5 | 55.2 | 9.3 | 94.2 | 84.1 | 10.1 |
| 2003 | 130.0 | 118.1 | 11.8 | 66.8 | 57.7 | 9.1 | 100.6 | 90.0 | 10.6 |

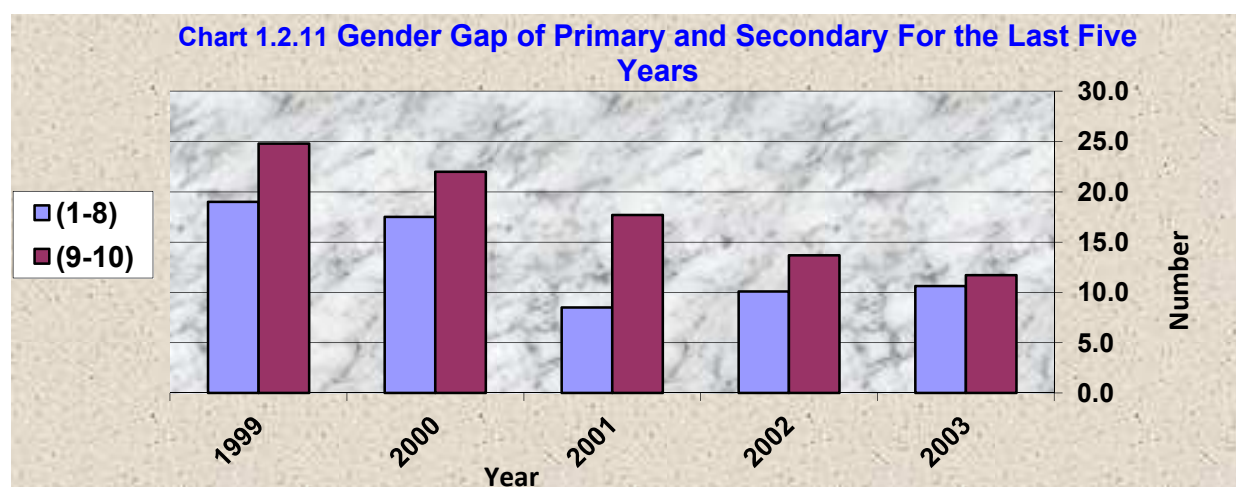

| Year | NER Primary (1-4) | | | NER Primary (5-8) | | | NER Primary (1-8) | | |
|------|-------------------|--------|------------|-------------------|--------|------------|-------------------|--------|------------|
| | Male | Female | Gender Gap | Male | Female | Gender Gap | Male | Female | Gender Gap |
| 1999 | 75 | 68.4 | 6.6 | 42.6 | 32.9 | 9.7 | 83 | 71 | 12.0 |
| 2000 | 88 | 81 | 7.0 | 41 | 35 | 6.0 | 87 | 77 | 10.0 |
| 2001 | 69.4 | 65.9 | 3.5 | 41.7 | 39.9 | 1.8 | 74.7 | 70.3 | 4.4 |
| 2002 | 85.4 | 80.2 | 5.2 | 43.1 | 40.6 | 2.5 | 81.7 | 75.8 | 5.9 |
| 2003 | 94.5 | 88.2 | 6.3 | 45.3 | 42.4 | 2.9 | 88.7 | 81.8 | 6.9 |

Concerning to the secondary schools gender gap, as table 1.2.29 indicates, according to GER of (9-10) and (11-12), their gender gap decreases form 24.4%, 3.8% in 1998 (2004/05) to 11.7%, 3.6% in 2003 (2010/11) with AAGR of 10.7%, 31.96% respectively. Whereas, according to their NER of (9-10) and 11-12 as Table 1.2.30 indicates, their gender gap decreases from 6.94%, 2.07% in 1998 (2004/05) to 0.9%, 0.9% in 2003 (2010/11) with AAGR of 50.4%, 18.1% respectively.

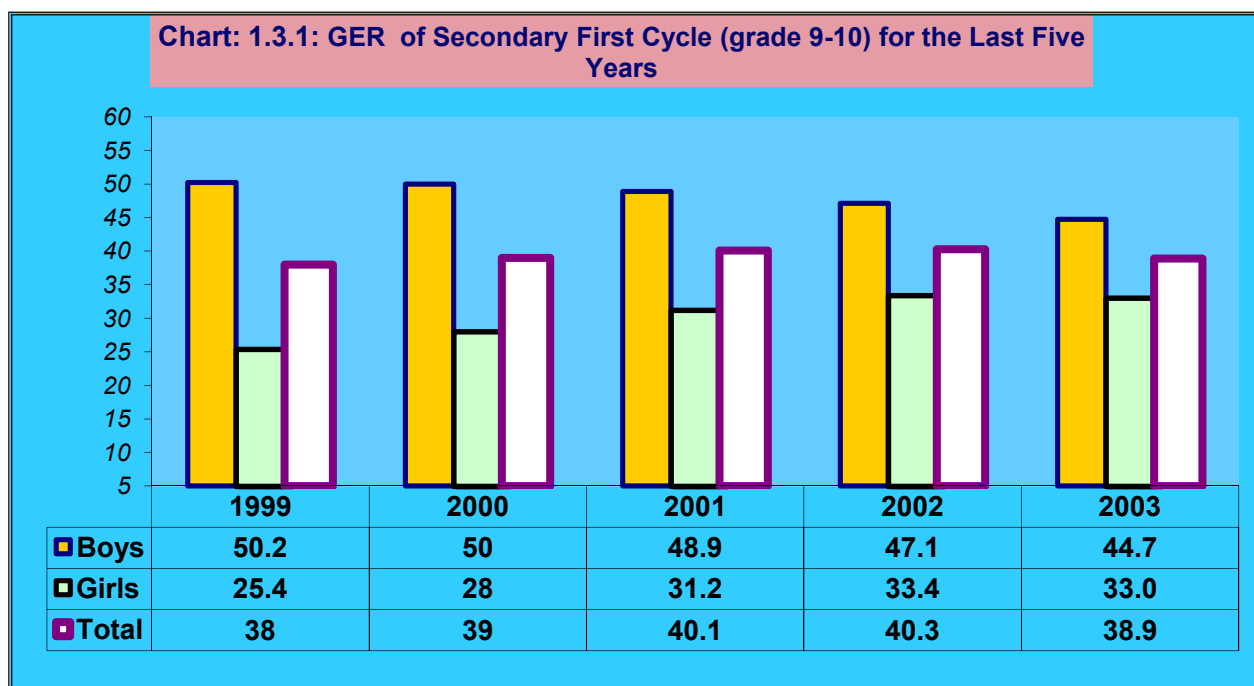

| Table 1.2.29: Secondary Gender Gap by GER for the Last Six Years | | | | | | |

Notice: - Asking apologise, for our publication of Statistical Abstract of 2002 E.C (2009/10 G.C), on page 49, Ttable no 1.2.28. It was duplicated data for first cycle and second cycle primary gender gap information. But, the heading for the data indicates as it was for secondary first cycle and second cycle gender gap information. We want to say sorry our customers, parents and stackholders for the mismatch data indicated there. The real data for it was indicated on the table shown above.

1.3 Secondary Education

Secondary Education

Secondary education is composed of two cycles. They are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) designed to continue the basic programs of the primary level, but the teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. Preparatory classes (11-12) is the final stage of secondary education and the entry point of higher institution so that instruction is often organized and even more along subject lines and teachers typically need a higher or more subject-specific qualification.

GER General Secondary (9-10)

GER of general secondary education (Grade 9-10) is the proportion of all enrolments regardless of age out of the school age population at this level. It compares the total number of students in the general secondary school with the school-age population of this level.

In Ethiopia, the official school age for secondary first cycle is 15-16 years old. As chart, 1.3.1 shows the GER of secondary first cycle in 1999 E.C is 38% and then increased to 38.9% in 2003 E.C with the annual growth rate of 0.59%. As the growth rate indicates, GER of the level increased insignificantly, so that the issue needs attention of the concerned body.

| 23 Wellega East | 10.3 | 5.0 | 7.6 | 569.5 | 422.5 | 495.8 | 59.1 | 40.7 | 49.8 | 0.69 | 0.02 | 18.36 | 488.24 |
| 24 Wellega West | 5.1 | 3.6 | 4.3 | 496.5 | 401.3 | 448.2 | 70.6 | 56.3 | 63.3 | 0.80 | 0.01 | 14.23 | 443.83 |
| Oromia | 4.7 | 2.8 | 3.7 | 285.6 | 213.5 | 249.7 | 44.7 | 33.0 | 38.9 | 0.74 | 0.01 | 11.70 | 245.99 |

Table 1.3.1 shows the secondary school (9-10) Gross Enrollment Rate by location and sex. As can be seen from the table, nine zones and six administrative towns registered above the regional GER of secondary (9-10) of 38.9%. Among the three higher GER registered administrative towns, Shashemene, Asela and Bishoftu Administrative Towns are having GER of (158.7%, 143.9% & 139.6%) respectively. whereas, nine zones from the region have less than the regional GER; among the least GER zones Jima, West Hararge, and East Hararge are having GER of (20.0%, 21.1% & 22.7%) respectively.

Regarding to zones having greater than GER of 100 it doesn't indicate that number of children irrespective of age from these administrative towns enrolled to the secondary education. Nevertheless, students who are living in surrounding areas come to those towns to attend their high school education. Moreover, this makes the increasing of enrolment in secondary education. Unfortunately, even though the school age population of those areas remains constant without any change, the enrolment of those areas is dramatically increases and this event makes the GER above 100%.

NER in First Cycle Secondary (9-10)

For this level, we consider NER students enrolled in first cycle secondary whose age is (15-16) and compare it to the total number of population belonging to the mentioned age group.

Chart 1.3.2 below indicates five years NER of secondary (9-10) for example in 1999 E.C. 14.5% and in 2003 E,C 14.2%. As the data indicates NER of the level was not show significant change during last five years, so that the issue needs serious attention from the concerned body.

As it can be seen from table 1.3.2, the secondary school (9-10), eight zones and six administrative towns registered above the regional NER (14.2%). Among largest NER of Administrative Towns, are Asela, Bishoftu and Shashemene administrative towns, having NER of (67.0%, 61.7% & 61.0% %) respectively. Whereas, ten zones from the region have less than the regional NER; amongst the least NER zones, Guji, Jima and Hararge East are some of them having NER of (8.1%, 8.7% & 8.7%) respectively.

GER and NER of Preparatory (Grades 11-12)

The GER of preparatory Grade (11-12) is calculated by dividing total enrolment irrespective of age of preparatory by the population of corresponding age (age 17-18), whereas NER is calculated with enrolment of specific age by the school age population of corresponding age group.

As chart, 1.3.3 indicates GER of secondary (11-12) increased insignificantly for the last five years. It is 4.8% in 1999 E.C (2005/06) and 6.7% in 2003 E.C (2010/11) with the average annual growth rate of 8.6%.

| East | Fantaallee | 57.59 | 36.94 | 47.74 | 17.77 | 15.62 | 16.75 | 0.64 | 20.65 |
| Pastoralist Woredas | | 21.78 | 9.86 | 15.96 | 1.77 | 0.78 | 1.28 | 0.45 | 11.91 |
| Oromia Rural | | 4.7 | 2.8 | 3.7 | 0.21 | 0.15 | 0.18 | 0.60 | 1.90 |

As we can see from the Table 1.3.5, some pastoralist woredas have GER more than the rural (9-10), GER (3.7%) of regional average. Among these areas, the three highest GER of pastoralist woredas are Moyale, Fentale and Wadera, and they are having GER of (68.81, 47.74, & 39.62) respectively. Whereas, concerning to GPI, only three pastoralist woredas have greater GPI than of rural Oromia region of (0.60). This indicator showed that, the issue needs due attention.

1.4. Adult and Alternative Basic Education Program

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. In Dakar Framework, the term is synonymous with the broad EFA agenda. However, in this publication under this title we only try to specify the data of Adult and Alternative Basic Education Program of the last five years. Additionally, ABE enrollments have been included in reporting of regular education and therefore, GER and NER of 1st cycle primary education reflect the contribution of ABE enrolment. Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than the traditional primary school going ages of 7-14.

| Year in E.C | Number of Adult | | | Number of ABE Children | | |
|-------------|-----------------|--------------|--------------|------------------------|--------------|---------------|
| | Male | Female | Total | Male | Female | Total |
| 1999 | 45361 | 21839 | 67200 | 95563 | 77441 | 173004 |
| 2000 | 45941 | 15883 | 61824 | 88113 | 65185 | 153298 |
| 2001 | 80454 | 39587 | 120041 | 106596 | 84365 | 190961 |
| 2002 | 112089 | 59676 | 171765 | 101460 | 82443 | 183903 |
| 2003 | 175045 | 110679 | 285724 | 91032 | 74286 | 165318 |

As noted, Enrolment of Adult Education has increased in 43.6% (40.1%, 50.0%) of AAGR in the past five years as total, male and female respectively. Whereas, ABE enrolment decreased from year to year, this might be show the assumption of decreasing enrolment in ABE as out of school children join the regular schools than ABE centers. Nevertheless, the cause of decrement of ABE enrolment in the past five years might not be such reason because millions of out of school children are still not joining the school. Accordingly, we assume that the challenges might be the following; low community participation in the management and supervision of the ABE centers, low supervision and follow-up activities of WEO, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region. So that, policy makers, planners and the concerned body has an assignment to fill all this gaps to attain UPE accordingly.

1.5. College of Teachers Education (CTE)

As of 2010/11, there were ten Government College of Teachers Education (CTE) in our region, these CTEs offer instruction via Regular, Evening, Kiremt (summer) program.

1.5.1. CTE Enrolment

Regarding to the enrolment as shown on table 1.5.4, for ten CTEs there are **53,616** Regular, Evening, and summer students in all linear and cluster programs. Amongst, **32,367** students attend linear modality and **21,249** students attend cluster modality which accounts for **60.4%** and **39.6%** of the total are for linear and cluster programs respectively. Accordingly, to look at gender participation in regular program **45.93%**, **54.7%** respectively for male and female. But unfortunately, in total sum of all program as shown from table 1.5.4, female participation are less than that of male, (**58.3%** and **41.7%**) male and female respectively.

2. QUALITY

Quality of the education system may refer to many different characteristics such as quality of the inputs into the education system, the quality of the outputs from the quality of education process and the quality of the outcomes of the education system. Here we focus on quality in relation to educational inputs, such as qualified teachers at each level, student textbook ratios, pupil-teacher ratios and pupil-section ratios. Some indicators of quality depend on the total number of student enrolment. If the number of students increases, the number of teachers, classrooms and textbooks, etc. should increase at the same proportion to maintain the minimum standards that are in existence prior to the increase.

2.1. Teachers of Primary and Secondary Education

One of the main factors, which affect the quality of education, is the qualifications of the teacher. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. The primary education, according to national standards, requires teachers with minimum qualification of College of Teachers Education Diploma and B.A or B.Sc. or above for secondary schools.

Percentage of Qualified Primary School Teachers

The minimum qualification required for primary teachers is diploma from College of Teachers Education or other accredits institution. As we can see from table 2.1.1 in 2003 E.C, the percentage of qualified teachers for primary at regional level is **51.7%** (Male **48.7%** Female **51.7%**). Regarding primary (1-8) the table shows Nekemte and Asela Administrative Town, and Horo Guduru Wellega zones have relatively better qualified teachers than the rest of zones in Oromia, these zones were having percentage of qualified teachers 83%, 67.2%, and 67.4% respectively.

Qualification on first and second cycle primary is also indicated on the tables 2.1.2 and 2.1.3 As indicated, percentage of qualified teachers for first cycle primary (1-4) at regional level is **28.7%** (Male **22.2 %** Female **38.7%**), whereas for the second cycle primary (5-8) percentage is **85.4%** (Male **82.3%** Female **92.7%**). Specially, for primary first cycle the percentage of qualified teachers are very low, so that policy makers, planners and the concerned body must give due attention for the issues.

Percentage of Qualified Preparatory (11-12) Teachers

Preparatory Education requires teachers with minimum qualification of BA/BSc/BEd. As shown from table 2.1.8 the 2003, E.C (2010/11) data shows that, 92.6 %, of teachers have qualified to fulfill this requirement of the level, for both Government and non Government. The data also indicates that considerably teachers for this level were more approached to complete qualification.

2.2. Ratios of Primary and Secondary Education

I. Pupil-Text Book Ratio

One of the educational inputs, which affect quality of education, is a textbook. If the education system provides the well-prepared standardized books and fairly distributed for the students as well, there is no question for the positive impact of quality of education on the issue. Oromia Education Bureau ,with collaboration of Oromia Regional Government, has been exerted its effort in publishing and distributing student textbook considerably, in order to improve the distribution of student -textbook ratio to one- to -one standard. Even though, the management and supervision of textbook distribution at local level, especially at woreda and school level, is low in some areas, the publication and provision of textbooks at regional level is quite well.

As shown from table 2.2.1, student - textbook ratios indicate as tenth ratio in 2003 E.C (2010/11); because, the distribution of textbooks is not quite undertaken in some areas as one- to -one ratio. Moreover, it is impossible to put the ratio in decimal number as well. Therefore, it is hard to specify the ratios in to 1:1 approach. Accordingly, it is better to put the ratios of student to textbook ratios in tenth to settle the error of decimal points. For example, the ratio (6:10) means, six set of textbooks distributed for ten students. It means that, four pupils didn't get textbooks out of ten pupils. Meanwhile, table 2.2.1 indicates distribution of textbooks in such manner to minimize the indicated inaccuracy.

Besides, (10:10) means, distribution of textbook to students' ratio is stable in those areas; it means all of students get the set of text book individually. If the ratio is in the form of (11:10) or more, it means that there is one or more extra set of text books in that area. Therefore, the concerned bodies have to take a measure by taking those extra text books from those areas to the scarcity place to fix the balancing problem.

II. Pupil to Teacher Ratio (PTR)

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils will have better chance of contact with the teachers. The standard set for pupil teacher ratio for primary education is 50:1. However, as shown on chart 2.2.1, during last five years the PTR ratio of primary education has shown highly fluctuated by increasing and decreasing from year to year. For example, in 1999 E.C. it was 54:1, and then moved to 59 in 2003 E.C. This ratio indicates the rate at which the number of teachers slightly decreases or the number of teachers is not increased while enrolment increases. Therefore, even though the performance implemented was satisfactory in the mean time, we expect to have more effort for training additional teachers to bring this ratio back down to the standard. As shown from chart 2.2.1, PTR for secondary education in the past five years has radically decreased from 63:1 to 35:1. In recent year the ratio of secondary (9-10) shows as it is less than the standard which is also abnormal, since the standard of the level is 40:1; it also needs attention in assessing the reason why it becomes below the standard.

Chart 2.2.1: Primary and Secondary(9-10) Students Teacher Ratio

Furthermore, calculating pupil to teacher ratio by zone also presents a more realistic view of pointing out the problems and gaps of the issue. In this regard, as it can be seen on table 2.2.2, PTR at first cycle primary (1-4) is 68:1, while in the second cycle primary (5-8) the ratio is 45:1, concerning to the secondary (9-10) as can be shown on table 2.2.3, PTR is 35:1 and in Preparatory 30:1 in 2003 E.C (2010-2011 G.C.). The ratio indicates as it is below standard, the issue needs research to find the reason why the student teacher ratios became below the standard.

III. Pupil Section Ratio (PSR)

The average number of pupils per class is another significant indicator and gives a rough estimation of class size; it uses to assess the efficiency of resource utilization. Indirectly it also used to assess the teaching and learning process. The national standards for PSR are 50 and 40 for primary and secondary education respectively. As one can see from chart 2.2.2, during the last five years, PSR in primary has decreased from 65:1 in 1999E.C to 61:1 in 2003E.C, and as shown from chart 2.2.3, secondary school (9-10) PSR was declined to 64:1 in 2003 E.C. from 83:1 in 1999E.C.

2.5. Regional Education Bureau Revenue and Expenditure

Education in our country was financed through a two-step process. The first involves fiscal transfers from the federal government to the regions and the second from regional governments to *woredas*. Most transfers operate through large federal block grants which our region and *woredas* Finance and Economic Development Sectors may allocate freely. A ‘three parameter’ formula for grant allocation to the regions takes into account population size, poverty and development levels, our Regional Government also uses these three-parameter formula to allocate the grant to *woredas*.

As the report from “BOFED” indicates on the table 2.5.1, our Regional Government allocated budget percentage, for the education sector finances of both capital and recurrent in 2003 E.C, as compared to the regional aggregate budget, 27%, 27%, and 30.5% for approved, adjusted and actual expenditure respectively. This percentage indicates that the Regional Government gave high priority for education sector as compared to other sectors in the region.

Tables 2.5.2 to 2.5.6, are not the part of the report of **BOFED**, rather the data was gathered from the school by annual questionnaire of the school Census. The tables indicate revenue and expenditure of the region by zone level. The data specify all about the information of primary education program of government and non government school’s revenue and expenditure in detailed manner.

3. EFFICIENCY

An education system is said to be efficient, if maximum output is obtained from a given input, or if a given output is obtained with minimum possible input. The problems of measuring efficiency in education, however, are considerable. There are several indicators used to measure the efficiency of the education system.

3.1. Indicators of Internal efficiency with Different Profiling Methods

The Internal Efficiency Rate (IER) is the ratio of number of students years that should be, ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$IER = \frac{\text{Students years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

I. Methodology of Calculation by Transverse Method

$$IER = \frac{(\text{Survival Rate (Transverse Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

$$IER = \frac{SR_{G8} * 8}{SR_{G1} + SR_{G2} + SR_{G3} + SR_{G4} + SR_{G5} + SR_{G6} + SR_{G7} + SR_{G8}}$$

SR_G1: Survival Rate for Grade1,

SR_G8 = Survival Rate for Grade8

II. Methodology of Calculation by Longitudinal Method

$$IER = \frac{(\text{SurvivalRate (LongitudinalMethod)for thefinalgrade}) * (\text{Duration(in years)of the educationlevel})}{\text{SUM of SurvivalRates (Survivors) Fromthefirst tothefinalgradeof the same educationlevel}}$$

III. Methodology of Calculation by Pseudo-Longitudinal Method

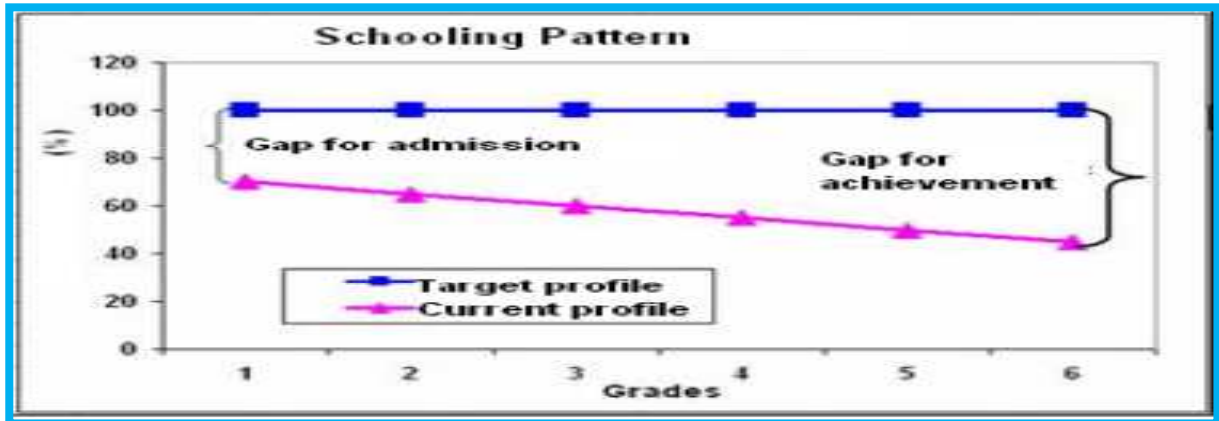

$$IER = \frac{(\text{SurvivalRate (Pseudo Longitudinal Method)for thefinalgrade}) * (\text{Duration(in years)of theeducationlevel})}{\text{SUM ofSurvivalRates(Survivors)Fromthefirst tothefinalgradeof the same education level}}$$

3.2. Interpretation of the Internal Efficiency Rate

It is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. Its complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

I. Schooling Profile/Enrolment Pattern

The schooling profile is, constituted of Age-Specific Enrolment Ratio for a given cycle of education system.

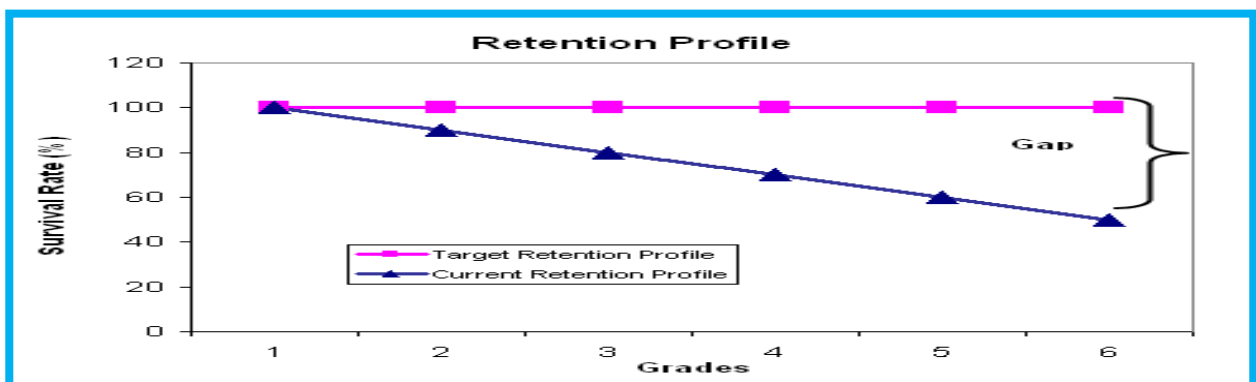

The schooling pattern interpreted us the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling

II. Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling;

Data required Enrolment and News entrants by grade at least for two years

3.3. Different Types of Schooling Profiles and Retention Profiles:

There are different types of schooling profiles, those are; Transverse method, longitudinal method and Pseudo-longitudinal method, and these schooling profile required data for calculation:

a) Transverse method

Data required for Transverse method are, new entrants by grade and population at official age corresponding to each grade.

b) Longitudinal Method

Data required for Longitudinal Method are, new entrants by grade for consecutive years of the total duration of education level (for instance, in Ethiopia, we need data for 8 consecutive years to implement this method) and also population at the official school entrance age, 8 years ago

c) Pseudo-longitudinal method

Data required for Pseudo-longitudinal method are new entrants by grade for two consecutive years and population at the official school entrance age.

3.4. Survival Rate (SR)

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

$$SR = \frac{\text{New entrants of the last grade}}{\text{New entrants of the first grade}} * 100$$

3.6. Internal Efficiency and Flow Rate

Promotion, Repetition and Dropout rates are the three paths of student flow from grade to grade and characterize the efficiency of the education system in producing graduates. These rates uses for evaluating, monitoring and projecting the efficiency of students flow in our education systems. As shown from above flow rate of 2002 E.C, the primary education system of Oromia can evaluated in terms of primary enrolment, repeaters and the readmitted students at every grade available.

Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade j for year T and enrolment in grade $j-1$ for year $T-1$. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

Repetition Rate (RR)

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studies in the same grade for the following year. Data required for this calculation is repeaters of grade **j**, in year **T** and enrolment of grade **j** of year **T-1**. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades.

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T-1} \times 100$$

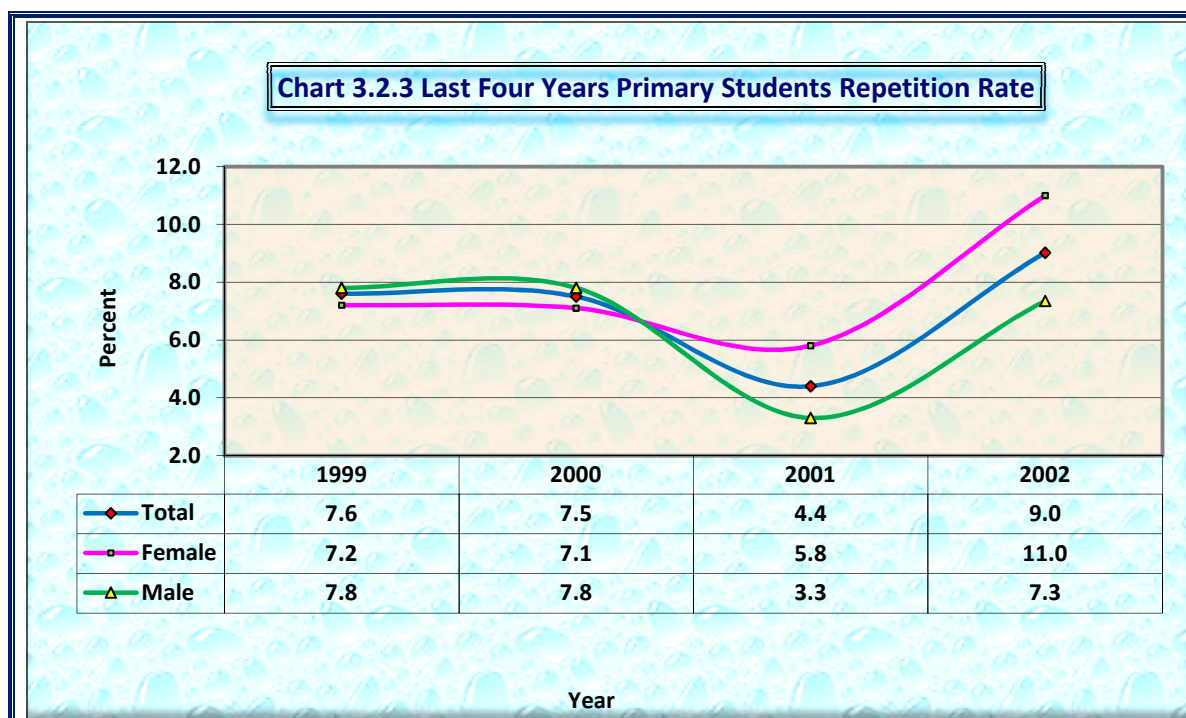

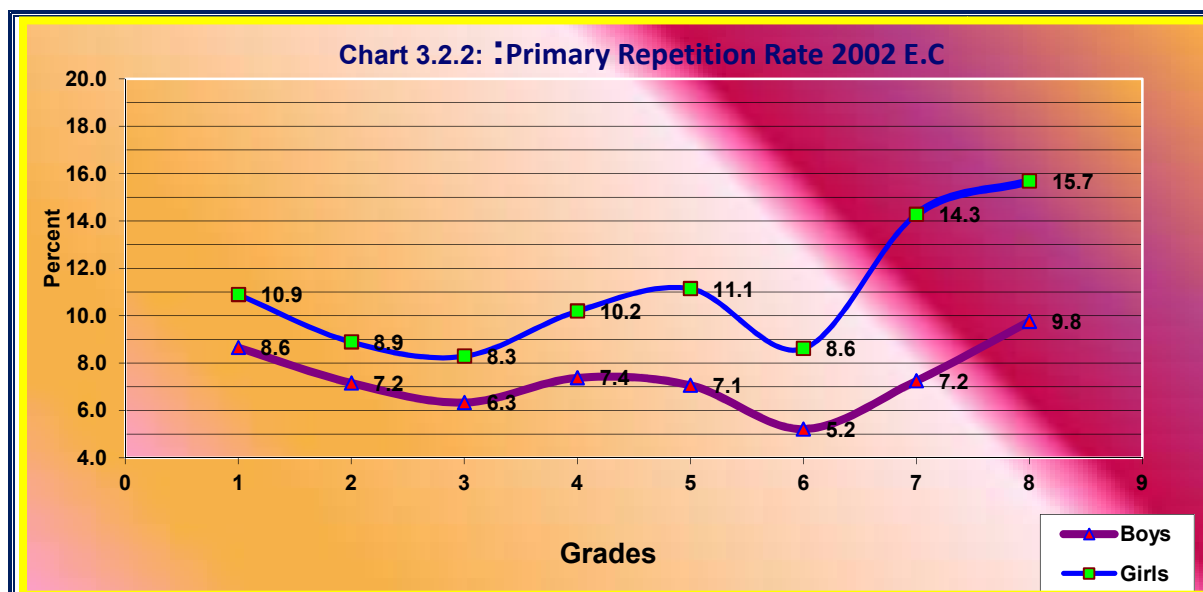

Table 3.2.1: Primary Students Repetition Rate By Zone, 2002 (2009/10)

Dropout Rates (DR)

Dropout Rates is proportion of pupils who withdraw from education system for more than one years. It corresponds to the difference between one and the sum of promotion rate and repetition rates. Data requires for the calculation is, Promotion Rate and Repetition rate. It is interpreted as a high dropout rate constitutes an obstacle in the achievement of UPE. The method to calculate is;

$$\text{Drop-out Rate} = (100 - \text{promotion rate} - \text{repetition rate})$$

Transition Rate (TR)

Transition Rate is new entrants to the first grade of the end of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous year respectively. Data required for calculating is new entrants in first grade of primary second cycle or first grade of secondary first cycle for a given Year T and Total Enrolment in final grade of primary first cycle or primary second cycle for Year (T-1). For example if we interpret TR of primary and secondary education, as Transition Rate of primary students to secondary is raised, correspondingly the proportion of pupils from the primary cycle who reach the secondary cycle also elevated up. Method of calculation for TR is the following;

$$\text{TR to 5}^{\text{th}} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{TR to 9}^{\text{th}} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

Transition Rate of Primary Education

As shown from chart 3.2.7, the transition rate of primary has no regular pattern as that of first cycle primary, it fluctuated up and down, started with 95% in 1997, and down to 81% in 1999, and then dropped down to 80.3% in 2002 E.C. This indicates that among students enrolled to grade eight in 2002 E.C, **80.3%** of them are joined grade 9th; whereas, **19.7%** did not persist their secondary education.

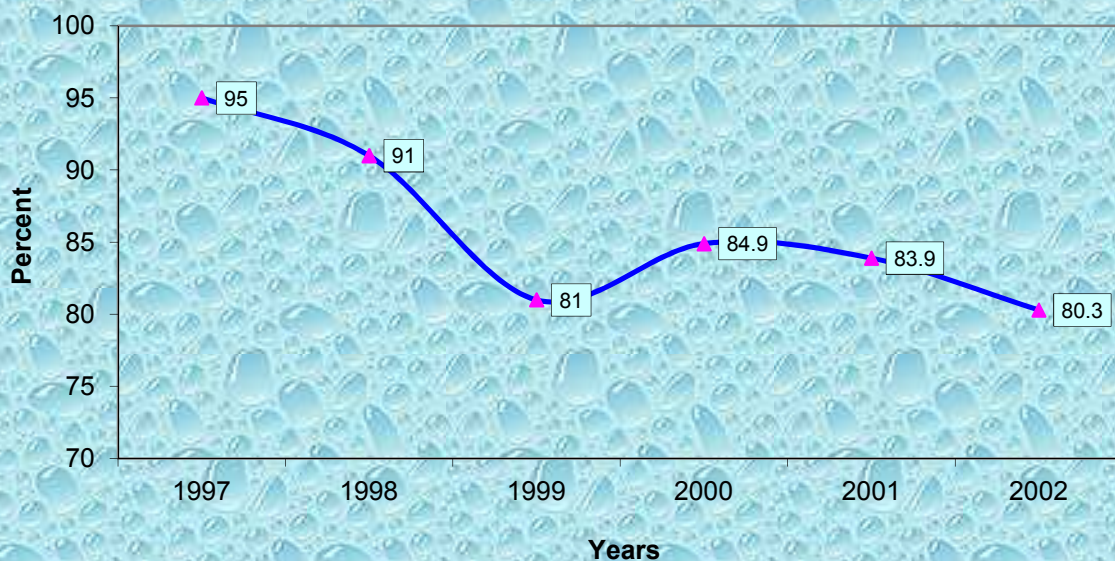

Table 3.2.7: Transition Rate of First Cycle Primary 2002 (2009/10)

| Gender | Enrolment Grade 4 th 2002 | Enrolment Grade 5 th 2003 | Repeaters Grade 5 th 2003 | Transition Rate 2002 |
|--------|--------------------------------------|--------------------------------------|--------------------------------------|----------------------|
| Boys | 336701 | 311383 | 21842 | 85.99 |
| Girls | 300651 | 266753 | 30009 | 78.74 |
| Total | 637352 | 578136 | 51851 | 82.57 |

Table 3.2.8: Transition Rate of Complete Primary 2002 (2009/10)

| Gender | Enrolment Grade 8 th 2002 | Enrolment Grade 9 th 2003 | Repeaters Grade 9 th 2003 | Transition Rate 2002 |
|--------|--------------------------------------|--------------------------------------|--------------------------------------|----------------------|
| Boys | 175739 | 178265 | 22843 | 88.4 |
| Girls | 132390 | 129464 | 37569 | 69.4 |
| Total | 308129 | 307729 | 60412 | 80.3 |

Chart 3.2.7: Transition Rate of Complete Primary for the Last Six Years

Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8, age 14 and for Grade 5 age 11), Table 3.2.8; shows the Completion Rates for both Grade 5th and Grade 8th. The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following method.

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population official age in last grade}}$$

Where “New entrant in last Grade”= total pupils in last Grade – repeaters in last Grade.

| ZONE | Grade 5th Completion Rate | | | Primary Completion Rate | | |

4. COHORT ANALYSIS

Cohort analysis is based on the three basic flow rates namely repetition, promotion and dropout rates, we evaluate the effectiveness of our education system. A number of assumptions made in order to interpret correctly the results of calculations of indicators of internal efficiency, in order to understand the limitations of the model. To perform cohort analysis it is imperative to have at hand indicators like survival rate by grade, indicators of the duration of the study, and indicator of the wastage. This cohort method allows us to predict future trends of the education system.

➤ Assumptions behind cohort analysis

1. Only cohort of 1000 pupils is considered and no re- entrants admitted. New entrants admitted at grade one only, and no in-migration or out- migrations.
2. It also assumes that no pupil skips a grade, i.e., there is no double promotion.
3. The same flow rates apply to all pupils enrolled in a given grade, regardless of whether a pupil has reached that grade directly or only after a number of repetitions. This assumption is sometimes, referred to as the assumption of homogeneous behavior.
4. Pupils in a grade are, allowed to repeat only twice. This is in line with existing policy. However, in reality, a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

4.1. Flow Rate of Primary Education in Cohort System

Table 4.1.2: Flow rate in Primary grades of 2002 E.C.

4.2, Internal Efficiency in Primary Grade 1-8 of the Cohort

➤ PUPILS YEAR BY GRADE

| Table 4.1.4: Pupils Year by Grade of Cohort | | | | | | | | |
|--|--------------|----------|----------|----------|----------|----------|----------|----------|
| Sex | Grade | | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 1094 | 816 | 708 | 636 | 576 | 482 | 455 | 426 |
| Girls | 1121 | 829 | 704 | 621 | 520 | 416 | 376 | 330 |
| Total | 1106 | 822 | 706 | 629 | 550 | 451 | 418 | 381 |

➤ INDICATORS OF RETENTION BY GRADE

a. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

| Table 4.1.5: Rates of Survival by Grade from the 2002 E.C, Cohort Method | | | | | | | | |
|---|--------------|----------|----------|----------|----------|----------|----------|----------|
| Sex | Grade | | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 75.83 | 66.47 | 59.10 | 53.72 | 46.05 | 42.48 | 38.92 | 35.97 |
| Girls | 75.67 | 64.75 | 56.12 | 46.72 | 38.80 | 33.00 | 28.81 | 22.22 |
| Total | 75.76 | 65.67 | 57.71 | 50.41 | 42.61 | 34.07 | 34.07 | 29.33 |

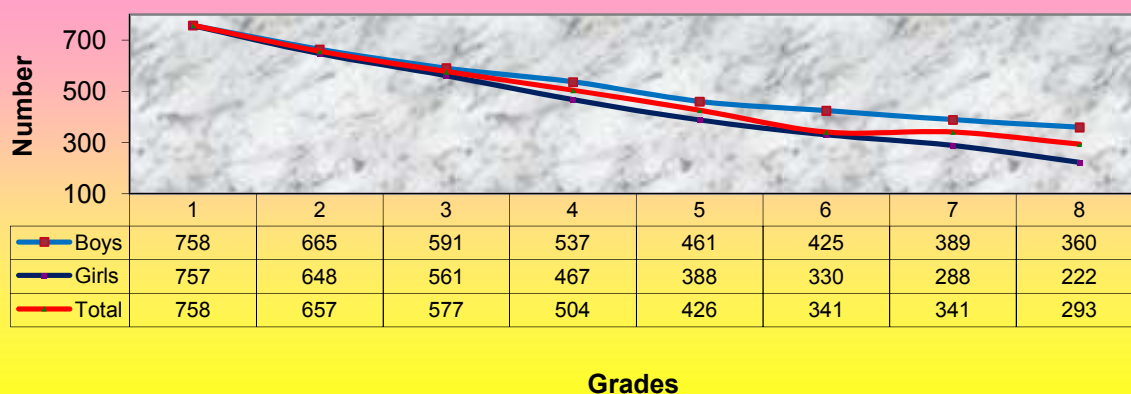

As the table 4.1.5, shows among 1000 students enrolled in grade 1, only 75.8% are survived in the cohort. The rest 24.2% left the school before completing grade 1. Only about 42.6% (Boys=46.1% and Girls= 38.8 %) students survived to complete first cycle primary.

From the 1000 pupils who started the cohort only 29.3% (Boys=36.0%, Girls= 22.2 %) will finally survived at grade 8th. This constitute 70.7% of students leave the system without completing primary education, so the issue needs serious attention from the concerned body and policy makers to fill this wide gap of educational wastage.

Table 4.1.6 :Number of Pupils Survived in Each Grade of the Cohort

| Sex | Grade | | | | | | | |
|--------------|-------|-----|-----|-----|-----|-----|-----|-----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 758 | 665 | 591 | 537 | 461 | 425 | 389 | 360 |
| Girls | 757 | 648 | 561 | 467 | 388 | 330 | 288 | 222 |
| Total | 758 | 657 | 577 | 504 | 426 | 341 | 341 | 293 |

Chart 4.1.1: Survival by Grade of the Cohort

b. Dropouts by Grade of the Cohort

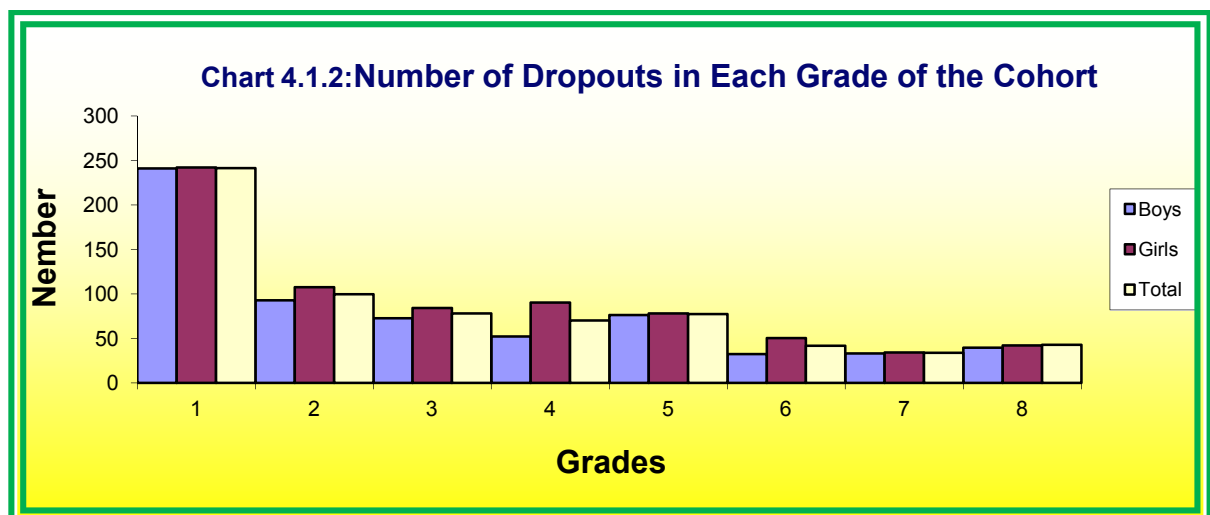

Dropout is the proportion of students who leave the system at each grade. Dropout is the most serious problem in education system. The cohort data on the table 4.1.8 shows, from the cohort of 1000 pupil 241 of them left the school before completing grade 1. Here we are interested in knowing the proportion of a cohort of pupils who leave the system at each successive grade. It expressed as a percentage of pupils enrolled in the first grade of a given cycle, it also gives the planners and someone who did research in education. Dropout problem has different impact on the system because

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers.
3. They have not acquired the minimal levels of literacy and numeracy.

| Table 4.1.7: Percentage of Dropouts by Grade of the Cohort | | | | | | | | |
|--|-------|-------|------|------|------|------|------|------|
| Sex | Grade | | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 24.11 | 9.27 | 7.25 | 5.19 | 7.62 | 3.22 | 3.28 | 3.94 |
| Girls | 24.20 | 10.75 | 8.40 | 9.00 | 7.79 | 5.02 | 3.39 | 4.20 |
| Total | 24.15 | 9.96 | 7.80 | 7.02 | 7.73 | 4.15 | 3.35 | 4.27 |

Most of the students leave the system early in grade 1 and 2. About 24.2% of the cohort leaves the system before completing grade 1. The great majority of children leave at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to the issue.

| Table 4.1.8: Number of Dropout by Grade of the Cohort | | | | | | | | |
|---|-------|-----|----|----|----|----|----|----|
| Sex | Grade | | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 241 | 93 | 72 | 52 | 76 | 32 | 33 | 39 |
| Girls | 242 | 107 | 84 | 90 | 78 | 50 | 34 | 42 |
| Total | 241 | 100 | 78 | 70 | 77 | 41 | 34 | 43 |

c. Repeaters by Grade

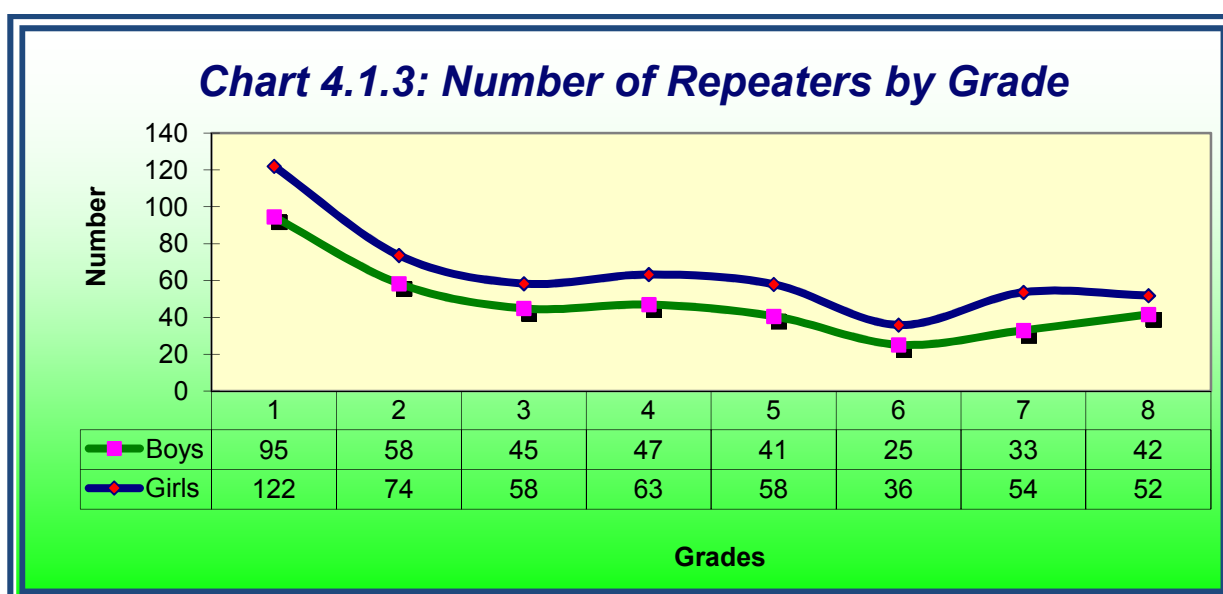

The cohort data on the Table 4.1.9 shows that, from the cohort of 1000 pupils 107 of them repeated grade 1. This problem of repeating has impact on the system because.

1. Repeating has wasted the resources they have used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers.

Table 4.1.9: Repeaters by Grade of the Cohort

| Sex | Grade | | | | | | | |
|-------|-------|----|----|----|----|----|----|----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 95 | 58 | 45 | 47 | 41 | 25 | 33 | 42 |
| Girls | 122 | 74 | 58 | 63 | 58 | 36 | 54 | 52 |
| Total | 107 | 66 | 51 | 55 | 49 | 31 | 43 | 47 |

Chart 4.1.3: Number of Repeaters by Grade

As the Table below shows, 10.7 % of the cohort repeats in grade 1. The majority of children repeat in the early grades, compared to repeaters at the upper grades

Table 4.1.10: Percentage of Repeaters by Grade of the Cohort

| Sex | Grade | | | | | | | |
|-------|-------|-----|-----|-----|-----|-----|-----|-----|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Boys | 9.5 | 5.8 | 4.5 | 4.7 | 4.1 | 2.5 | 3.3 | 4.2 |
| Girls | 12.2 | 7.4 | 5.8 | 6.3 | 5.8 | 3.6 | 5.4 | 5.2 |
| Total | 10.7 | 6.6 | 5.1 | 5.5 | 4.9 | 3.1 | 4.3 | 4.7 |

d. Number of Graduates from the Final year

Graduates from the Final year is, the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete first cycle primary of 4 years of study and promoted to the first grade of second cycle primary (Grade 5). Otherwise, those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort, out of **1000** pupils registered in 2002 in grade one, **358** pupils will graduate grade 4 without repeating any grade during their stay in school in 2005 E.C. Another **120** pupils will graduate grade 4 after repeating once and **25** others graduated after repeating twice in any of the grades. Total number of graduates of first cycle primary for this cohort is 503.

Similarly **146** pupils will graduate grade 8 by 2008 without repeating, **105** pupils will also graduate grade 8 by 2009 by repeating once, and **43** pupils will graduate grade 8 by 2010 by repeating any of the grade twice. Therefore, in primary schools of Oromia, the possible number of pupil graduates from the complete primary system or grade 8 is only **294**. In other words, only about **29.4%** of the pupils who started the cohort of 8 years will be able to complete 8 years of education, whereas, **706(70.6%)** pupils were not successful in completing primary education in the cohort flow system. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

| Table 4.1.11: Number of Graduates from the Final Year | | |
|---|-------|-------|
| Boys | Girls | Total |
| 360 | 222 | 294 |

e. Retention, Dropout & Graduates By Years of Study Spent In the Cohort by Grade

| Table 4.1.12 :Enrolment by Year of Study | | | |
