Forward.....	1
Introduction.....	2
Executive Summary.....	3
CHAPTER ONE	14
Pre-Primary Education	14
1.1.Overview of Pre-Primary Education	14
1.2. Pre-Primary Institutions.....	14
CHAPTER TWO	25
Primary Education	25
2.1. Equitable Access in Primary Education	25
2.1.1. Number of Primary Schools	25
2.1.2. Primary Education Enrolment	34
2.1.3. Primary Education Enrolment Rates.....	57
2.1.4. Primary Gender Equity for the Last Five Years.....	79
2.1.5. Quality Indicators in Primary Education	82
2.1.6. Primary Schools Principals, Vice Principals and CRC Supervisors.....	89
2.1.7. Primary Schools Facilities.....	103
2.6.1. General Education Inspection.....	116
2.7.1. Primary Education Internal Efficiency	119
CHAPTER THREE	151
Secondary Education	151
3.1. Equitable Access in Secondary Education.....	151
3.1.1. Number of Secondary Schools	151
3.1.2. Student Enrolment in Secondary Schools	156
3.1.3. Secondary Education Enrolment Rates.....	166
3.2. Quality Indicators of Secondary Education	181
3.2.1 Different Ratios in Secondary Education.....	196
3.2.1. Secondary Schools Facilities.....	203
3.2.2. Secondary Schools (Grade 9-12) Inspection	216
3.3. Internal Efficiency in Secondary Education	218
3.3.1. Secondary Education Dropout and Repetition Rates.....	218
CHAPTER FOUR	222
Non-Formal Education	222
4.1. Alternative Basic Education /ABE/	222
4.1.1. Alternative Basic Education /ABE/ Institutions	222
4.1.2. Alternative Basic Education /ABE/ Enrolment	224
4.1.3. Alternative Basic Education Facilitator	227
4.2. Integrated Functional Adult Education /IFAE/ Program	229
CHAPTER FIVE	233
Tertiary Education	233
5.1. Colleges of Teachers' Education	233
5.1.1. Number of Colleges of Teachers' Education	233
5.1.2. Enrolment in Diploma Program	233
5.1.3. Oromia CTEs Graduates in Diploma Program.....	239

5.2. 'CTE's Academic and Technical Staff by Education Level241
5.2.1. Full-time 'CTE's Academic Staff by Education Level..... 241
5.2.2. CTEs Administrative Staff by Education Level.....246
CHAPTER SIX..... 243
Different Indicators by Woredas 243

Forward

Education is the process of facilitating the acquisition of knowledge, skills, values, beliefs, and habits. To ensure this, Oromia Education Bureau has been working to create conducive teaching-learning environment for the provision of quality and relevant education for citizens in the region.

To evaluate whether the education activities are going on the right track or not, education data must be collected, compiled, analyzed and finally delivered to stockholders. Accordingly, in this Education Statistics Annual Abstract the articulated information in all education levels i.e, from pre-primary to College of Teachers Education (CTE) relevant data has compiled. The charts, graphs, tables and narrations in this publication present a relevant and accurate picture of our progress in an annual basis.

This publication is prepared in the condition where the COVID-19 pandemic created the largest disruption on education systems at global level and in the region too. The education data have collected from every education institutions in the region before their closure due to the pandemic. Meanwhile, the regional EMIS team has been dedicated to compile, analyze, and organize the collected education data so as to prepare this Education Statistics Annual Abstract.

The document is expected to meet the need of decision makers, planners, policy makers, researchers, development partners and other educational stakeholders by providing education data and information in our region. I would like to welcome all education stakeholders and partners to utilize the data and information in of this publication in your endeavors to improve the delivery of quality education in the region. Furthermore; this education statistics annual abstract gives directions to education practitioners to resolve various challenges of education in the region, particularly in improving the access, equity, quality and efficiency of education.

Tolla Berisad Geda (PhD)
Oromia Education Bureau
Head

Introduction

Oromia National Regional State Government Education Bureau has been preparing Education Statistics Annual Abstract every year that helps for improving and creating conducive work environment as well as to plan and monitor the provision of quality and relevant education for citizens. As it is well known, we had been launched the preliminary quick education abstract containing basic data for the instant utilization until this annual abstract comes to be active. Accordingly, starting from the beginning of this year up to now educational data of the year have been collected from education institutions, encoded at district level and verified at Zonal level then finally verified at Regional level.

This publication has been prepared by Oromia Education Bureau Educational Management Information System (EMIS) team, edited and commented by regional education experts with the significant support and cooperation of the thousands of educationalists who participated in filling the questionnaires, encoding the data to the StatEduc database at Woreda and Administrative towns level and finally submitted to zone education office. The data was collected based on standardized questionnaires designed for pre-primary Kindergarten (KG), Alternative Basic Education, Primary education, Secondary education and Integrated Functional Adult Literacy program. This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education of our region in detail manner. The data are further disaggregated by the level of education, gender, ownership and localities in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and having educational information for decision makers, policy makers, planners and also used as reference for researchers as well.

Finally, EMIS team would like to thank all of our staffs who were involved in data collection, data encoding and data verification of this document at school, District, administration town administration and zonal administration level; because, it wasn't be possible without the substantial contributions of them. A special note of thanks is also reserved for all experts of our bureau in general, including our directorate for their cooperative effort on the realization of this publication.

Executive Summary

The Regional Education Bureau gathers, compiles, analyses and disseminates educational information in annual bases that covers all education subsectors such as, Pre-primary, Primary, Secondary, Non-formal Education and College of Teachers' Education/CTE. In the same phenomenon almost all educational data has been collected from all institutions and then compiled and analyzed in this document is summered as follows.

I. Data Gathering Process

The process of educational data collection, compilation, organization, analysis and delivery has started by customizing and up-dating the annual data collection tools/questionnaires at national level. Following that, the tools have been translated in to Afan Oromo and then printed out and disseminated to all education institutions in the Region. The Annual School Census (ASC) of 2012, (2019/20 G.C) has covered 1,943 Kindergarten schools, 1,729 Alternative Basic Education centers, 14,937 Primary, 1,278 Secondary and 14,081 Integrated Functional Adult Literacy program centers. These institutions are distributed in 19 Administrative Towns and 317 districts. Finally, after the dissemination of the tools, the remaining educational data gathering processes have passed through the following procedures.

- The Regional EMIS team has conducted Training of Trainers (ToT) at Regional level for all district education office (DEO), Zonal/Administrative town education offices (ZEO) statistician on how to train the respective practitioners to fill the annual census questionnaires properly and the ToT trainees also conducted training for their respective supervisors and school directors at Cluster Resource Center (CRC) and district/administrative towns level.
- Workshop and training on the Annual School Census (ASC) questionnaires at District and Administrative town level for CRC supervisors and school principals has been given to create awareness on how to fill the questionnaires. With the acquired awareness; questionnaires were filled by school principals within 7 days at school level. Finally, verification and approval of the filled census questionnaires have taken place by respective supervisors at CRC level and statisticians at district education office level respectively.
- Supervisors, DEO/ATEO and ZEO statisticians were overseeing the filling, retrieval and authentication of filled questionnaires by the school directors.

- After the filled questionnaires have been collected from schools, the process of encoding data has been taken place at District and Administrative town's level for 15-30 days, depending on the number and size of institutions in each District and Administrative towns.
- Subsequently checking, verification, retrieval of authenticated questionnaires and settling conditions for data entry have under taken by the Zonal and Regional EMIS experts.

II. Data Validation and Verification

Data entry has been done by District and Administrative Town statisticians at DEO/ATEO level under the supervision of the EMIS technical team at zonal level. This could have been done using the enabling tool called StatEduc software that operating on a local area network. Right after the compellation of data entry District and Administrative Town statisticians have brought the data base to ZEO for verification. The data verifiers were checking the error within encoded data and also clear with different verification techniques. After the verified data at ZEO level, all the data bases were collected and merged at regional level to have regional aggregated data. The last process was data verification & refining if the data at regional level by Zonal statisticians under the supervision of regional EMIS team, to clear errors and confirming the quality of the data.

III. Document Preparation

After the Regional EMIS team carried out the final validation and verification stage, the draft preliminary quick education abstract had been prepared and then distributed for OEB directorates and core teams for time being utilization of the data and for further validation purpose. After the comments were incorporated, the preparation of Education Statistics Annual Abstract of the year 2012 (2019/20 G.C) has started by the team. After the preparation of the document by the team, the document has been thoroughly edited by OEB skillful and experienced experts so as to finalize it and finally this resourceful and comprehensive Regional Education Statistics Annual Abstract has come to appear.

In this executive summary the five years trend of education data and the summary of key indicators at regional level are presented.

1. Equitable Access Trend In The Last Five Years

I. Number of Institutions

The accessibility of education institutions is the most criteria for children to get access to education. As indicated on Table 1.1 below, the number of institutions of some subsectors has been increasing mostly in Kindergartens, O-classes and primary schools with Average Annual Growth Rate (AAGR) of 3.56%, 4.14% and 1.53% respectively. But the AAGR of ABE centers and secondary schools was negative because the number of institutions was less in the final year than the baseline. The assumption upgrading of ABE centers to regular schools and the merging of preparatory schools to secondary schools in the year 2012 (2019/20 G.C.) were assumed to be happened. However, the reasons have to be identified through research whether those ABE centers were upgraded to regular schools or closed by other reasons and why the number of secondary schools has reduced.

Five Years Trend of Number of Institutions, 2008-2012 (2015/65-2019/20 G.C)						
Institutions	Years					AAGR
	2008	2009	2010	2011	2012	
Kindergartens	1631	1657	1726	1819	1943	3.56%
"O-class"	11180	11216	10729	11362	13693	4.14%

II. Five Years Trend of Enrolment

Enrolment has been increased in some subsectors for those have shown increment in institution for the last five years. As shown in table 1.2 below, the enrolment of students in Kindergarten, primary and secondary schools have been increasing with the AAGR of 8.86%, 1.61% and 11.04% respectively.

Number of students Enrolled in the last five years, 2008-2012 (2015/16-2019/20 G.C.

Sector	Subsector	Sex	Years					AAGR
			2008	2009	2010	2011	2012

III. Five Years Trend of Access Rates

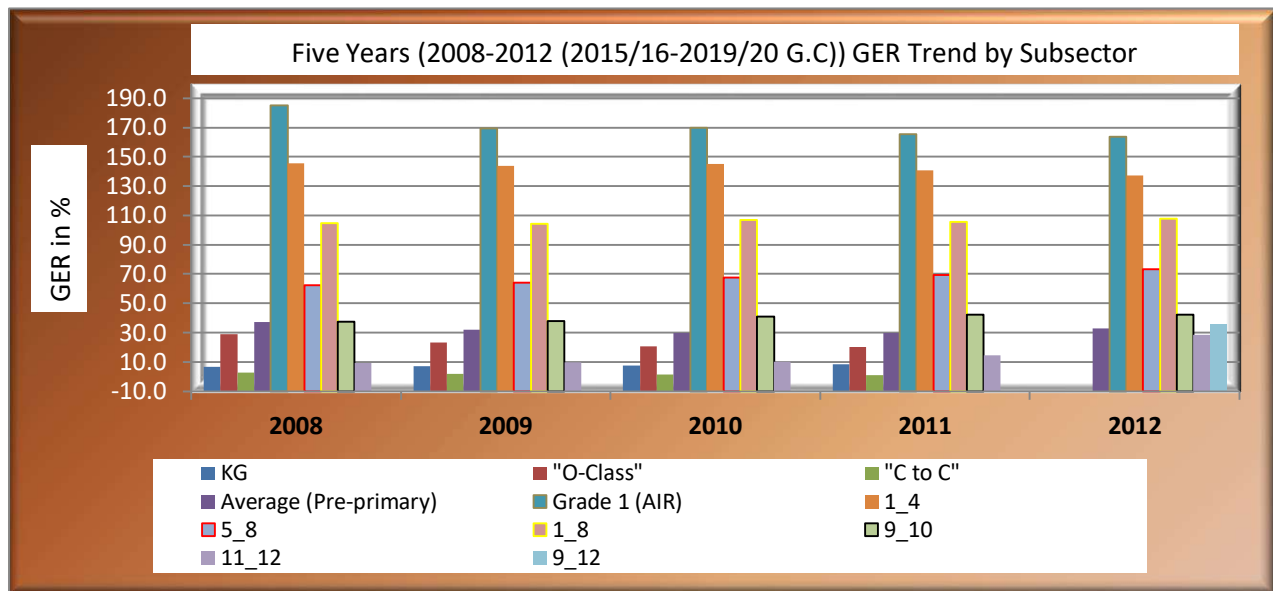

A. Gross Enrolment Rates (AIR/GER)

The GER trained of AAGR of all level other than the preprimary and grade 1-4 have been increased within past years. The same way, the GER of upper primary grade 5-8 and secondary 11-12 were 16.17% and 20.60% respectively, the data indicates it's higher than others.

On the other hand, grade one AIR exceeds 100% by implication it means, most of the children joined the system at early or late of official schooling age. The same way, grade 1-4 regional average GER was 145.5% by 2008 (2015/16 G.C) and then decreased to 137.2% by 2012 (2019/20 G.C.) the dropping rate shows improvement even though the 100% exceeding GER data indicates the presence of over and Under aged children in the system.

Regarding to grade 5-8 GER, it's 62.5% in 2008 (2015/16 G.C) and increased to 73.0% in 2012 (2019/20 G.C.) by showing slight increments within five years interval. The GER of grade 1-8 has also increased from 104.9% in 2008 (2015/16 G.C) to 107.6% in 2012 (2019/20 G.C.).

Gross Enrolment Rates of the last five years, 2008-2012 (2015/16-2019/20 G.C)							
Sector	Subsector	2008	2009	2010	2011	2012	AAGR
Pre-primary	KG	6.6	6.9	7.6	8.5		
	"O-Class"	28.8	23.2	20.7	20.2		
	"C to C"	2.8	2.0	1.4	1.0		
	Average (Pre-primary)	37.20	32.1	29.7	29.6	32.8	-2.51%
Primary	Grade 1 (AIR/NIR)	185.1	169.5	170.0	165.4	163.9	-2.44%
	1_4	145.5	143.6	145.2	140.9	137.2	-1.17%
	5_8	62.5	63.9	67.6	69.4	140.4	16.17%
	1_8	104.9	104.4	106.8	105.8	107.6	0.50%
Secondary	9_10	37.5	38.1	41.00	42.41	42.1	2.28%
	11_12	9.2	9.8	9.97	14.48	28.6	22.60%
	9_12					35.6	

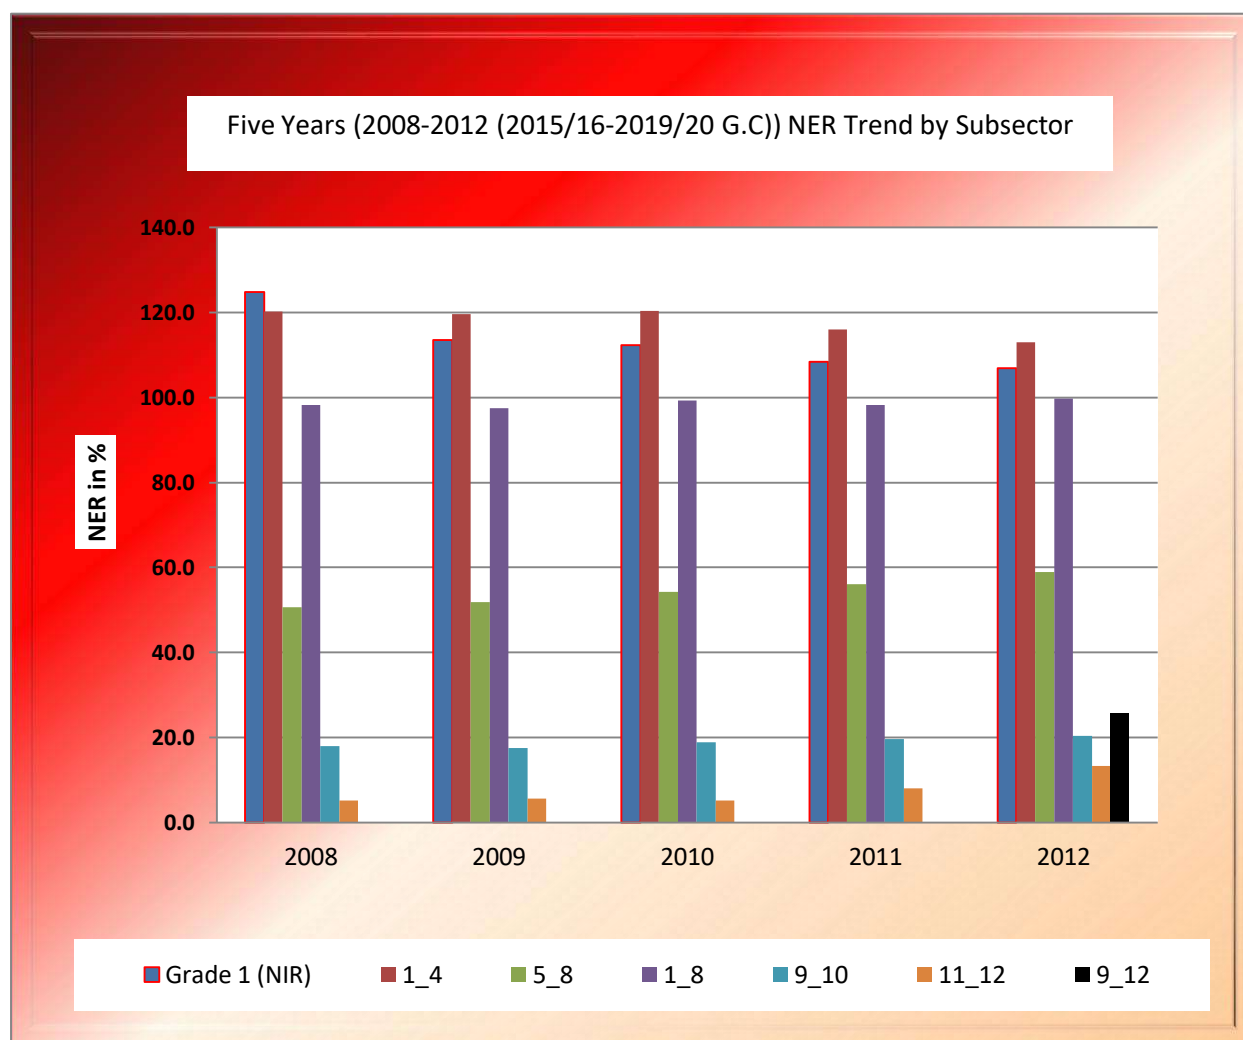

B. Net Enrolment Rates (NER)

As can be seen from graph 1.4, grade 1 Net Intake Rate(NIR) was improved from 124.8% in 2008 (2015/16 G.C) to 107.0% in 2012 (2019/20 G.C.), it tells that, the number of children enrolled in grade one at official school age(age 7) exceeds the number of school age population expected enrolling at grade one. The same way, as shown from table 1.4, the NER of grade 1-4 is 120.2% in 2008 (2015/16 G.C) and 113.0% in 2012 (2019/20 G.C.) which is abnormal, because the NER never exceed more than 100%.

Regarding to grade 5-8 the NER in 2008 (2015/16 G.C) was 50.7% and then improved to 58.9% in 2012 (2019/20 G.C.) the same way, the trained of grade 1-8 NER moved a little bit up from 98.2% to 99.8% by 2008 (2015/16 G.C) and 2012 (2019/20 G.C.).On other hand, the five years trained of secondary education NER showed slight improvement from(17.9%,5.2%) in 2008 (2015/16 G.C) to (20.4%,13.3%) in 2012 (2019/20 G.C.) for grade 9-10 and 11-12 respectively.

Net Enrolment Rates of the last five years, 2008-2012 (2015/16-2019/20 G.C)

Sector	Subsector	2008	2009	2010	2011	2012

CHAPTER ONE

Pre-Primary Education

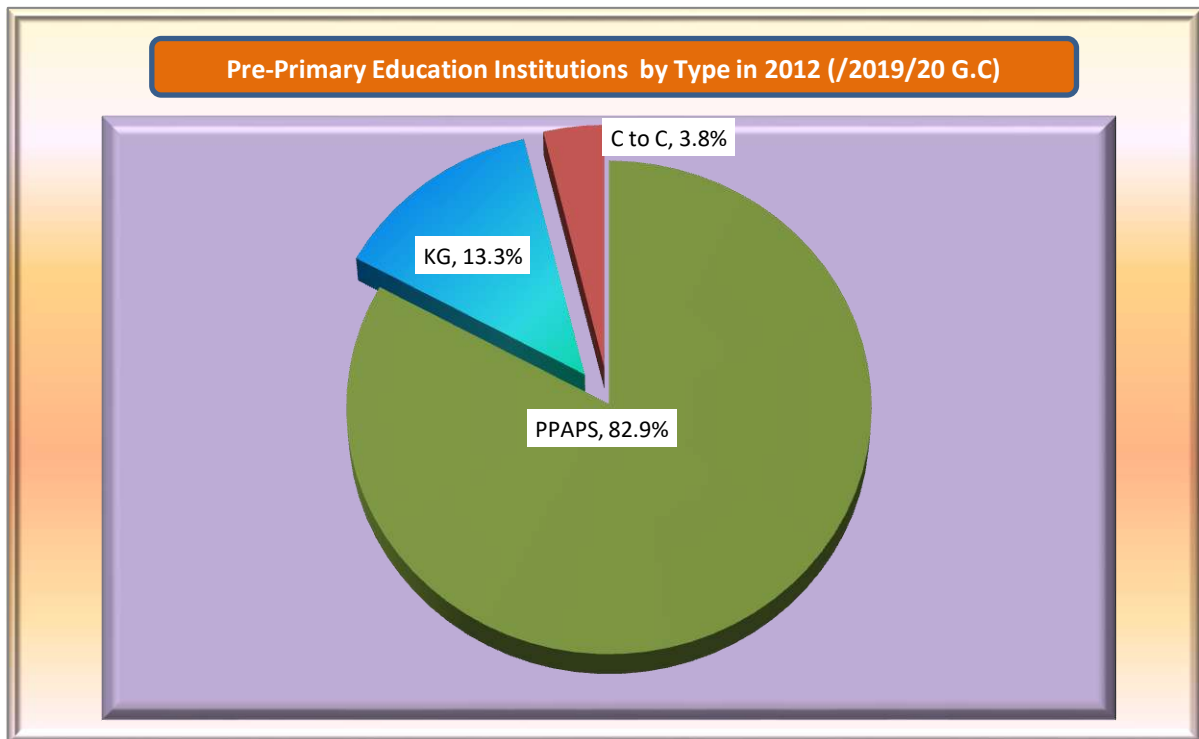

1.1. Overview of Pre-Primary Education

Education which is delivered for children of four to six years old before they enter formal schools is called pre-primary education. Pre-primary education in Ethiopia includes kindergartens, O-class and child to child programs. Kindergartens are predominantly operated by communities and non-governmental organizations such as faith-based and private institutions mostly in urban area. Government has been involving in pre-primary attached to primary schools O-class and child to child programs to address vulnerable and disadvantaged rural children of the level. Research findings reveal that as a result of pre-primary education delivery it is possible to insure the formation of children's identity, prepare children for future stages of their development reduce misbehaving and crime in childhood and adulthood. To improve education achievements as well as to protect drop-out of formal education especially in lower grades. In general it is to prepare children physically, emotionally, socially and mentally for formal schooling and to prevent poor performances and early dropouts. The status of pre-primary education in the region is stated as follows.

1.2. Pre-Primary Institutions

Pre-primary education in the region has been delivered in kindergartens, Pre-primary attached to Primary Schools /PPAPS /O-class and child to child centers. The number of the former two institutions has increasing while the number of the latter institutions had decreased when compared with that of 2011 (2018/19.G.C). Accordingly, the number of KGs and O-Classes has increased from 1,819 to 1,943 and 11,362 to 11,963 respectively; whereas the number of Child to Child centers has decreased from 521 to 458. So that in the year 2012 (2019/2020 G.C) there were 14,094 (1943 KG, 11963 PPAPS and 458 C to C) pre-primary institutions in the region those responded to the ASC. Chart 1.2.1 below shows the percentage of pre- primary delivery institutions in 2012 (2019/2020 G.C) that the majority of them (82.9%) were pre-primary attached to primary schools (PPAPS) followed by KG (13.3%) and then Child to Child centers (3.8%).

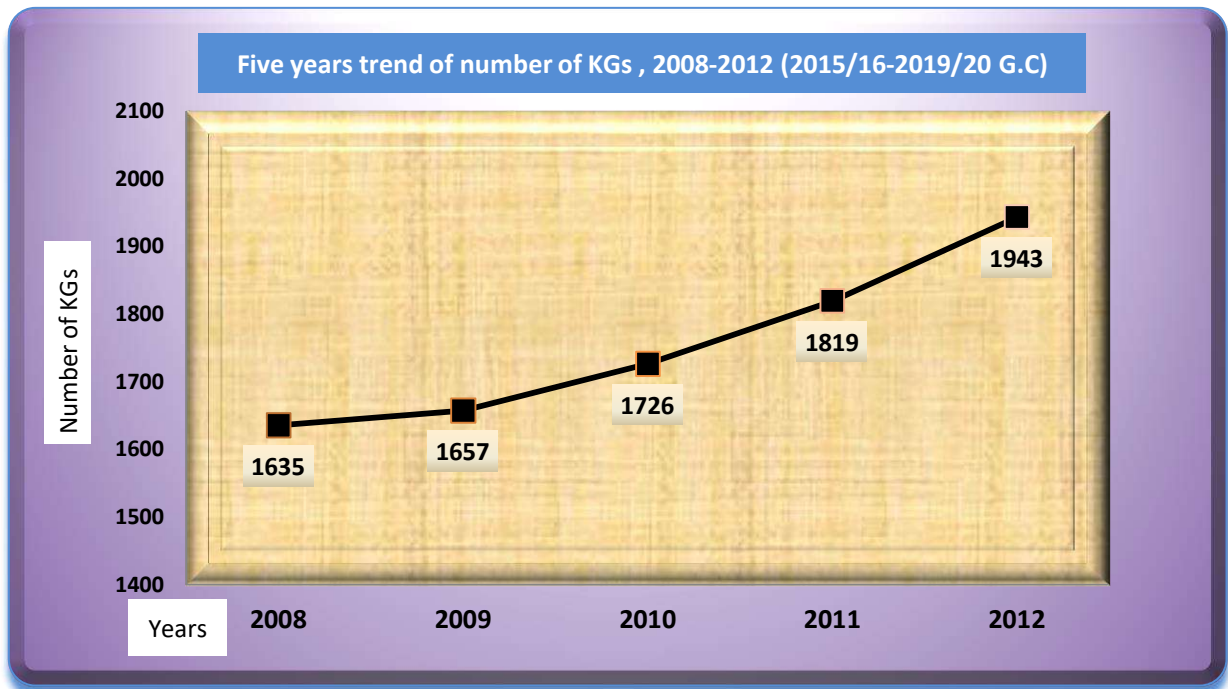

CHART 1.2.1 PRE-PRIMARY EDUCATION INSTITUTIONS

Since the development of the Early Child-Care Development (ECCD) curriculum was introduced, there is a direction that all Government primary schools have to conduct the PPAPS program. Based on the National Policy for ECCD, Oromia Education Bureau has been put in to practice since 2002 children of age 6 who do not have access to kindergarten by annexing it to public primary schools especially in rural areas for one year. That is why most of primary schools in the region 78.3% were involved in the implementation of program as annexes. But still 21.7% of primary schools were not implementing the program in 2012 (2019/2020 G.C) for their own reason that needs due attention by the concerned body to benefit children of this age.

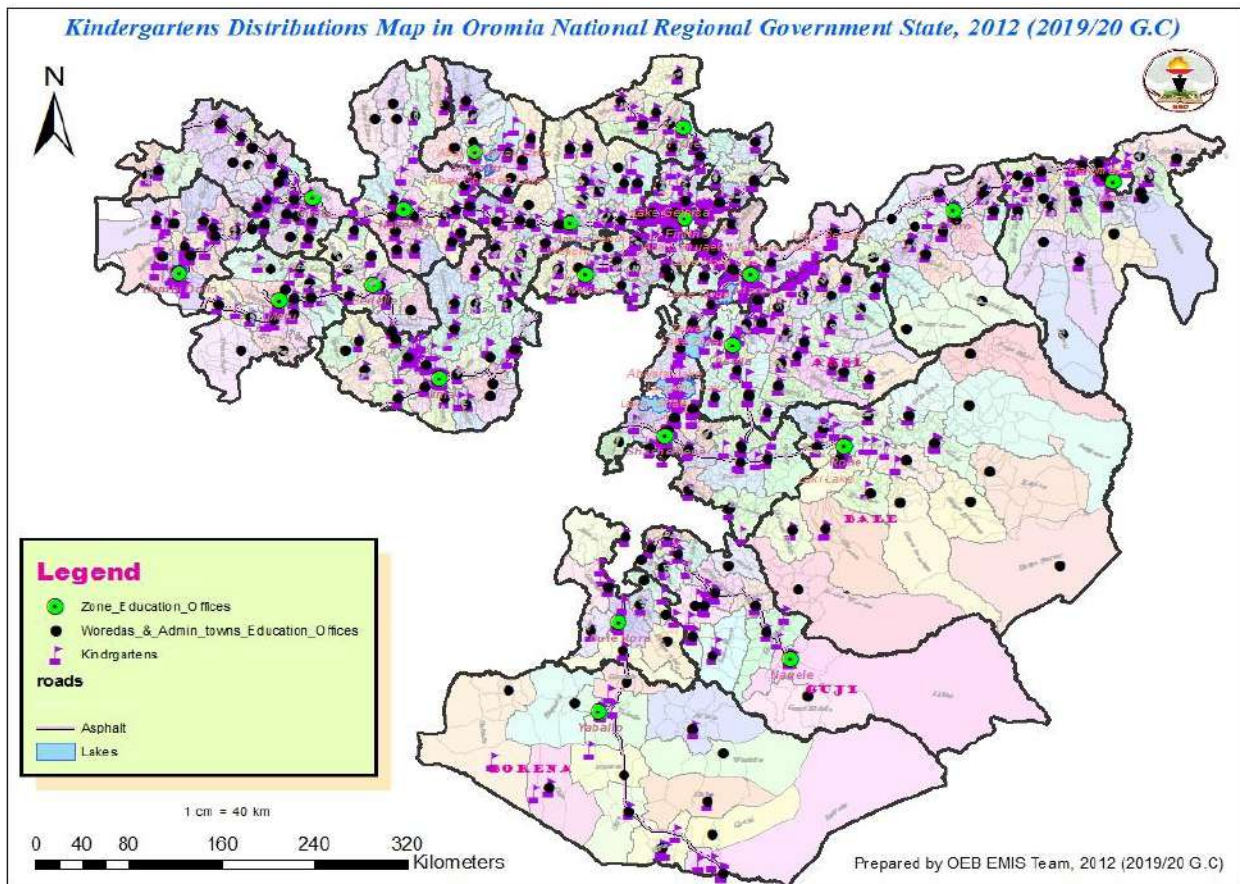

The other modality to benefit children of age 4-6 is engaging them in Kindergartens. The number of these institutions has shown increment from year to year. Accordingly, there were 1,635 KGs in 2008 (2015/16 G.C) and increased to 1,943 in 2012 (2019/2020 G.C). Graph 1.2.1 below also shows five years trend of number of KGs in the region.

GRAPH 1.2.1 TREND OF NUMBER OF KINDERGARTENS

Regarding distribution, most of KGs are concentrated in urban areas of the region mainly owned by private and non-governmental organizations. Map 1.2.1 below shows that the distribution of KGs those their location data have collected since 2012 (2019/20G.C). As can be seen on the map most of KGs in the Region are located in urban areas and along the main roads. As observed from the distribution map; all zones and administrative towns in general and Zones like BunoBedelle, HoroGuduruWollega, Ilu Aba Bora, Borena, West Guji, East Wollega, Bale, South West Shoa, West Hararge and North Shoa zones need due attention in increasing access of kindergarten schools in all unreached woredas.

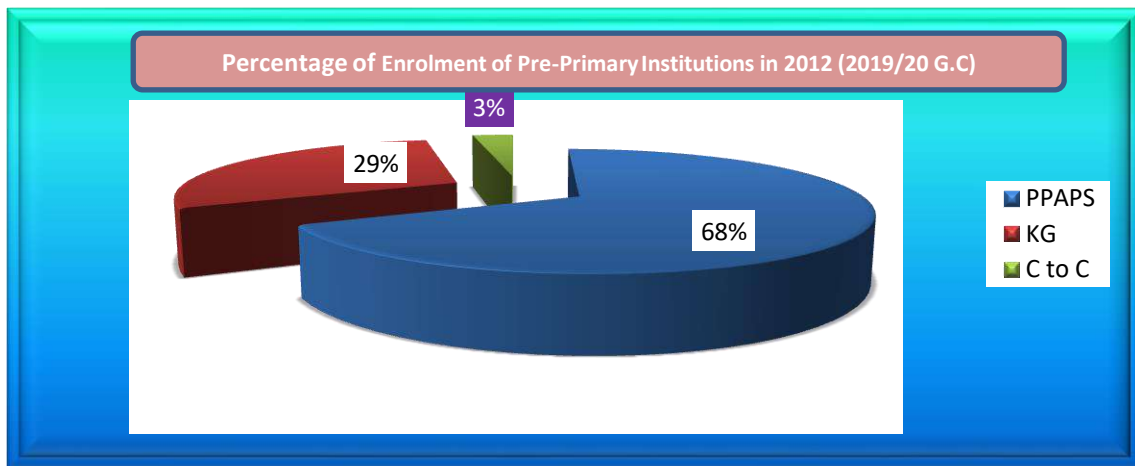

MAP 1.2.1 KINDERGARTEN SCHOOLS LOCATION MAP AT REGIONAL LEVEL

1.3. Enrolment in Pre-Primary Education

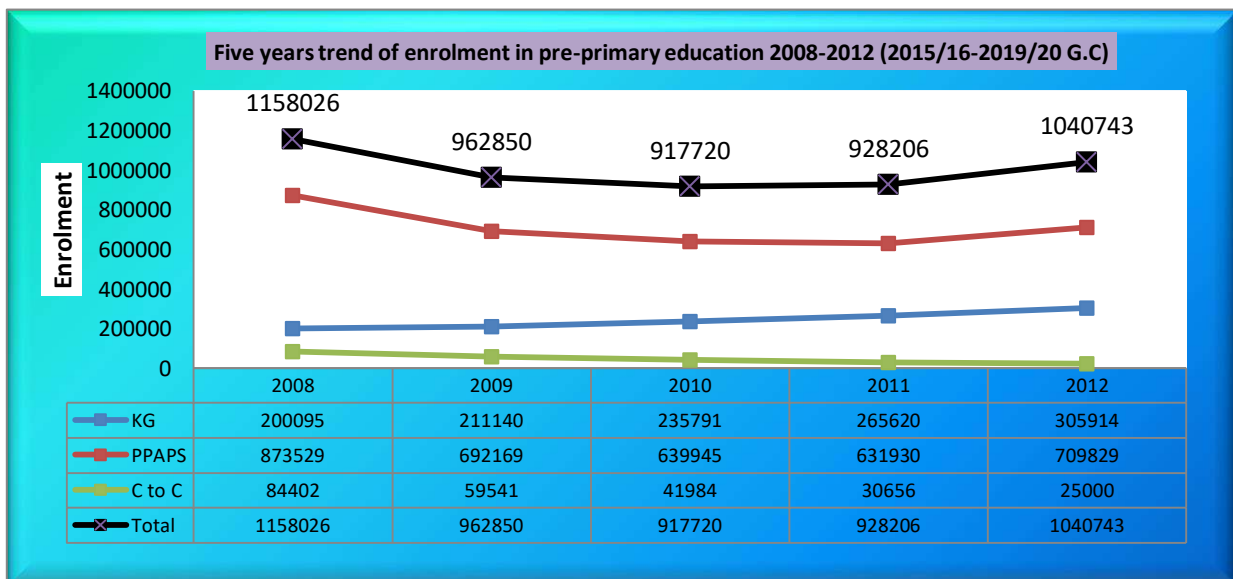

The total number of enrolments of pre-primary education in 2012 was 1,040,743 (M=550,496 and F=490,247) that the share of boys accounts 52.9% of total enrolment. On the other hand, among the three modalities of pre-primary education, large number of children has been enrolled in PPAPS. Chart 1.3.1 below shows that the share of PPAPS enrolment reached 709, 829 (68.1%) followed by KG which was 265,620 (29%) and the enrolment share of C to C centers shows 25,000 (3%).

CHART 1.3.1 ENROLMENT OF PRE-PRIMARY INSTITUTIONS

Concerning five years trend of enrolment of preprimary education, the number of KG and PPAPS enrolments has been increasing while C to C had decreased from year to year. Graph 1.3.1 below shows five years 2008-2012 (2015/16-2019/20 G.C) trend of enrolment of pre-primary education

GRAPH 1.3.1 TREND OF ENROLMENT OF PRE-PRIMARY EDUCATION

Even though, the overall number of children enrolled in pre-primary education has been increasing from year to year, number of children enrolled in C to C program has been decreasing. At the same time the GER of this subsector has not getting improved as compared to the large population of pre-primary school age children. Table 1.3.1 below shows the distribution of pre-primary institutions, the SAP of pre-primary education, number of enrolled children of pre-primary education in the year 2012 (2019/20 G.C).

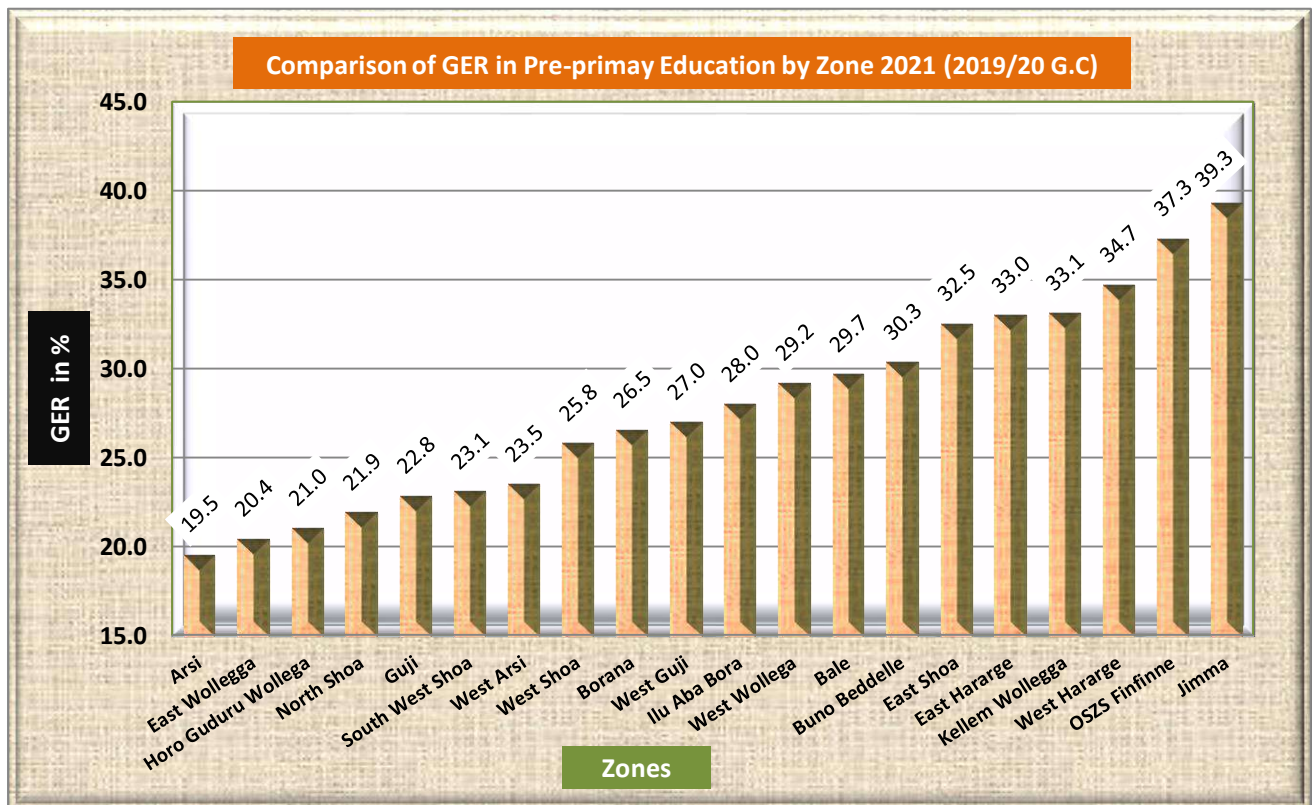

TABLE 1.3.1 NUMBER OF PRE-PRIMARY INSTITUTIONS, SAP AND ENROLMENT

1.4. Gross Enrolment Rates in Pre-primary Education

Gross Enrolment Rate (GER) of pre-primary education is defined as the percentage of total number of children in the level irrespective of age out of the total population of 4-6 age children in the region or in a given zone. The Gross Enrolment Rate (GER) for Kindergarten (KG) and Pre-Primary Attached to Primary Schools (PPAPS) had been increased from 8.5%, 20.2% in 2011 (2018/19 G.C) to 9.6% and 22.4% in 2012 (2019/20 G.C) respectively. But the GER for Child to Child program has decreased from 1.0 to 0.8%. The average GER of preprimary education at regional level in the year have reached 32.8% (M= 34.3%, F= 31.3%). As indicated in graph 1.4.1 below the pre-primary GER is different from zone to zone. The majority of zones in the region have lower pre-primary GER and the most three are Arsi, East Wollega and HorroGuduruWollega by having 19.5%, 20.4% and 21.0% respectively. On the other hand, five Zones (East Hararge, KellemWollega, West Hararge, Oromia special Zone surrounding Finfinne (OSZSF) and Jima) have pre-primary GER greater than the regional average by having 33.0%, 33.1%, 34.7%, 37.3% and 39.3% respectively.

GRAPH 1.4.1 ZONAL COMPARISON OF PRE-PRIMARY EDUCATION GER

Regarding Administrative towns all of them have pre-primary GER greater than the regional average. As indicated in graph 1.4.2 below except BishanGuracha 18 Administrative towns in the region have

pre-primary GER greater than 100%. Especially the pre-primary GER of Administrative towns like Sebeta (690.8%), Burayu (441.9%), Dukem (397.0%), Sululta (350.6%) and LegaTafolaLegaDadi (328.7%) exceeds to 300%. The reason why these Administrative towns' pre-primary GER exceeds 300% has to be identified through research.

GRAPH 1.4.2 ADMINISTRATIVE TOWNS COMPARISON OF PRE-PRIMARY EDUCATION GER

1.5. Quality Indicators in Pre-Primary Education

Quality Education is defined as one of that is pedagogically and developmentally sound and that makes the student in becoming active and productive members of the society. A quality education is supported by three key pillars: ensuring access to quality teachers; providing use of quality learning tools and professional development; and the establishment of safe and supportive quality learning environments. Pupil Teacher Ratio (PTR) Pupil section Ratio (PSR) and Pupil Text book Ratio (PTBR) are the commonly used indicators in this publication.

I. Teachers in Pre-primary Schools

In pre-primary attached to primary education almost all teachers those care for the children are from primary first cycle schools to work side by side. Child to child program is held by trained young facilitators under full supervision of neighboring primary school. Even though only Kindergarten schools have their own teachers, number of O-Class and Kindergarten teachers are shown in table 1.5.1 below that it is possible to see there were a total of 14,924 teachers where 83.1% of them are females. Among 14,924 teachers 10,527 of them are employed as KG teachers and 4,397 teachers are primary school teachers but also teaching in O-class.

II. Pupil Teacher Ratio (PTR)

PTR gives an indication of contact between pupils and teachers in a classroom. If it is lower, then there is high chance of contact between a teacher and pupils and teachers will have enough time to take care of children and check homework and class work as well. In other words, the lower the PTR the better teaching learning process would be. As shown in table 1.5.1 below, the Pupil Teacher Ratio (PTR) of KG and O-Class in the academic year improved to 68:1 from 76:1 in 2012 (2019/20 G.C.) at regional level. Administrative towns have better Pupil Teacher Ratio (PTR) of KG and O Class which is 29:1 in average than Zones' average Pupil Teacher Ratio (PTR) which is 97:1.

III. Pupil Section Ratio (PSR)

As shown in table 1.5.1 below, the regional average Pupil Section Ratio (PSR) of KG and O Class in the academic year reaches 52:1 in general and Administrative towns have average Pupil Section Ratio (PSR) of KG and O Class, 44:1 than Zones average which is 52:1.

CHAPTER TWO

Primary Education

2.1. Equitable Access in Primary Education

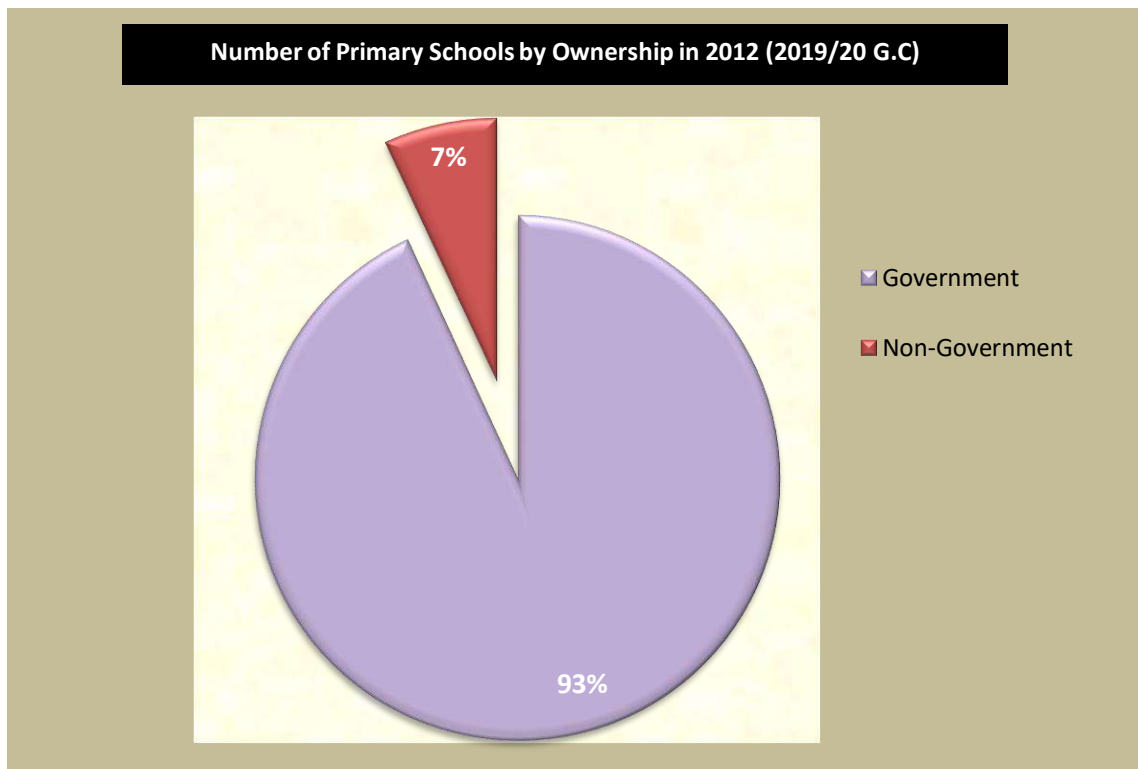

In Ethiopia, primary education is defined as education in Grades 1-8 that can be categorized in to two cycles; 1st cycle (grades 1-4) and 2nd cycle (grades 5-8).The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need about their home, environment/community or the country.

2.1.1. Number of Primary Schools

I. Number of Primary Schools by Ownership, Cycle & Number of CRCs

There were 14,937 primary schools in the Region of which all responded to 2012 (2019/20 G.C.). This number shows an increment of 207 schools (1.4%) as compared to 14,730 primary schools in 2011 (2018/19 G.C). As shown in Graph 2.1.1 below among 14,937 primary schools 13, 824 (92.5%) were government owned whereas the rest 1,113 (7.5%) were owned by non-government organizations.

GRAPH 2.1.1 NUMBER OF PRIMARY SCHOOLS BY OWNERSHIP

On the other hand, table 2.1.1 below also shows these primary schools in each Zones and administrative towns by cycle.

III. Geographical Locations of Primary (Grade 1-8) Schools in the Region

MAP 2.1.1 PRIMARY SCHOOLS (GRADE 1-8) GEOGRAPHICAL LOCATIONS IN THE REGION

Map 2.1.1 shows the distribution of all primary schools in the Region, it means those schools having grade level (1-8). As we have seen from the map the schools are highly dense at central, North East and North West areas of the region, whereas scattered in Southern part of the region. The map also shows the accessibility of major roads to the schools. As the map indicates, most of pastoral areas are still unreached of primary schools within 3 km buffer zone, so that it needs special attention from concerned bodies.

IV. Representative Index(RI)

The representative Index measures/gauges the amount of equitable education services that one region earned among the available services rendered. This answers indicator questions like how many of the educational institutions are equitably distributed among the regions. How much the region also has equitably distributed education services among zones? How far the zones have distributed educational institutions among districts? How much the districts have maintaining equitable distribution of educational institutions among the kebeles? To verify/confirm the equitable distribution of schools as per the number of school age student population in zones/towns of a region we use the following formula

The representative Index (RI) of Zones/ Towns

$$= \frac{\text{Rate of the share of the schools in the Zone/Town}}{\text{Rate of the share of the students in the Zone/Town}}$$

The calculated result of Representative Index (RI)

- If the result is 1 the distribution is equitable.
- If the result is below 1 it is not equitable & under representative.
- If the result is above 1 it is over representative.

As depicted in table 2.1.6 in the second cycle primary schools distribution the zones and administrative towns that have over representative share are 7 and 9 respectively. On the other hand the administrative towns and zones that have equitable share of distribution are: East Hararge, Oromia Special Zone Surrounding Finfinne, Robe and Adama. Whereas those zones and administrative towns that have under representation West Shoa, West Hararge&WestArsi, South West Shoa ,North Shoa, Ilu Aba Bora, HoroGuduruWollega, East Wollega, East Shoa, BunoBeddelle, Arsi as well as Woliso, Modjo ,Jimma, BishanGurracha, Batu&Asela Administrative towns. This implies that those zones and towns that have under representation need special attention of the government a head.

2.1.2. Primary Education Enrolment

2.1.2.1. New Entrants to Grade one in Primary Education

I. New Entrants by Age

The Annual School Census of 2012 E.C incorporates new entrants to grade one by age. The government recognized the official school beginning age as 7 (MoE, 1994) years. Upon this, the findings are summarized in the figure below.

GRAPH 2.1.2 NEW ENTRANT ENROLMENT BY AGE

From graph 2.1.2 above, it is possible to observe that a total of 1,676,376 new entrants out of which 895,458 Males and 780,918 Females have been registered in the year. When compared by age, the biggest number of new entrants (65.28%) is 7 years old which is the officially recognized age of primary school entry. The data shows that 0.76% of the entrants were underage whereas 33.96% of the new entrants were over age. On the other hand this figure represents 89.21% (89.13% Males and 89.31% Females) of the total enrolment of grade one in the year.

II. New Entrants by Zone and Administrative Towns

Table 2.1.7 below shows that the number of new entrants by age in their respective zones and Administrative towns. Since the number of new entrant depends on the size of population we can't interpret in such away.

2.1.2.2. Primary Grade1-8 Enrolments

I. Primary Enrolment by Grade and Gender

In the year 2012 (2019/20 G.C) ASC, enrolment was captured by grade and gender to establish their percentage distribution for better planning and allocation of school facilities as well as soliciting for support from various stakeholders. A total of 8,228,564 of which Male 4,442,965 and Female 3,785,599 pupils have enrolled in the year for primary education. Considering pupil enrolment distribution by grade, higher enrolment figures were registered in lower classes and gradually decreases as the grade goes up. Accordingly, as shown in graph 2.1.3 below grade one enrolment accounts 22.83% and the share of grade eight is only about 6.2%. In general, the percentage distribution of pupils by grade from the graph tells that there is a high dropout rate and repetition rate when we move from grade one to grade eight in the system.

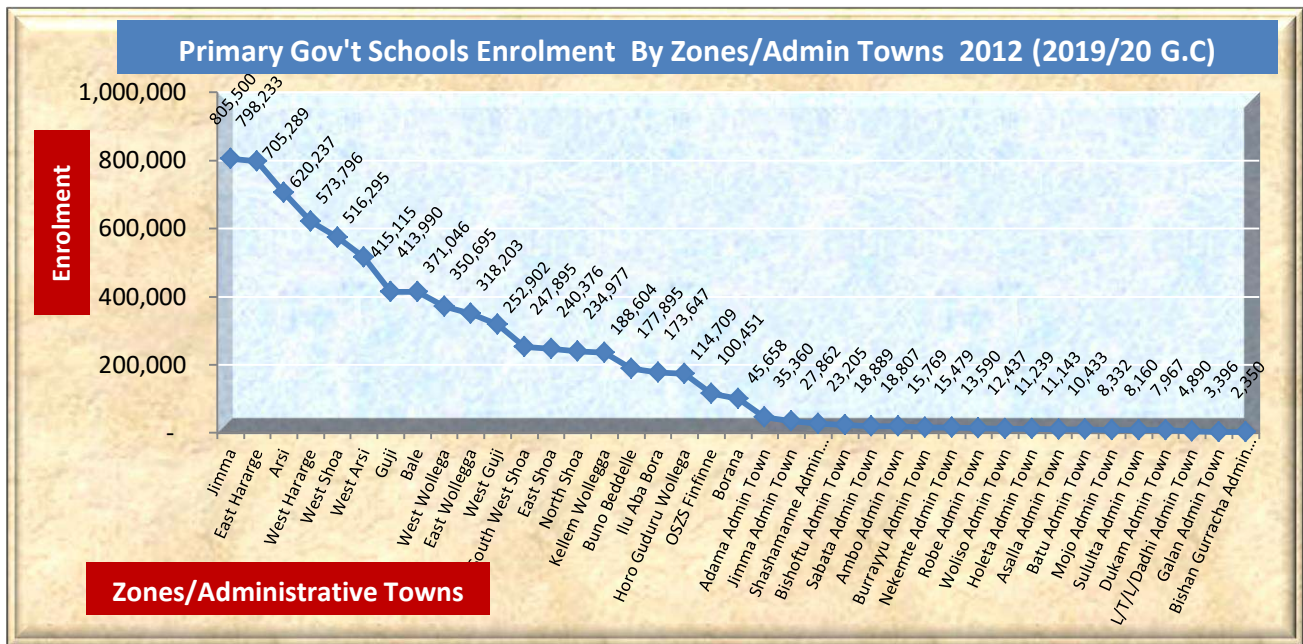

GRAPH 2.1.3 PERCENTAGE OF PRIMARY EDUCATION ENROLMENT BY GRADE

II. Primary Enrolment by Zone, Ownership, Locality and Program Mode

Enrolment was categorized according to Zones/ Administrative towns to establish which zones have the highest and/or lowest enrolment rate. Enrolment rate again depends on SAP.

GRAPH 2.1.4 GOVERNMENT PRIMARY SCHOOLS ENROLMENT BY ZONES/ ADMINISTRATIVE TOWNS

Concerning ownership of primary schools, the role of government is much greater than that of non-governmental organizations. Graph 2.1.5 below shows that 96.2% (96.4% Male and 96 % Female) enrolment belongs to government schools, whereas, 3.8% (3.6% Male and 4.0% Female) enrolment belongs to Non-Government schools. Moreover enrolment of primary education can be categorized by locality (urban 22.4% and rural 77.6%), program mode (regular 99.4% and evening 0.6%) and language of instruction (Afan Oromo 95.5% and Amharic 4.5%).

GRAPH 2.1.5 PRIMARY ENROLMENT SHARE BY OWNERSHIP, PROGRAM AND LANGUAGE OF INSTRUCTION

2.1.2.3. Enrolment of Children with Special Needs

The issue of special needs data has also addressed in the process of collecting educational data of 2012 (2019/20 G.C) ASC. Graphs 2.1.6, 2.1.7 & 2.1.8 below illustrate enrolment with Special Needs by type of disability in primary first and second cycle. In the academic year there were 76,869 (Male 45,418, Female 31,451) children with Special Needs enrolment in the region. Amongst, 10,650 (13.85%) have partial and sever physical difficulty, 12,131 (15.78%) have partial and sever vision difficulty, 13789 (17.93%) have partial and sever hearing difficulty and 12,506 (16.3%) have partial and severe mental difficulty and the other types of disabilities such as multi disabilities, autism, communication difficulties, learning difficulties, behavioral and social difficulties incorporate 27,793 (36.15%). This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region as comparing to 10% (As UNESCO estimate) of school age population of their level. The above figure accounts only 0.93% of the total primary enrolment in the region. The existence of such large number of students with special needs in the region requires the attention of all concerned for designing and implementing the already existing inclusive policy and strategy in order to provide them the support of teachers training, physical infrastructure, provision of learning equipment and preparing special schools where it is needed. Therefore, the issue needs great attention of all concerned bodies to enable them get opportunity to learn in an inclusive environment and keeping their right to learn.

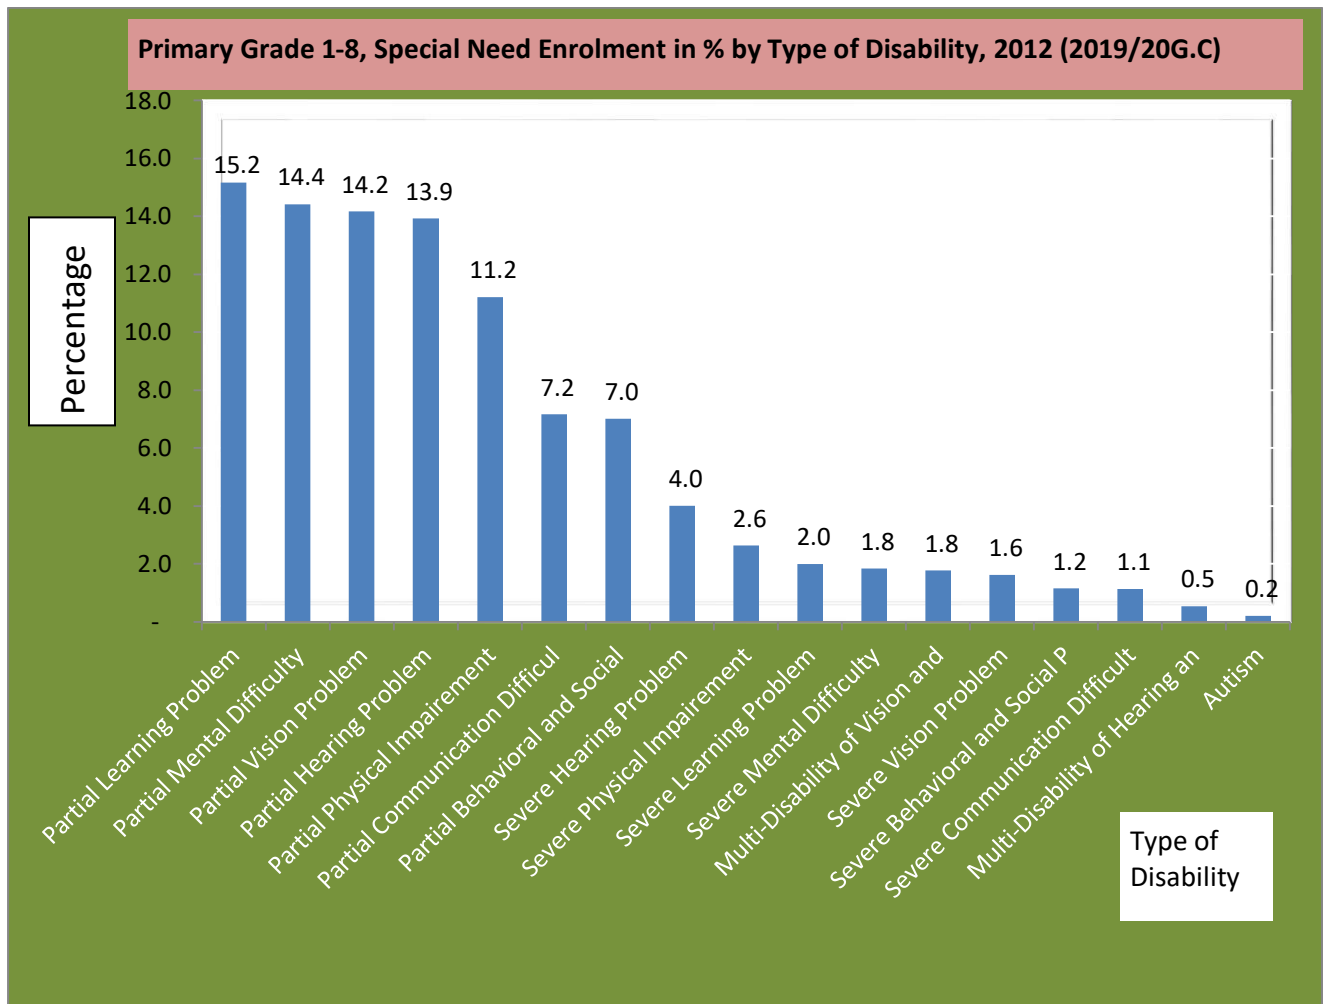

GRAPH 2.1.6 PRIMARY FIRST CYCLE SPECIAL NEED ENROLMENT BY TYPE OF DISABILITY

GRAPH 2.1.7 PRIMARY SECOND CYCLE SPECIAL NEED ENROLMENT IN % BY TYPE OF DISABILITY

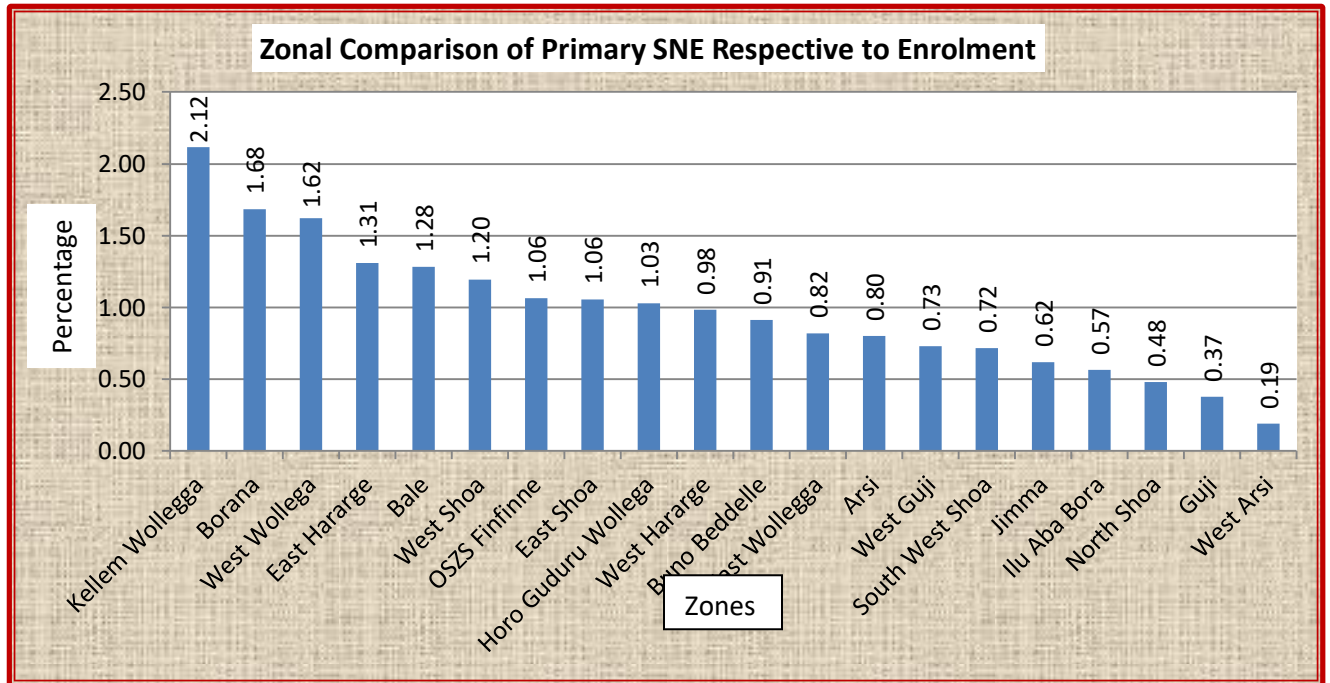

GRAPH 2.1.8 PRIMARY GRADE 1-8, SPECIAL NEEDS ENROLMENT IN % BY TYPE OF DISABILITY

As shown in graph 2.1.9 below, the zonal analysis on children with special needs in primary schools shows that KelleWollega, Borena and West Wollega have relatively the largest share of special needs enrolment with their respective enrolment which accounts 2.12%, 1.68%, 1.62%. On the other hand West Arsi, Guji, and North Shoa zones have the least share of special needs enrolment in respective to their enrolment which accounts 0.19%, 0.37% & 0.48%. Concerning administrative towns Nekemte, Gelan and Robe Administrative Towns have relatively the highest share of special needs enrolment which accounts 1.91%, 1.73% and 1.67% when we compare with their respective enrolment. Whereas BishanGuracha administrative town is the only administrative town with no special needs enrolment filled by yearly education census in the year.

2.1.2.4. Orphan Students in Primary Education

Orphan students are those who have lost both their father and mother due to different reasons. The 2012 (2019/20 G.C) ASC indicates that there were 51,644 (28,155 boys and 23,489 girls) those have lost both of their parents that accounts 0.63% (boys 0.63% and Girls 0.62%) of the entire pupil enrolled in primary schools. The regional analysis of orphan student in primary schools indicates that among the 20 zones in the region OSZS Finfinne, West Shoa and KellemWollega had the highest proportion of orphans that accounts 0.92%, 0.89% and 0.86% respectively. Concerning the 19 administrative towns Sebeta, Holeta and Modjo administrative towns have the highest proportion of orphan pupils rating 2.76%, 1.67% and 1.55% respectively. The total number of orphans in the primary education is determined and expressed as a proportion to the total enrolment which is indicated in tables 2.1.20 and 2.1.21 below.

2.1.3. Primary Education Enrolment Rates

2.1.3.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children). Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

I. Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the number of children of the official primary admission age 7 in a given year. Sometimes, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students who may have not been enrolled in school at the appropriate age, and often reflects the backlog of students who could not be enrolled before. A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over-aged and under-aged children entering primary school for the first time and/or due to inconsistencies in population data. Here is the formula to calculate AIR.

$$\text{AIR} = \frac{\text{Number of New Entrants in Grade 1}}{\text{Population at the official school-entrance age}} \times 100$$

GRAPH 2.1.11 TREND OF AIR FOR THE LAST FIVE YEARS

As shown on graph 2.1.11 above, AIR of the Region was greater than 100% for the last five years; which was because of over and under age children enrolment. The AIR has been fluctuating from year to year. As the data shows, there are children in the system which have not been enrolled in schools until this year, and often reflects the backlog of children who could not enrolled before.

Although it is known that Ethiopian government school entrance age is 7 years old for grade 1, children older than the official school age are registered to attain grade 1 which made Apparent Intake Rate over 100% as can be seen from table 2.1.22 above.

Moreover as indicated in the table, it is possible to see that AIR of the region in 2012 (2019/20 G.C) is 163.86% (M=173.35% and F=154.18%). The table also shows that except BishanGuracha all zones and all administrative towns have AIR greater than 100%. Concerning GPI, 10 zones have GPI less than that of the regional average (0.89). The rest 7 zones and 17 administrative towns have GPI greater than the regional average and three zones and two administrative towns have GPI which is equal to the regional Average.

From table 2.1.23 above, it is possible to see that a total sum of 1,676,376 (895,458 are Male and 780,918 are female) new entrants have joined grade 1,. The largest number of new entrants (65.28%) was children of 7 years old which is the officially recognized age of primary school entry. The data shows that 0.76% of the new entrants were underage whereas 33.96% of the new entrants were overage.

II. Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system who are of the official school-entrance age, expressed as a percentage of the population of the same age. The calculation requires new entrants in the first grade of primary education which are of the official school-entrance age (7 years old) and population at the official school-entrance age. It is calculated as follows:

$$\text{NIR} = \frac{\text{New entrant in 1st grade of primary education who are of the official school entrance age}}{\text{Population at the official school entrance age}} \times 100$$

A high Intake Rate for primary education of official primary school-entrance age children indicates a high degree of access for official school entrance age to the first grade of primary education

Oromia		516554	506496	1023050	581407	512959	1094366	112.6	101.3	107	11.3	0.9

As can be seen from the graph 2.1.12 above, the trend of NIR in the last five years has been decreasing at regional level. The graph also shows that NIR of Grade 1 by 2008 was 124.8% (M=130.8%, F= 118.8%) and by 2012 the figure decreased to 107.0% (M=112.6& F= 101.3%).

Table 2.1.24 above also shows the NIR, GG and GPI by Zones and Administrative towns. Among all zones in the region Borena, OSZS Finfinne and North Shoa, have the lowest NIR (73.7%, 75.0% and 79.8%) respectively. On the administrative towns side all except BishanGuracha administrative town have NIR greater than 100% which is illogical. Hence this may indicate that all concerned bodies have to work on how to have quality data.

2.1.3.2. Primary Education Gross Enrolment Rate (GER)

Gross Enrolment Rate is defined as the enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently seen in developing countries to address the backlog of students who didn't attend schools. The researchers may identify the reason bind to address problems.

The data required to calculate GER is, the enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows:

$$GER = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school- age population corresponding to the same level of education}} \times 100$$

GER does not appear to be a good indicator of school coverage. Although early or late entry is a minor issue that all children attend school is most important. Consequently, the GER is often considered as an indicator of the system's physical capacity rather than one of school coverage.

A GER of 100% would not imply that all children are attending school those have not got education due to different reasons yet and doesn't show that the schools have the capacity to educate all children of school age.

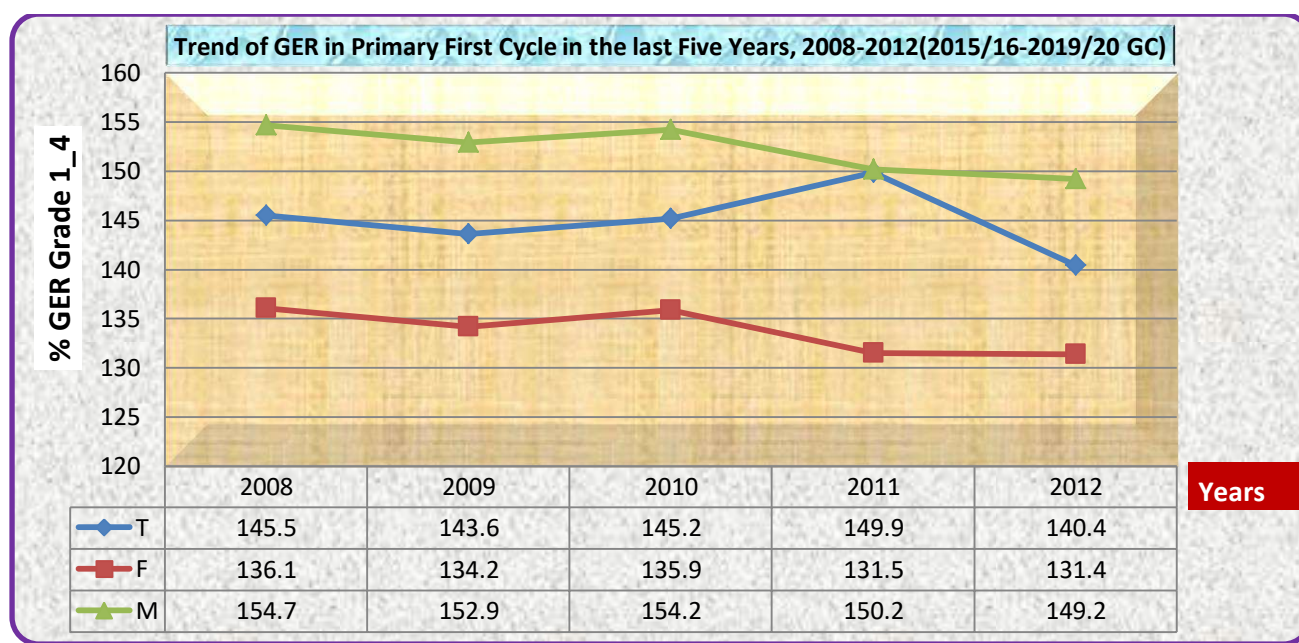

I. Gross Enrolment Rate of Primary First Cycle (1-4)

Gross Enrolment Rate of primary first cycle is the rate calculated simply by dividing the number of students enrolled in first cycle primary (irrespective of their age) to the population of 7-10 years old

$$\text{Grade 1 - 4 GER} = \frac{\text{All age grade 1 - 4 Enrolments}}{\text{School Age population of age 7 - 10}} \times 100$$

The Gross Enrolment Rate (GER) of Primary First Cycle grade 1-4 regular and ABE enrolment of the year is 140.4% (149.2% for boys and 131.4% for girls). This implies that there is an existence of overage and underage pupils enrolled in primary first cycle schools.

GRAPH 2.1.13 TREND OF GER IN PRIMARY FIRST CYCLE (GRADE 1-4) FOR THE LAST FIVE YEARS

Graph 2.1.13 above shows, by 2008 (2015/16 G.C) the first cycle Grade (1-4) primary GER of the region was 145.5% (M=154.7%, F= 136.1%) and decreased to 140.4% (149.2% for boys and 131.4% for girls) by 2012(2019/20 G.C). It is clearly seen from table 2.1.25 below that the number of over age and under age children in the system has not decreased yet. As the data shows, 11 zones and 2 administrative towns (North Shoa (101.1%), Ilu Abba Bora (111.6%), Arsi (113.8%), West Wollega (114.8%), OSZS Finfinne (118.6%), East Shoa (120.1%), West Arsi (123.5%), KellemWollega (131.8%), HoroGuduruWollega (132.1%), Borena (135%) and BunoBeddelle (137.7%) as well as Modjo (134.6%) and BishanGurracha (61.4%) Admin towns have GER of primary first cycle below the regional average 140.4%. While the rest zones and administrative towns have above the regional average.

Concerning the GPI, eight zones and two administrative towns, (Batu& Robe) have GPI less than the regional average which is 0.88. The rest zones and administrative towns have GPI equal to or greater than the regional average. Among 19 administrative towns 17 of them have GPI greater than the regional average.

In administrative towns where GPI is equal to or greater than one implies girls have got equal or more access to the first cycle education as compared to boys in those Towns.

The other method in analyzing gender issue is comparing the gender gap of the level. Gender gap is expected to be zero, which indicates whether both sexes have got equal chance to join school equally or not. Negative gender gap indicates female participation is greater than that of male and positive gender gap indicates male participation is greater than that of female. As illustrated in the same table, among all zones and Admin Towns, no town or zone have GG equal to 0. Among the 20 zones and 19 administrative towns in the region, seven zones and two Admin Towns of the region have gender gap greater than the regional average which is 17.8%. Guji, Bale and East Hararge Zones have the highest GG (32.6%, 30.5% and 29.5%) favoring to male whereas Dukem, LegaTafolaLegeDadhi and Burayu administrative towns have the highest GG (-86.9%, -71.9% and -41.3%) respectively favoring to female.

II. Gross Enrolment Rate of Primary Second Cycle (Grade 5-8)

Gross Enrolment Rate of primary second cycle (grade 5-8) is the rate calculated simply by dividing the total- number of students enrolled in second cycle primary (irrespective of their age) to the total population of 11-14 years old.

$$\text{Grade 5 – 8 GER} = \frac{\text{All age grade 5 – 8 enrolments}}{\text{School Age population of age 11 – 14}} \times 100$$

GRAPH 2.1.14 TREND OF PRIMARY SECOND CYCLE (5-8) GER IN THE LAST FIVE YEARS

As shown on graph 2.1.14 above, the Gross Enrolment Rate of primary second cycle (5-8) shows increment for the last five years. It was 62.5% (M=67.0%, F= 58.0%), in the year 2008 (2015/16 G.C) and increased to 73.0% (M=79.5%, F= 66.5%) by the year 2012 (2019/20 G.C). As the data indicates the participation of students in primary second cycle improved from year to year. But still it is very low and needs serious attention to overcome the problem. Table 2.1.26 below also shows the GER of the level by zone and administrative town.

TABLE 2.1.26 PRIMARY SECOND CYCLE GROSS ENROLMENT RATE

As data from Table 2.1.26 above shows the GER of second cycle primary of 8 zones and 18 administrative towns exceed the regional average which is 73.0% (M=79.5%, F= 66.5%). The rest 12 zones and one administrative town have registered less than the regional average. BishanGuracha administrative town and Borena zone have the least GER of all with 34.4% and 43.1% respectively.

Regarding to GPI, among 20 zones in the region 7 of them (East Hararge, West Guji, West Hararge, Guji, Bale, KellemWollega and West Arsi) and only one Administrative Town (Batu (0.77)) has registered GPI less than the regional average which is 0.84. The rest zones and administrative towns have GPI greater than or equal to the regional average. On the other hand all zones have GPI less than 1, and 8 administrative towns have GPI greater than 1.

III. Gross Enrolment Rate /GER/ of Primary Education (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of total enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population. Apparently, it includes under-aged and over aged pupils. So that GER can be greater than 100%.

$$\text{Primary GER} = \frac{\text{All age grade (1 - 8) Enrolments}}{\text{School Age population of age 7 - 14}} \times 100$$

Trend of GER for complete primary education in the region has shown slight fluctuating for the last five years. As can be seen from graph 2.1.15 below it has increased from 104.9% (M=111.8%, F=97.9%) in 2008 (2015/16 G.C) to 107.6% (M=115.3%, F=99.8%) by 2012 (2019/20 G.C).

GRAPH 2.1.15 TREND OF PRIMARY 1-8 GER FOR THE LAST FIVE YEARS

Table 2.1.27 below also illustrates complete primary education GER, GPI and GG of the region by zone and administrative towns. Accordingly, among 20 zones and 19 administrative towns in the region 12 zones and one administrative town in the region have GER below the regional average in the academic year which is 107.6%. To the contrary, the rest of zones and administrative towns have above the regional average. Regarding GPI, seven zones and two administrative towns have registered GPI less than the regional average which is 0.87; while others have GPI above or equal to the regional average. Among them only Galan and Bishoftu Administrative town have GPI equal to 1.0, which means female children have got equal access to primary education with male.

2.1.3.3. Net Enrolment Rate (NER)

It is the rate of the official school age group enrolled for a given level of education expressed as a percentage of the corresponding school age population. NER is the better way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER of primary education is calculated by dividing the number of proper age for primary education (ages 7-14 for Ethiopia) by the number of children of school age (7-14) population.

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age - group}}{\text{Official school age population corresponding to the same level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children might be enrolled at other levels of education.

The NER is measure of school coverage for theoretical age groups, but is unfortunately not well to adapting measuring overall coverage. NER is severely affected by the inaccuracy of school age population data. Children's reported ages as per school censuses are often wrong due to children's or their teachers' ignorance, particularly when the registration of births is not widespread, or due to amendments to the birth register.

I. Net Enrolment Rate (NER) in Primary First Cycle (1-4)

It is the percentage of students who enrolled in primary first cycle, whose age is 7-10 years, compared to the school age population of this level; that is total population of 7-10 years old.

$$\text{Grade 1 - 4 NER} = \frac{\text{Grade 1 - 4 Enrolments of age 7 - 10}}{\text{School Age population of age 7 - 10}} \times 100$$

Graph 2.1.16 below shows, the trend of last five years NER of first cycle primary at regional level. Accordingly, the NER of primary first cycle was 120.2% (M=126.9%, F=113.4%) in 2008 (2015/16

G.C) and the rate goes down and reaches to 115.1% (M=121.8%, F=108.3%) by 2012 (2019/20 G.C.). At normal circumstance the NER at any education level never exceeds 100% that implies all school age children of the level have joined schools. But from the year 2008 (2015/16 G.C) till this year the NER of primary first cycle at regional level exceeds 100%

Thus, we need to dig out the root cause of data inflation (i.e. NER > 100%) for it being beyond the optimum rate from 2008 (2015/16 G.C) to 2012 (2019/20 G.C).

GRAPH 2.1.16 FIVE YEARS TREND OF PRIMARY FIRST CYCLE NER

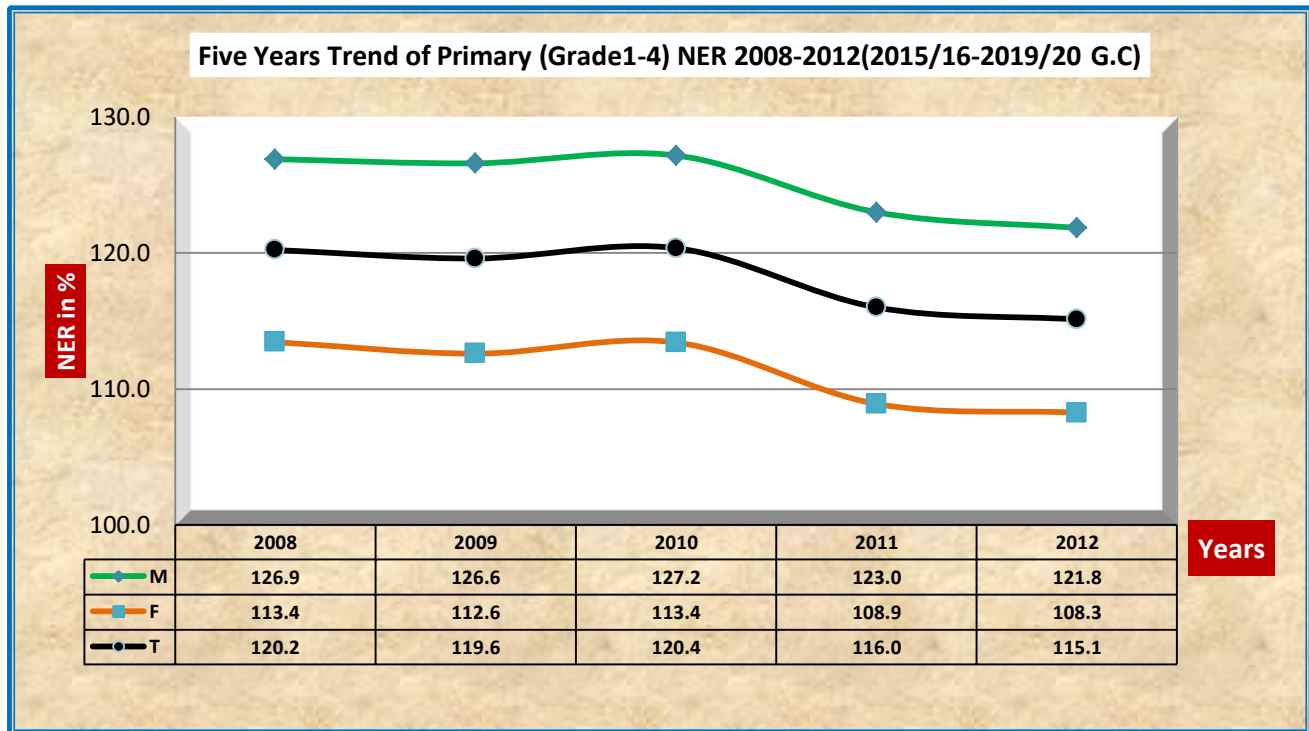

Table 2.1.28 below also demonstrates NER, GPI and GG of primary first cycle of the region by zone and Administrative towns. Accordingly, six zones (Arsi, Borena, Ilu Aba Bora, OSZS Finfinne, East Shoa, and North Shoa) as well as one Administrative town (BishanGuracha) have NER less than the ideal value which is 100%. The other zones and administrative towns have NER greater than 100%. The case of administrative towns like Ambo, Burayu, Sebeta, LegeTafuLegeDadhi, Dukem, Holota, Shashamanne and Sululta those NER exceeds 200% needs to be identified by research. Regarding GPI, eight zones and two administrative towns have less than the regional average GPI (0.89). The rest 12 zones and 17 Administrative towns have GPI greater than regional average; among them 9 administrative towns have registered GPI greater than 1.0 which implies female students are accessible than male students

TABLE 2.1.28 PRIMARY FIRST CYCLE NET ENROLMENT RATE (NER)

II. Net Enrolment Rate (NER) in Primary Second Cycle (5-8)

Net Enrolment Rate /NER/ at primary second cycle is the proportion of enrolment of students in primary second cycle of the age (11-14), with eligible school population of age (11-14).

$$\text{Grade 5 – 8 NER} = \frac{\text{Grade 5 – 8 enrolments of age 11 – 14}}{\text{School Age population of age 11 – 14}} \times 100$$

GRAPH 2.1.17 FIVE YEARS TREND OF PRIMARY 5-8 NER

As graph 2.1.17 above indicates, the trend of the NER of primary second cycle education in the region has shown a little bit progress for the last five years. Accordingly, in 2008 (2015/16 G.C) it was 50.68% (M=53.22%, F=48.11%) and then by showing an increment it rose to 58.91% (M=63.05, F=54.71%) by 2012 (2019/20 G.C), with the average annual growth rate of 8.22%. As the growth rate indicates, NER of the level shows insufficient increment. So that, it is recommended that a serious attention should be given for the issue to resolve.

Table 2.1.29 below also shows NER of second cycle primary education of the region by zones and administrative towns. Accordingly, 13 zones and one administrative town have registered NER of primary second cycle less than the regional average, 58.9%. But seven zones and eighteen administrative towns have registered NER greater than the regional average. Regarding GPI, among the 20 zones and 19 admin towns in the region 8 zones and 1 admin town have GPI less than the regional average (0.87). The rest 12 zones and 18 administrative towns have GPI greater or equal to the regional average. Among the zones, only Jima zone as well as nine administrative towns have registered GPI greater than or equal to 1.0

III. Net Enrolment Rate (NER) in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also be calculated in a similar way of calculating NER for primary first cycle and second cycle. It is the proportion of the appropriate school age (7-14) children enrolled in primary school with the total school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary.

$$\text{Primary grade 1 - 8 NER} = \frac{\text{Grade 1 - 8 enrolments of age 7 - 14}}{\text{School Age population of age 7 - 14}} \times 100$$

GRAPH 2.1.18 FIVE YEARS TREND OF PRIMARY 1-8 NET ENROLMENT RATE

As illustrated on the graph 2.1.18 above; the NER of primary education has shown very low increment from 2008 (2015/16 G.C) to 2012 (2019/20 G.C).

TABLE 2.1.30 COMPLETE PRIMARY (1-8) NET ENROLMENT RATE

Table 2.1.30 above shows complete primary education NER of the region by zones and administrative Towns. Accordingly, among all zones of the region, NER of eleven zones and one administrative town were less than the regional average of primary education NER, 99.8% (M=106.2%, F=93.3%). On the other hand, nine zones and 18 administrative towns have NER above the regional average. Furthermore, among all zones and administrative towns only 10 zones have GPI below the regional average (0.88). The remaining zones and all administrative towns have GPI above the regional average. Among these ten administrative towns have registered GPI greater than or equal to 1.00 which means equal or more accessible for female students.

2.1.4. Primary Gender Equity for the Last Five Years

a. What is Equity?

Education is considered to be one of the best channels to reduce socioeconomic inequalities and especially a powerful tool to reduce their trans-generational transmission. The level of qualifications and degrees obtained throughout schooling determine an individual's future socioeconomic status to a certain extent. Education systems are therefore expected to offer each child similar chances of success, based on merit over and above personal characteristics beyond their control (gender, area of residence, and so on). Given that schooling options are likely to be affected by individuals' financing ability and other specific characteristics, it is important to determine the extent to which education systems, especially those that are publicly funded, take these factors into account to limit their impact on individuals' access to school and results.

b. The Absolute Gap in Performance between Two Groups

The absolute gap in the performance of two groups A and B (such as urban and rural indicators or boys and girls) is calculated by subtracting the chosen performance indicator for group A from that for group B. The absolute gap is interpreted as the amount by which it is necessary to increase the performance indicator for group B (rural or girls in this instance) to achieve equity between the two groups.

c. The Parity Index

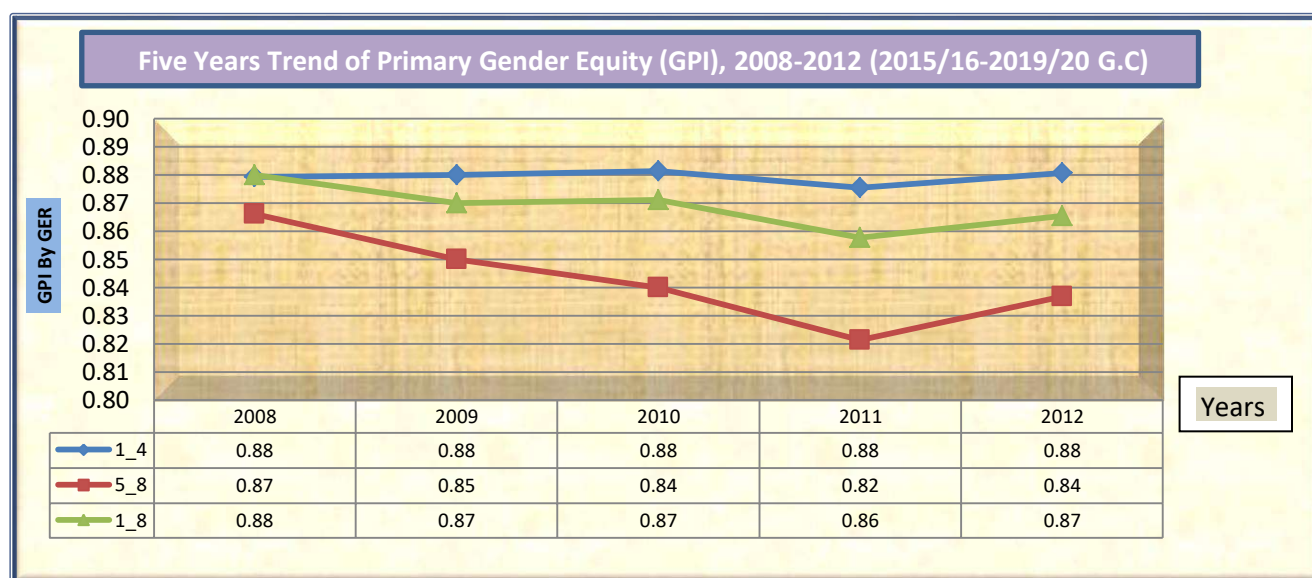

The parity index comparing groups A and B is obtained by dividing the performance indicator of group B by that of group A. The parity index provides the factor by which it would be necessary to multiply the group B indicator (or divide the group A indicator) to achieve an equal value for both groups. Parity between the two groups is achieved when the parity index is equal to 1. An index value above 1 indicates an advantage for group B (numerator); conversely, an index value below 1 indicates a

disadvantage for group B (numerator). The greater the divergence of the index from number one the greater the disparity between the two groups.

TABLE 2.1.31 FIVE YEARS TREND OF PRIMARY GENDER EQUITY INDICATORS BY GER

Five Years 2008-2012 (2015/16-2019/20 G.C) Trend of Primary Gender Equity												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	GER		GPI	G G	GER		GPI	G G	GER		GPI	G G
	M	F			M	F			M	F		
2008	154.7	136.1	0.88	18.7	67.0	58.0	0.87	9.0	111.8	97.9	0.88	13.9
2009	152.9	134.2	0.88	18.8	68.9	58.9	0.85	10.0	111.5	97.1	0.87	14.5
2010	154.2	135.9	0.88	18.3	73.4	61.6	0.84	11.8	114.3	99.2	0.87	15.1
2011	150.2	131.5	0.88	18.7	76.1	62.5	0.82	13.6	113.8	97.6	0.86	16.2
2012	149.2	131.4	0.88	17.8	79.5	66.5	0.84	13.0	115.3	99.8	0.87	15.5

GRAPH 2.1.19 FIVE YEARS TREND OF PRIMARY GENDER EQUITY INDICATORS BY GER

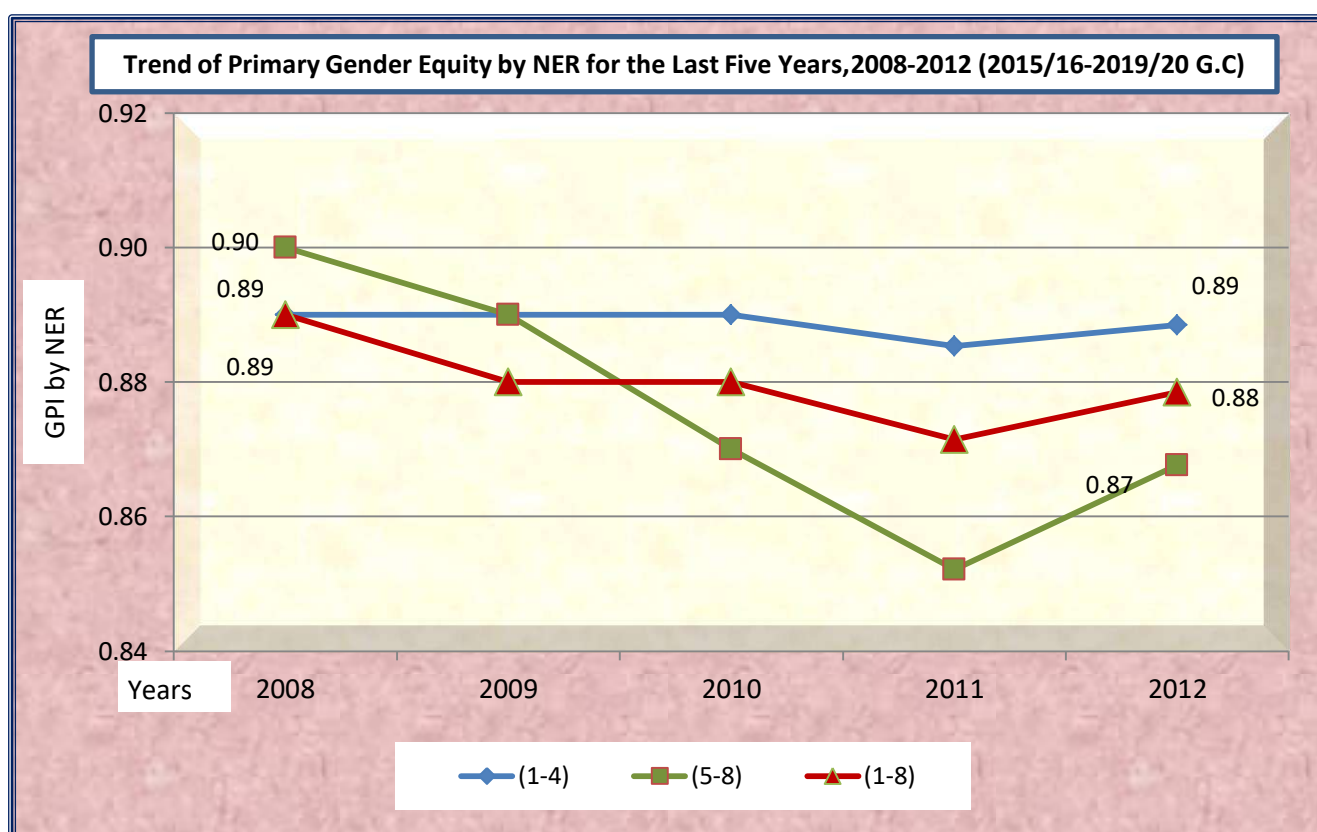

It is possible to see from table 2.1.31 and graph 2.1.19 above that the primary education (1-8) gender gap has been increasing while the GPI has been decreasing for the last five years by GER. For example, the GG at regional level has been 13.9 in 2008 (2015/16 G.C) and then increased to 15.5 in 2012 (2019/20 G.C), whereas the GPI at regional level has been 0.88 in 2008 (2015/16 G.C) and then decreased to 0.87 in 2012 (2019/20 G.C). Which indicates that the participation of primary education favour male than female.

TABLE 2.1.32 FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

Five Years, 2008-2012 (2015/16-2019/20 G.C), Trend of Primary Gender Equity by NER												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	NER		GPI	GG	NER		GPI	GG	NER		GPI	GG
	M	F			M	F			M	F		
2008	126.9	113.4	0.89	13.5	53.2	48.1	0.90	5.1	103.9	92.4	0.89	11.4
2009	126.6	112.6	0.89	14.0	54.8	48.7	0.89	6.1	103.5	91.4	0.88	12.0
2010	127.2	113.4	0.89	13.8	58.0	50.5	0.87	7.5	105.6	93.0	0.88	12.6
2011	123	108.9	0.89	14.1	60.5	51.5	0.85	8.9	105	91.5	0.87	13.5
2012	121.8	108.3	0.89	13.6	63.1	54.7	0.87	8.3	106.2	93.3	0.88	12.9

GRAPH 2.1.20 FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

As can be seen from table 2.1.32 and graph 2.1.20 above, gender equity of full primary (1-8) by NER has been expressed as Gender Gap 11.4% and GPI 0.89 respectively in 2008 (2015/16 G.C). After five years Gender Gap has increased to 12.9% and GPI has again also 0.88 in 2012 (2019/20 G.C) which shows the participation related to gender goes apart; male participation is increasing and female participation is decreasing from year to year.

2.2. Quality Indicators in Primary Education

Quality of education is the key indicator to detect whether a given country is on the right track to achieve the intended goal of its education system or not. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, quality of process, quality of educational outputs and outcomes. This document focuses on quality, in relation to educational inputs such as teachers' qualification, text book distribution and class size.

2.2.1. Teachers in Primary Education

One of the main factors, which affect the quality of education, is the qualifications of teachers. The performance of pupils in primary schools is greatly affected by the quality of the teaching staff. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

In 2012 (2019/20 G.C.) there were 165,914 (98,498 Male and 67,416 Female) teachers in primary schools in the region. As it is illustrated in table 2.2.1, 2.2.2 and 2.2.3 below percentage of qualified teachers for primary first cycle schools at regional level is 83.4% (M=79.0% & F=87.7%), where as in primary second cycle schools the percentage of qualified teachers is 97.0% (M=96.4% & F=98.5%). The percentage of qualified full primary/1-8/ teachers is 89.6% (M=88.6% F=91.0%) at regional level. This implies that the qualification of teachers is an area which needs special attention particularly primary first cycle.

Primary Natural Science and Mathematics Teachers

Findings of National Learning Assessment and other studies revealed that; primary school students' performance in Mathematics and Science is poor. Students were passive participants in classroom. That is why the project called SMASEE (Strengthening Mathematics and Science Education in Ethiopia) has been launched and implemented for the past few years. The premise behind this project is that there is strong association between teachers' competency and students' performance in Mathematics and Science education and needs to improve teachers' competency in teaching Mathematics and Science.

Data related to natural Science and Mathematics teachers for primary schools has been collected and compiled by zone/administrative towns here under. Accordingly table 2.2.5 below indicates that there were male 63.7% and female 36.3% primary school teachers in region. Out of total of 165,914 primary school teachers in the region, the share of natural science and mathematics teachers is 39.14%. This indicate that more than 1/3rd of teachers in the region are involved in science and mathematics, is the manifestation of the progress Oromia is making.

Specific to their specialization, out of 64,946 natural Science and Mathematics teachers in the region, almost half of them 31,378 (48.3%) are graduated in Natural Science specifically 10,642 (16.4%) of them are in Mathematics, 5,131 (7.9%) in Physics, 5,599 (8.6%) in Chemistry, 7,741 (11.9%) in Biology and 4,455 (6.9%) are in mathematics and basic science.

Concerning the share of natural science and mathematics across zones and administrative towns, Zone are better than administrative towns. For instance, KelleWollega, Ilu Aba Bora and West Shoa zone have the highest share (48.0%, 44.4% and 43.3%) of natural science and mathematics teachers from the total teachers these zones are having. On the other hand Shashamane and Nekemte administrative towns as well as West Guji zone have the least share of natural science and mathematics teachers.

2.2.3. Different Ratios in Primary Education

I. Primary Education Pupils Teacher Ratio/PTR/

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils might have better chance to contact their teachers with in manageable class room. The standard set for pupil teacher ratio for primary education is 50:1. The 2012 E.C school census data reveal that the average PTR of 49:1 for regular enrolment. This implies that the region is achieving the standard. But when we disintegrate the analysis to subject, zone, administrative town, and schools more teachers are needed.

As shown in Graph 2.2.1 below, the PTR trend for the last five years shows that it is improving to the extent it attain the standard at regional level.

GRAPH 2.2.1 FIVE YEARS TREND OF PRIMARY (1-8) PUPILS TEACHER RATIO

As it is indicated in table 2.2.9 below; West Hararge, Guji and East Hararge zones are with the highest PTR of grade 1-8 having 66:1, 60:1 and 59:1 respectively in 2012 (2019/20 G.C.) when we compare with the Administrative Towns such as Gelan, LegaTafolaLegaDadi and Burayu which are the lowest (21:1, 23:1 and 28:1) respectively. This can be lessened by increasing incentive schemes for teacher like; constructing more teachers' houses and improving the social infrastructure in those Zones with higher Student to Teacher Ratios is recommendable.

II. Primary Education Pupil Section Ratio/PSR/

Pupil section ratio (PSR) is also one of the educational quality indicators that indicate average number of pupils per number of sections. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The standard set for pupil section ratio for primary education is 50:1. But as can be seen from graph 2.2.2 below the trend of PSR of the last five years in the region haven't yet attained the standard. Rather, the trend for last five years of PSR of primary school has revolving around 58:1, 59:1 and 60:1.

GRAPH 2.2.2 FIVE YEARS TREND OF PRIMARY (1-8) PUPIL-SECTION RATIO

As shown in table 2.2.10 below the PSR of 2012 (2019/20 G.C.) at zonal and administrative town level which West Hararge, East Hararge and Guji zones are with the highest PSR by having 81:1, 71:1 and 68:1 respectively. On the other hand Administrative Towns such as LegaTafolaLegaDadhi, Galan and Bishoftu are with the lowest PSR by having 31:1, 31:1 and 32:1 respectively.

2.2.4. Primary Schools Facilities

Research has found that school facilities can have a profound impact on both teacher and student outcomes. With respect to students, school facilities affect health, behavior, engagement, learning, and growth in achievement. Thus, researchers generally conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of children with complex needs. In this document some school facilities availability and their status have been tried to be analyzed. Some of these school facilities include; toilet, water, electricity, laboratory, and others.

I. Primary Schools Toilet Availability

All schools are expected to have toilet for students and staffs. In reality and as shown in table 2.2.12 below out of total of 14,937 primary schools in the region 13,901 of them (93.1%) have toilet. Still large numbers of schools 1036, (6.9%) have no toilet for their students that may contribute for high dropout of students in the system especially girls. The condition of the toilets in 13,901 schools are categorized in to two: improved 4,621 (33.2%), and traditional 9,280 (66.8%).

Concerning ownership, out of total of 13,824 government owned primary schools of them 12,792 (92.6%), and 1,113 non-government organizations owned primary schools in the region 1,109 (99.6%) of them have toilet. In the same table availability of toilet has also shown by zone and administrative towns. Accordingly, out of total of 19 administrative towns 16 (84.2%) of them reported that all primary schools have toilet. Among the 20 zones KellemWollega, West Arsi and West Wollega zones are the only three zones those reported as all primary schools have toilet. On the other hand, East Hararge, Bale and Borena are the most three zones which have the least percentage of primary schools toilet availability by having 74.8%, 82.6%, and 83.0% respectively.

TABLE 2.2.12 GOVERNMENT AND NON-GOVERNMENT PRIMARY SCHOOL'S TOILET AVAILABILITY

II. Primary Schools Water Availability

Water is one of the most school facilities that schools must own. According to the 2012 (2019/20 G.C) school census, out of total of 14,937 primary schools in the region only 4241 (28.4%) schools reported that there is water facilities. Most of primary schools 10,696 (71.6%) in the region have not been supplied with water facilities. Concerning ownership, out of total of 13,824 government owned schools only 3,221 (23.3%); and 1,113 None-government organizations owned primary schools 1,020 (91.6%) in the region have water. Table 2.2.13 below shows the availability of water by source of water with their distributions in zone and administrative towns. Accordingly, out of total of 19 administrative towns 5 of them reported that all their primary schools have water. BishanGuracha administrative town is the only town that reported as all primary schools in the town have no water supply. Among the 20 zones in the region East Hararge, Guji, and West Guji are the most three zones which have the least percentage schools with water availability having only 12.1%, 12.5% and 13.7%, respectively. On the other hand Borena, East Shoa and South West Shoa are the most three better zones which are reported as their primary schools have water having the percentages 52.7%, 41.9% and 41.8% respectively.

III. Primary Schools Electricity Availability

This days Electricity is becoming the demanding facilities in schools. But out of total of 14,937 primary schools in the region only 3,989 (26.7%) of them reported that they are supplied with electricity. Most primary schools 10,948 (73.3%) in the region have no electricity. Concerning ownership, out of total of 13,824 government owned schools only 2,960 of them have reported that they are supplied with electricity. Out of total of 1,113 non-government organizations owned primary schools in the region 1029 (92.5%) of them have reported that they are supplied with electricity. As far as the location where schools are situated is concerned, out of total of 12,727 schools in rural areas only 2121 (16.7%) schools have access to electricity. On the other hand out of total of 2,210 schools located in urban areas 1,868 (84.5%) of them have reported that they have electricity access. In table 2.2.14 below the availability of electricity for primary schools is also shown by zone and administrative towns. Accordingly, out of total of 19 administrative towns in the region, majority of them have percentage above the regional average (26.7%) and 5 of them reported that all their primary schools have electricity. Out of total of 20 zones in the region West Hararge, East Hararge, and West Guji zones have the least percentage of schools with electricity having only 11.9%, 14.8%, and 17.9% respectively.

IV. Primary Schools Library and Laboratory Availability

A. Primary Schools Library

Library is an important source of knowledge to young minds in schools. It develops the important habit of reading among the students.

The importance of a library in a school is unquestionable so that, every school is required to have a library. While the role of the school library remains significant, its design, digital platform, strategies and tools are dynamic as technology is changing.

According to the 2012 (2019/20 G.C) school census as shown in table 2.2.15 below, out of total of 14,937 primary schools in the region only 6,941 (46.5 %) of them have reported that they have library. Arsi, West Shoa and Jima are the three zones with better percentage of library in primary schools having 69.2%, 63.4% and 62.3% respectively. On other hand Borena, East Hararge and West Hararge, zones have the least percentage of school in availability of library having 13.9%, 17.6% and 24.4% respectively. Concerning administrative towns, all Primary schools have Electricity above the regional average which is 46.5%.

B. Primary Schools Laboratory

To improve the quality of science education in primary schools, which is critical foundations for latter educational development, the availability of laboratories plays significant role. So as to strengthen science education in primary schools' availability of science laboratory in schools is important. A science laboratory is a workplace to conduct scientific research. It helps students to remember the concepts better. It helps to transfer the experience to other learning situations. It is a facility that provides controlled conditions in which scientific research, experiments and measurement may be performed.

Data related to laboratories in primary schools in the year 2012 (2019/20 G.C) is also shown in table 2.2.15 below by zone and administrative towns. Accordingly, out of total 14,937 primary schools in the region only 1,658 (11.1%) of them have reported that they have laboratory. Out of total of 20 zones and 19 administrative towns in the region all zones have laboratory in schools less than 50% and only Modjo, Asella, Jimma, LegeTafola, LegeDadhi, Woliso and BishanGuracha administrative towns have reached in availability of laboratory 50% and above.

VI. Primary Schools Finance

School finance involves the interrelated issues of raising, distributing, allocating, and using revenues for the purpose of educating children. School financing procedure is passed through two steps process in our region. The first involves fiscal transfers from the federal government to the region, and the second is from regional governments to woredas. Accordingly, Woredas allocate the block grant for primary and secondary schools based on the number of students they enrolled. This allocation can be by providing the necessary education materials in kind. Likewise, all schools used to generate additional income from different sources like community contribution. Tables 2.2.18 below illustrates the community contribution of Government primary schools in terms of cash, material and labor that estimated to cash.

TABLE 2.2.18 GOVERNMENT PRIMARY SCHOOLS COMMUNITY CONTRIBUTION

2.2.5. General Education Inspection

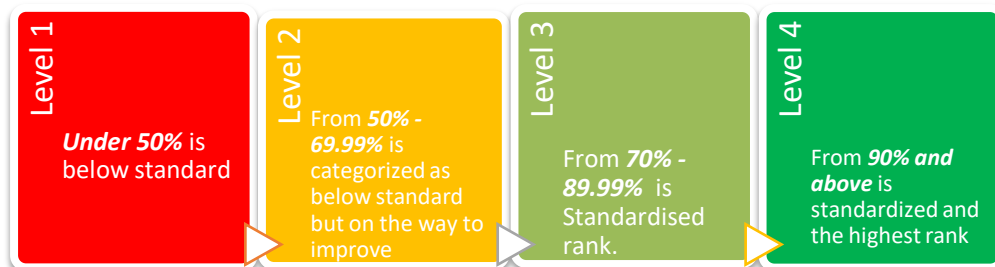

Educational inspection is a task or an act of assessing the standard and quality of education provided to the learners. The main objective of general education inspection is to improve the outcomes and ethics of students at national level by assuring the quality and effectiveness of education.

Criteria for General Education Inspection

General Education Inspection incorporates three criterion and five focus areas of inspection.

Criteria	Focus Areas of Inspection
Input	School facility, buildings, human and financial resources
	The learning environment
Process	Learning and teaching
	The school's engagement with parents and the community
Output	Student's outcomes and ethics

After schools are inspected by the educational inspectors and schools' levels are identified, feedback will be given to all stakeholders and school communities. The four important weights from level one to four are as follows.

The process of quality assurance is fundamental to the improvement of schools. Inspection is a form of quality assurance, a process of independent external evaluation. It can provide an objective assessment

of how well schools are performing - the quality of education that they provide as well as the outcomes and ethics that their students achieve.

It can be a powerful tool for promoting improvement, by establishing the minimum levels of quality that all schools should achieve and by making schools accountable for their performance and progress. The result of inspection for the last three years at zonal, administrative towns and at regional level is indicated in table 2.2.20 below. Accordingly, out of a total of 14739 primary schools in the region, 12436 (83.3%) of them were inspected. Based on the standard of Ethiopian inspection framework, out of a total of 12,436 inspected primary schools, 2,607 (20.96%) of them ranked as level I, 8,966 (72.10%) are ranked as level II, and 861 (6.92%) are ranked as level III. But only 2 (0.02%) primary schools in the region are ranked as level IV.

TABLE 2.2.20 PRIMARY SCHOOL INSPECTION INFORMATION

2.3. Education Internal Efficiency

2.3.1. Primary Education Internal Efficiency

Education system is said to be efficient if maximum output is obtained from a given input or if a given output is obtained with minimum possible input within a minimum number of years. In education system both dropout and repetition are alarms that reduce an efficient system to the minimum.

2.3.1.1. Internal Efficiency Rate

There are several indicators used to measure the efficiency of the education system. Among these, internal efficiency rate is the one that measures the efficiency of education system throughout the years. The Internal Efficiency Rate (IER) is the ratio of number of student's years that should be ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$\text{IER} = \frac{\text{Student's years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

Number of student's years effectively spent

Internal Efficiency Rate (IER) is calculated with different methods such as Transverse, Longitudinal and Pseudo-Longitudinal Methods. In this case, we have used a longitudinal method for calculating internal efficiency rate.

Formula for Calculating IER by Longitudinal Method

$$\text{IER} = \frac{(\text{Survival Rate (Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

TABLE 2.3.1 PRIMARY EDUCATION INTERNAL EFFICIENCY RATE (IER)

Internal Efficiency Rate (IER) with Longitudinal Method in 2012 (2019/20 G.C)								
Grades	G1	G2	G3	G4	G5	G6	G7	G8
Survival Rates/Retention Rates	100.0	75.6	52.9	60.5	50.7	44.1	38.8	33.9
Efficient Students-years	271							
Effective Students-years	457							
IER	0.59							
1-IER (wasted Resource)	0.41							

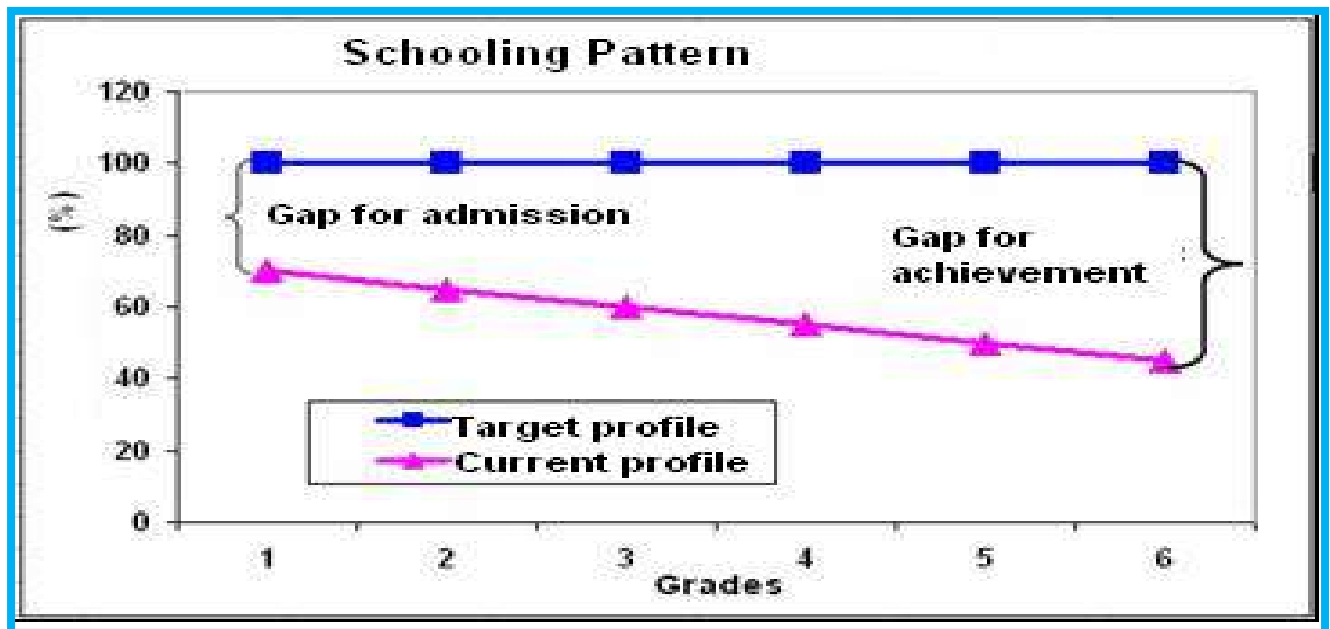

Interpretation of the Internal Efficiency Rate

Internal Efficiency Rate is a number between 0 and 1. The more this ratio closes to 1, the more the system is efficient. It is complementary to 1 (1-IER) which is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repetitions.

Schooling Profile /Enrolment Pattern/

The schooling profile is constituted of Age-Specific Enrolment Ratio for a given cycle of the education system.

GRAPH 2.3.1 ENROLMENT PATTERN

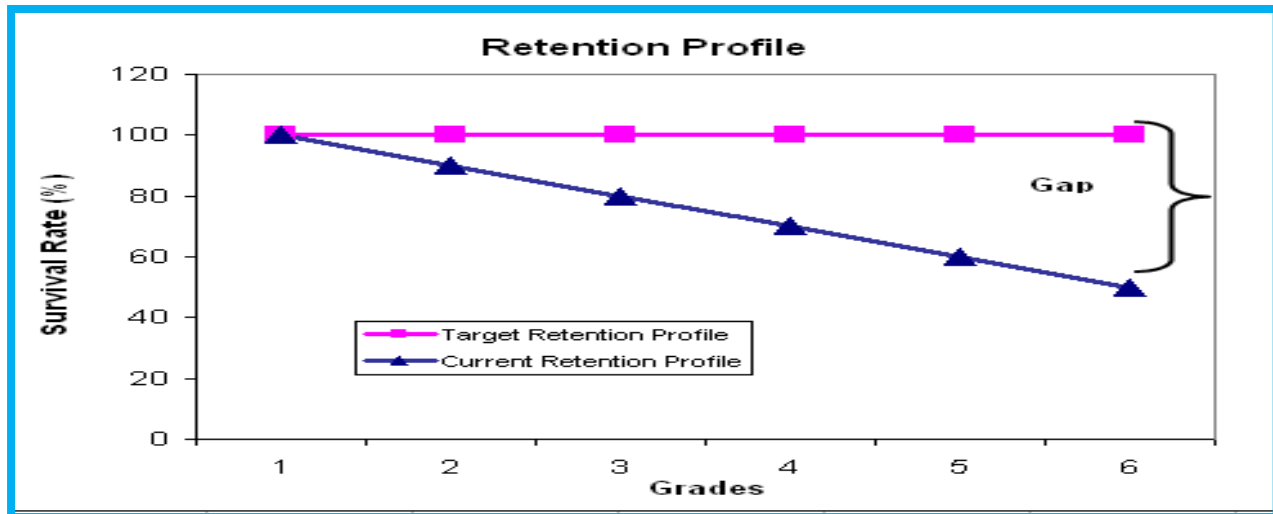

The schooling pattern is interpreted as the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling.

The value of the schooling profile resides mainly in its ability, as per indicated in graph 2.3.2 below, the level of enrolment for each grade to easily distinguish between access and retention issues. It especially distinguishes between the two main factors of weak cycle completion: weak first grade access and high dropout during the cycle. The figure graphically illustrates the most common situations in the cycle completion. Thus, a flat schooling profile constitutes retention ideal for the system (no dropout). Conversely, a slanted profile reflects the scale of dropout throughout the cycle and indicates low internal efficiency.

Retention Profile

The retention profile is constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until their schooling. Data required to determine retention profile are enrolment and news entrants by grade at least for two years

GRAPH 2.3.2 RETENTION PROFILE

Survival Rate (SR)

A survival rate approaching indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

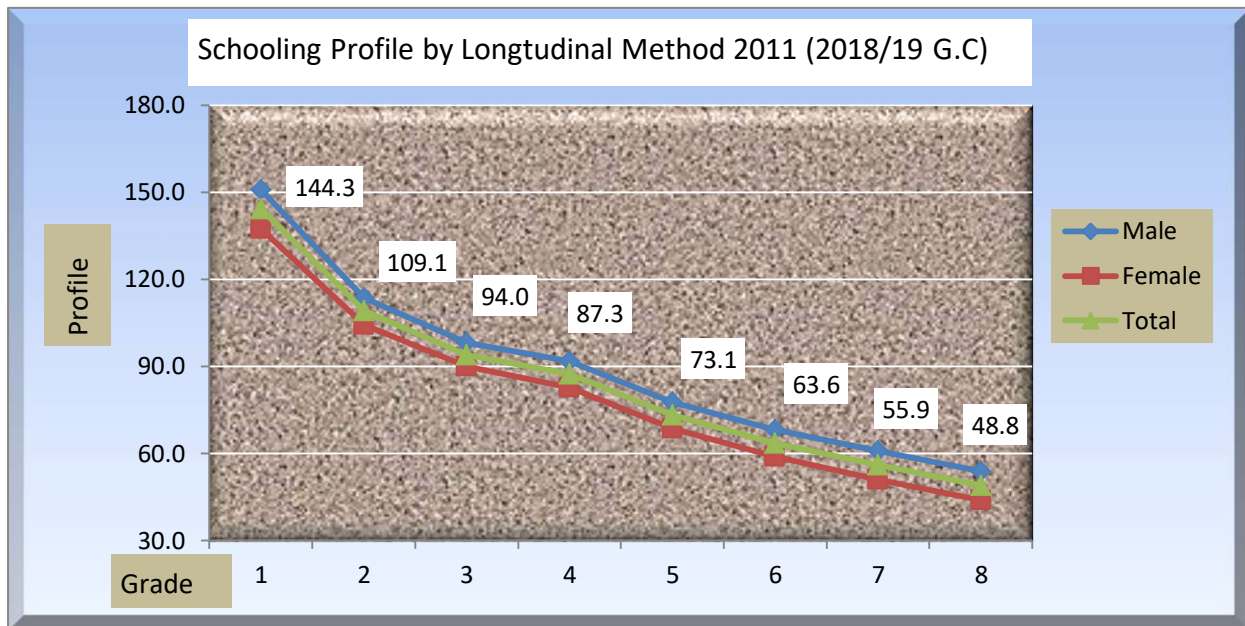

Schooling Profiles and Retention Profiles by Longitudinal Method

Schooling profiles present the advantage of providing more detailed information on enrolment while the simple average offered by the GER. It gives a visual representation of schooling careers from cycle access to completion. It also enables the analysis of retention that providing a more precise enrolment diagnosis. There are three main approaches to building schooling profiles; however, in this section we will be reviewing only the longitudinal method. This method relies on different basic information that offers a specific interpretation and complementary. The longitudinal profile follows one cohort of students through the cycle and describes their progression through the successive grades of the cycle. Data required for Longitudinal Method are, new entrants by grade for consecutive years of the total duration of education level. For instance, in Ethiopia, we need data for 8 consecutive years and population at the official school entrance age of 8 years ago to implement this method.

TABLE 2.3.2 SCHOOLING PROFILE BY LONGITUDINAL METHOD

Survival Rate in Primary Education 2012 (2019/20 G.C)

GRAPH 2.3.3 SCHOOLING PROFILE BY LONGITUDINAL METHOD

2.3.1.2. Internal Efficiency Indicators and Flow Rate

The quantitative goals of education systems are not limited to increasing the number of children enrolled but also to ensure children who begin a cycle should complete it, and do so in the set number of years so as to not repeat. Besides to this, the pedagogical programs of each cycle are developed in such a way that to progressively provide learners with a coherent and self-reinforcing set of knowledge and skills. To the contrary, the early abandon of a cycle is thus likely to result in the partial or total loss of the knowledge and skills acquired in the years effectively attended. The most widely mentioned example is that of sustainable literacy, acquired during primary education. Though many children know how to read and write before the end of the cycle, it has been empirically demonstrated that a significant share of students who did not complete the primary cycle lose their literacy after a number of years.

This is to analyze the flow of pupils through a cycle and evaluating internal efficiency consists of comparing the number of children that access the first grade of the cycle with the number that reach the last grade in the set number of years (without repetition). Promotion, Repetition and Dropout rates are the paths of student flow from grade to grade and characterized the efficiency of the education system in generating graduates. These rates are used for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication, Table 2.3.3 below, the primary education system of Oromia Regional State can be evaluated in terms of promotion rate, repetition rate and dropout rate

TABLE 2.3.3 PRIMARY INTERNAL EFFICIENCY BY CYCLE

I. Primary Education Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade **j** for year **T** and enrolment in grade **j-1** for year **T-1**. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

GRAPH 2.3.4 PRIMARY EDUCATION PROMOTION RATE

II. Primary Education Repetition Rate (RR)

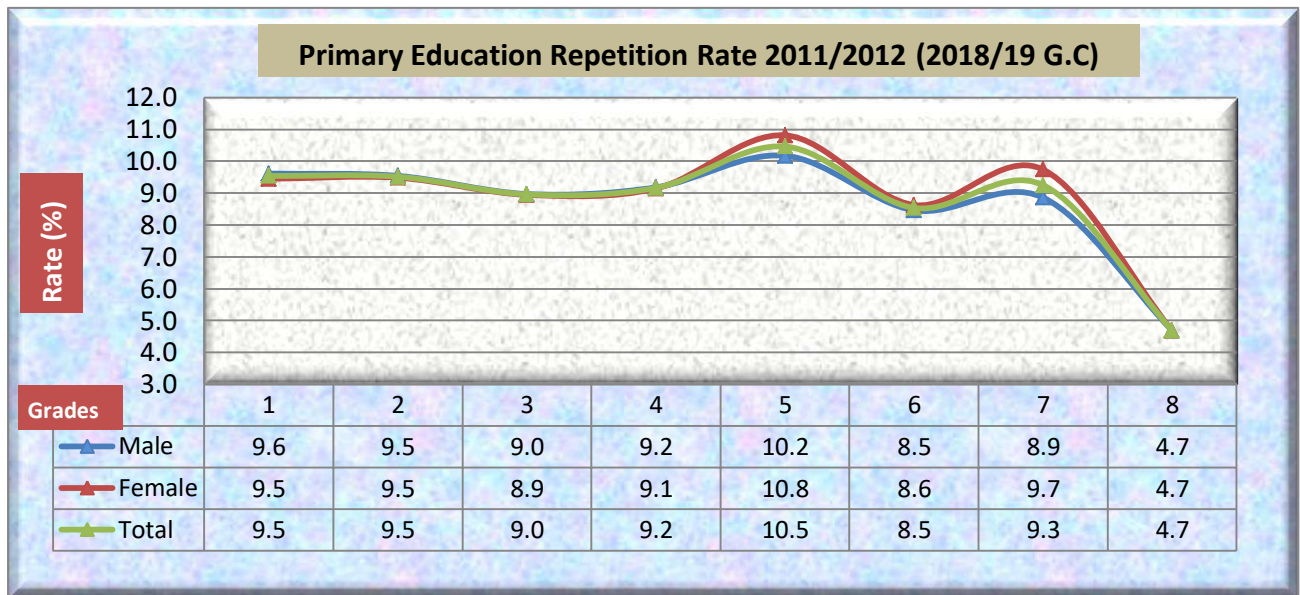

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studied in the same grade for the previous year. Data required for this calculation is repeaters of grade **j**, in year **T** and enrolment of grade **j** of year **T-1**. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. Repeating has directly impact on the system because of the following reasons:

1. Repeaters have wasted the resources they had used while they repeat in the same grade.
2. They occupied a school space that can be used by other new comers.

The formula to calculate Repetition Rate is;

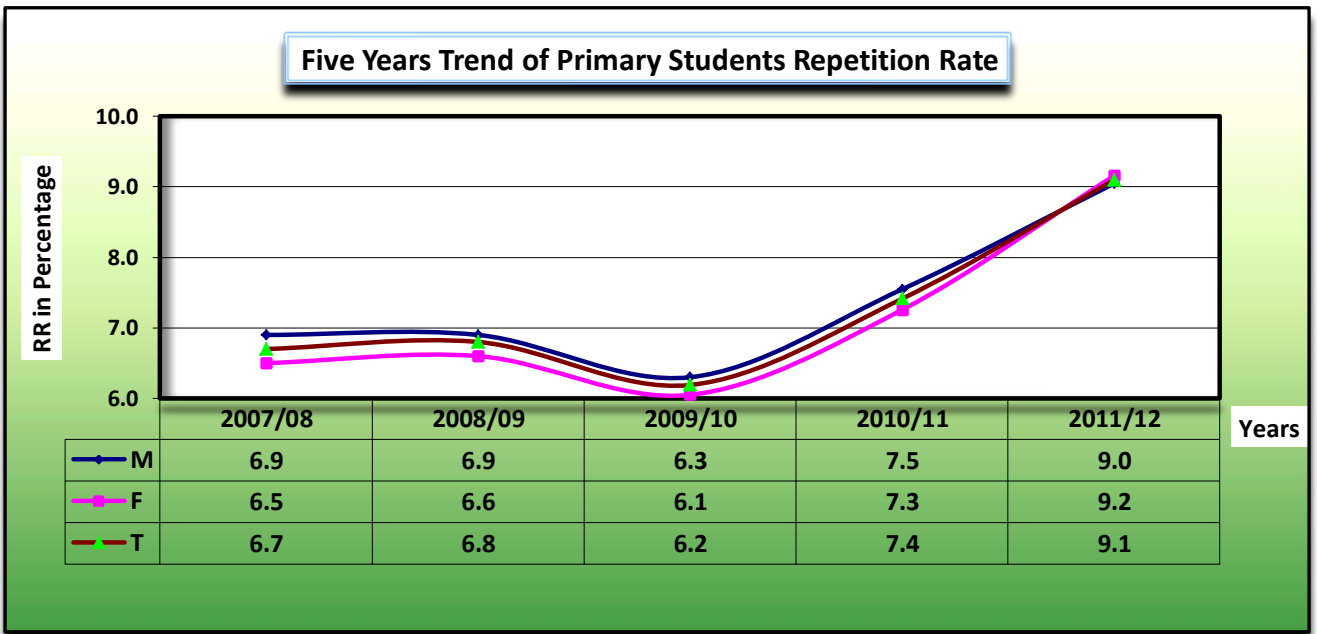

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T-1} \times 100$$

GRAPH 2.3.5 PRIMARY EDUCATION REPETITION RATE

From the above graph 2.3.5 it is clear that repetition rate in grade 1 to 7 is almost similar where that of female repetition rate in first cycle is a bit less than that of male repetition rate whereas male repetition rate in second cycle is higher than that of female repetition rates. The repetition rate for Grade 8 is lower than other grades.

GRAPH 2.3.6 FIVE YEARS TREND OF PRIMARY STUDENTS REPETITION RATE

As shown in graph 3.1.6 above repetition rate has decreased from 6.7% in 2007 (2014/15 G.C) to 6.2% in 2009 (2016/17 G.C) and then increased to 9.1% in 2011 (2018/19 G.C).

III. Primary Education Dropout Rates (DR)

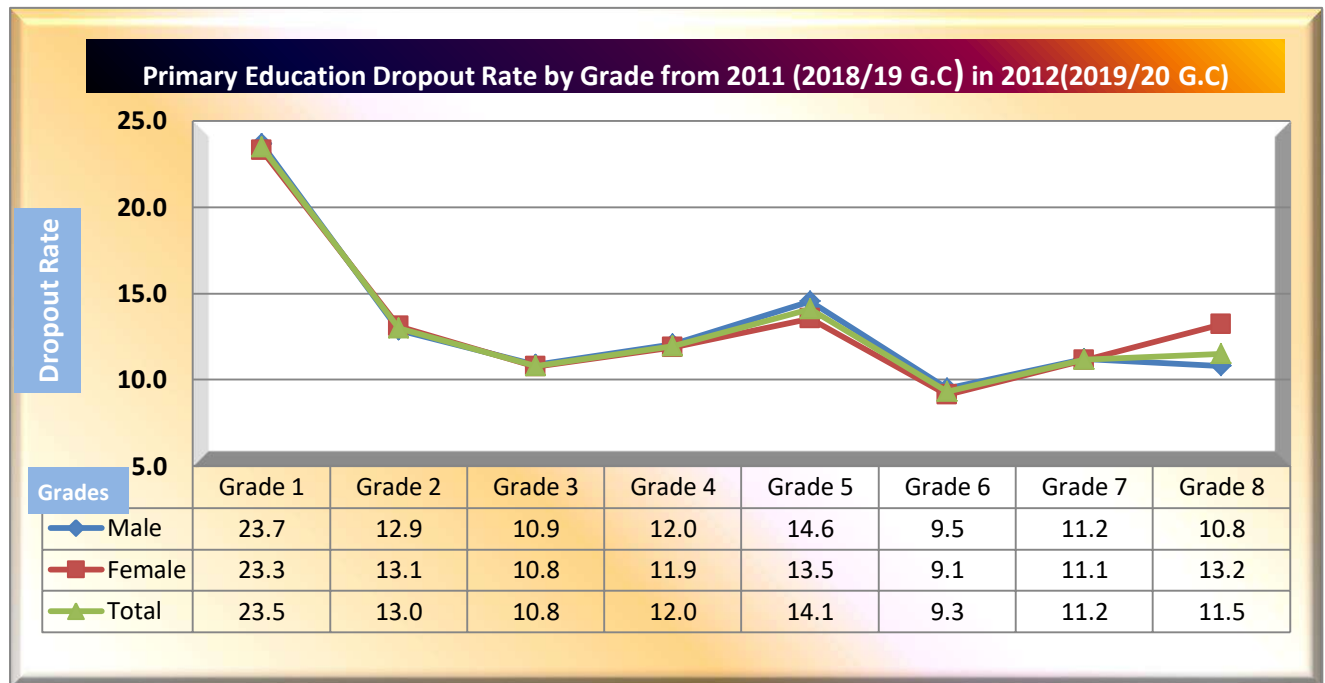

Dropout rate is the proportion of pupils who withdraw from education system for more than one year. It corresponds to the difference between 100% and the sum of promotion rate and repetition rates. Data required for the calculation of dropout rate are, promotion rate and repetition rate. High dropout rate is interpreted as an obstacle in the achievement of Universal Primary Education (UPE). Dropout problem has different impact on the system because of the following reasons:

1. Dropouts have wastage of resources.
2. They occupied a school space, which could use the other new comers if they readmitted.
3. They have not acquired the minimal levels of literacy and numeracy if they dropped out in early grades.

The formula to calculate dropout is,

$$\text{Dropout Rate} = (100\% - (\text{Promotion Rate} + \text{Repetition Rate}))$$

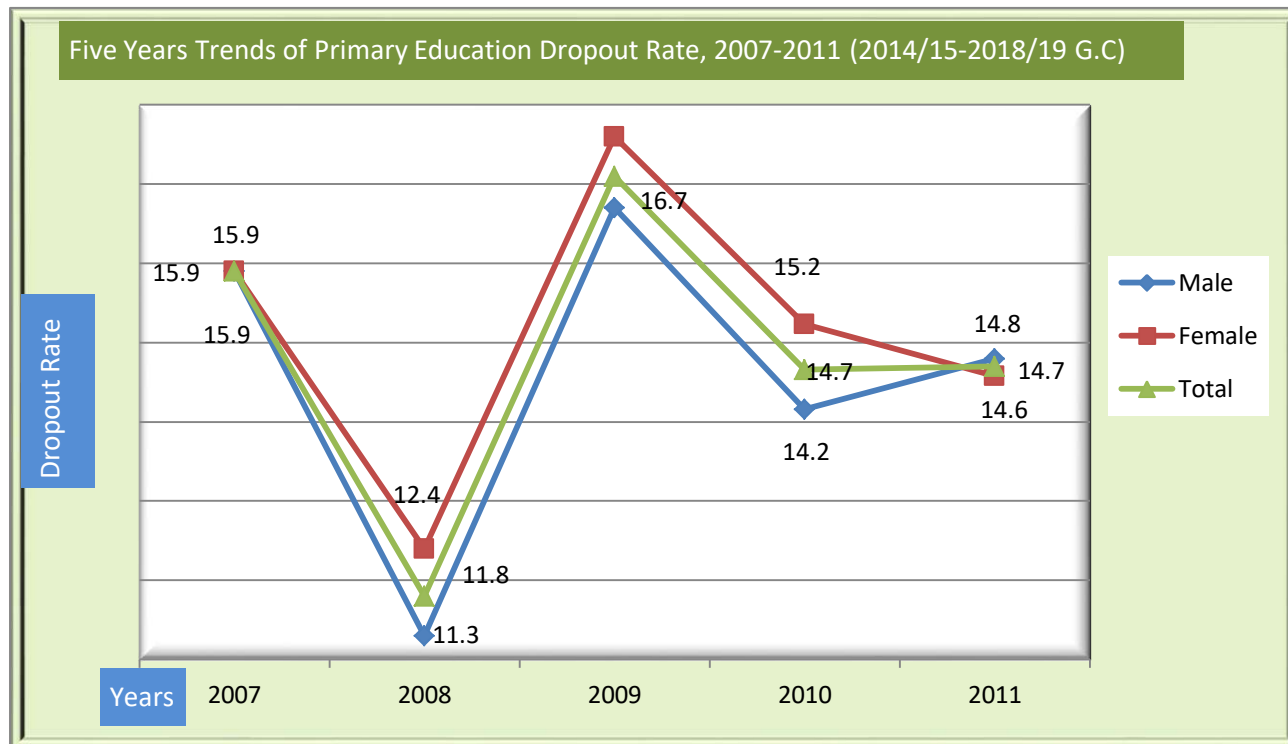

GRAPH 2.3.7 PRIMARY EDUCATION DROPOUT RATE BY GRADE

As shown on graph 2.3.7 above, the dropout rate is highest in grade 1 and lowest in grade 6 in primary education in 2011(2018/19 G.C). It was 23.5% at grade 1 and 9.3% at grade 6 and rose again to 11.5% in grade 8. Apparently graph 2.3.8 below indicates the comparison & trend of five years dropout. As

shown, it has decreased from 15.9% in 2007 to 14.8% in 2011. As we can see on the graph 2.3.9 below, dropout rate in Grade 1 shows that it oscillates from year to year.

IV. Transition Rate (TR)

Transition Rate is new entrants to the first grade of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year which can be expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous academic year respectively. Data required for calculating is new entrants in the first grade of primary second cycle or first grade of secondary first cycle for a given Year **T**, and total enrolment in final grade of primary first cycle or primary second cycle for Year **(T-1)**. For example, if the increment of transition rate of primary students to secondary is raised, in the same way the proportion of pupils from primary education who reaches secondary education also elevated up. Method of calculation for **TR** is the following;

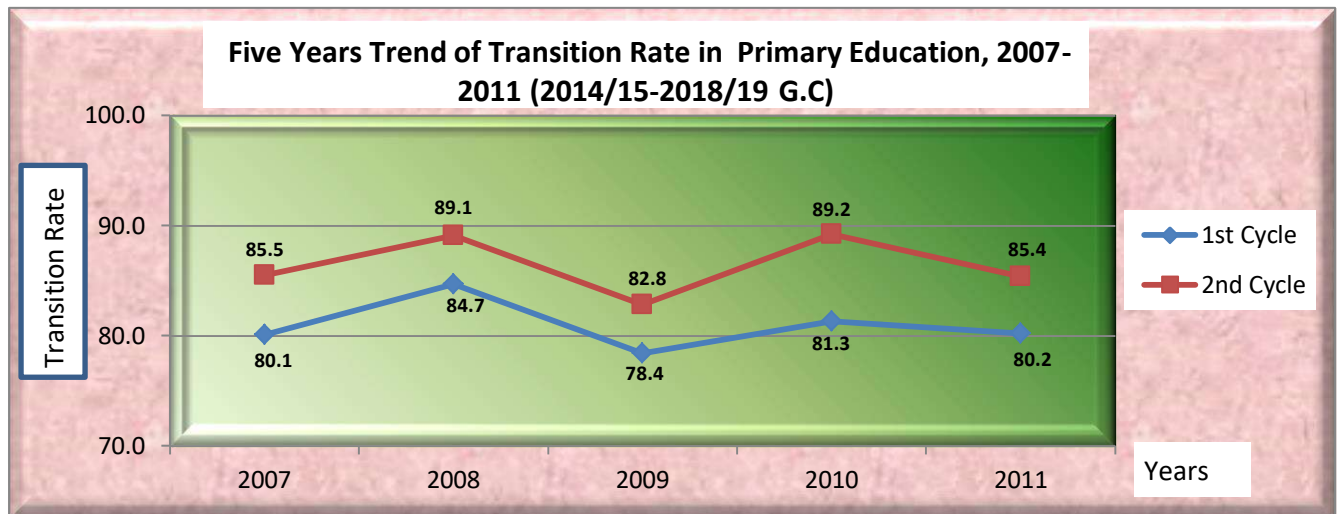

$$\text{Grade 4 Transition Rate or TR to grade 5} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{Grade 8 Transition rate or TR to grade 9} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

GRAPH 2.3.10 FIVE YEARS TREND OF TRANSITION RATE IN PRIMARY EDUCATION

V. Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8, age 14 and for Grade 5 age 11). Table 3.1.6 below shows the Completion Rates for both Grade 5 and Grade 8.

A high primary completion rate indicates a high degree of coverage, whether the pupils belong to the population of official/typical graduation age (14 years) or not. A school is classified as incomplete when it does not offer all the grades of a given cycle. In such cases the risk of dropout is high, especially if no alternative school nearby offers the missing grades.

Definition: Total number of new entrants who registered for grade 8 leaving examination regardless of age, expressed as percentage of the total population aged 14 years. The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following formula, Where;

“New entrant in last Grade” = (Total pupils in last Grade (Grade 8) – repeaters in last grade (grade 8))

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population of official age in last grade}}$$

BishanGurracha Administrative Town, Borena and North Shoa zone are the least performing zones of primary completion rate by having 28.3%, 32.1% and 33.4% respectively by the year 2011(2018/19 G.C).

2.2.3.3. Primary Education Cohort Analysis

A cohort is defined as a group of persons who jointly experience a series of specific events over a period of time. Accordingly, we may define a pupil cohort as a group of pupils who join the first grade of a given cycle in the same school year; subsequently experience the events of promotion, repetition, dropout or successful completion of the final grade, each in his/her own way.

There are three ways to analyze the internal efficiency of an education system by means of the cohort pupil flow method, depending on the type of data collected: These are (i) true cohort, (ii) apparent cohort, and (iii) reconstructed cohort. The ideal way to obtain a precise assessment of educational wastage is through the use of the *true cohort method*. This involves either a tracer (longitudinal) study to monitor the progress of a selected cohort of pupils through the education cycle, or through a retrospective study of school records in order to retrace the flows of pupils through the grades in past years.

The true cohort method is costly and time-consuming, and it requires good and reliable school-records with information on individual pupils. For this reason, this method is not yet widely used. In the absence of individualized pupil information, internal efficiency in education can be assessed by putting in to consideration the enrolment data by grade for at least two consecutive years using either the apparent or reconstructed cohort methods.

The apparent cohort method is applied when there is no data on repeaters. Then the enrolment in grade 1 in a particular year is compared with enrolment in the successive grades during successive years, and it is assumed that the decrease from each grade to the next corresponds to wastage. This method is the most commonly used so far which produces very approximate estimates of drop-out, and its main weakness is that it assumes that pupils are either promoted or drop-out of the school system. This method is quite appropriate for countries practicing automatic promotion from grade to grade.

A more pertinent and commonly used method is the reconstructed cohort method; we will be also using this method for this publication. Reconstructed cohort method is less dependent on the availability of detailed data over time. To apply this method, data on enrolment by grade for two consecutive years, together with data on repeaters by grade from the first to second year, are sufficient to enable the estimation of three main flow-rates: promotion, repetition and dropout. Once obtained, these rates may be analyzed first of all by grade to study the patterns of repetition and drop-out. Then they can be used to reconstruct a pupil-cohort flow in order to derive other indicators of internal efficiency. This is illustrated as follows.

I. Flow Rats Using Data on Enrolment and Repeaters

The methodology of the reconstructed cohort flow model is based on the fundamental concept that for pupils enrolled in a given grade in a given year, there can be only three eventualities: (a) some of them will be promoted to the next higher grade in the next school year; (b) others will repeat the same grade in the next school year; and (c) the remaining pupils will drop-out of school in the course of the year.

II. Hypothetical Flow Diagram of the Cohort through Primary Education

Assumption of Cohort Analysis

The flow of a fictitious cohort of 1,000 pupils through the primary education cycle of our Region can be reconstructed as stated below based on three assumptions:

At any given grade, the same rates of repetition, promotion, and dropout are applied, regardless of whether a pupil has reached that grade directly or after one or more repetitions (hypothesis of homogenous behavior). It also assumes that no pupil skips a grade, i.e., there is no double promotion.

There will be no additional pupils (new entrants) in any of the subsequent years during the life time of the cohort, other than original cohort of 1,000 pupils; and no in-migration or out-migrations throughout the cohort years.

Pupils in a grade are, allowed to repeat only twice. However, in reality a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

In hypothetical flow diagram of reconstruction cohort method of primary education system, one can analyze as follows. There was a total of 1,843,016 pupils registered in grade 1 in 2011.

To reconstruct the history of all pupils entering grade 1, it is easier to express this starting cohort as an index of 1,000 pupils, and all operations are consequently translated in 'per thousand' terms. Thus, when applying each flow-rate for grade 1 to this fictitious cohort of 1,000 pupils (instead of the actual pupils), one can find that 95 pupils repeated grade 1 (9.5%) 236 dropped-out (23.6%), and 669 were promoted to grade 2 (66.9%) and so on. It may be noted that the first diagonal row in the diagram below (next page) is obtained by multiplying the successive promotion rates for successive grades and successive years. The repetition and dropout rates are then applied to obtain the second, the third and the fourth rows.

From this flow diagram, one can draw a number of interesting observations. For instance, out of the initial 1,000 pupils entering grade 1, only 133 graduated from primary without repeating any grade; 93 graduated with a one-year delay, i.e. they repeated once; 37 graduated with two years delay, i.e. they repeated twice.

In addition, this flow diagram enables the computation of the main indicators of internal efficiency. For example, the figures in the boxes below give the number of pupils reaching a particular grade, thus enabling the calculation of the survival rates by grade. One can observe that 740 out of the 1,000 pupils in the cohort (or 74.0%) reached grade 2. These figures can be easily derived from the upper part of the diagram, by summing the number of drop-outs from each grade and each year and subtracting that sum from the enrolment in the same grade. For grade 1 we obtain $236+22+2 = 260$ drop-outs, which when subtracted from 1,000 would give 740 survivals. Finally, multiplying graduates by the number of grades ($263 \times 8 = 2,104$) would give the ideal number of pupil-years required to produce the graduates. The ratio between the latter and the actual number of pupil years used by the cohort, i.e. 4,864, gives the coefficient of efficiency ($2,104 \div 4,864 = 0.4326$ or 43.3 percent).

The years input per graduate (18.5 years) is obtained by dividing the total number of pupil-years spent by the cohort (4,864) by the total number of graduates (263). The years input per graduate can then be compared to the ideal number required, which is simply the duration of the education cycle 8 years of the cohort.

III. Internal Efficiency of the Cohort in Primary Education

TABLE 2.3.12 PUPILS YEAR BY GRADE OF COHORT

Pupils Year by Grade of Cohort Analysis								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	1105	811	686	600	520	422	374	310
F	1103	818	693	608	533	437	392	323
Average	1104	814	689	604	526	429	382	316

IV. Indicators of Retentions by Grade of the Cohort

A. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade is obtained by adding the number of pupils who eventually will be promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

TABLE 2.3.13 PRIMARY EDUCATION COHORT ANALYSIS SURVIVAL RATE BY GRADE

Primary Education Cohort Analysis Survival Rate by Grade (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	73.6	62.7	54.8	47.1	39.3	34.5	29.7	26.2
F	74.2	63.3	55.6	48	40.7	35.9	31	26.5
Average	73.9	63	55.2	47.5	39.9	35.1	30.3	26.4

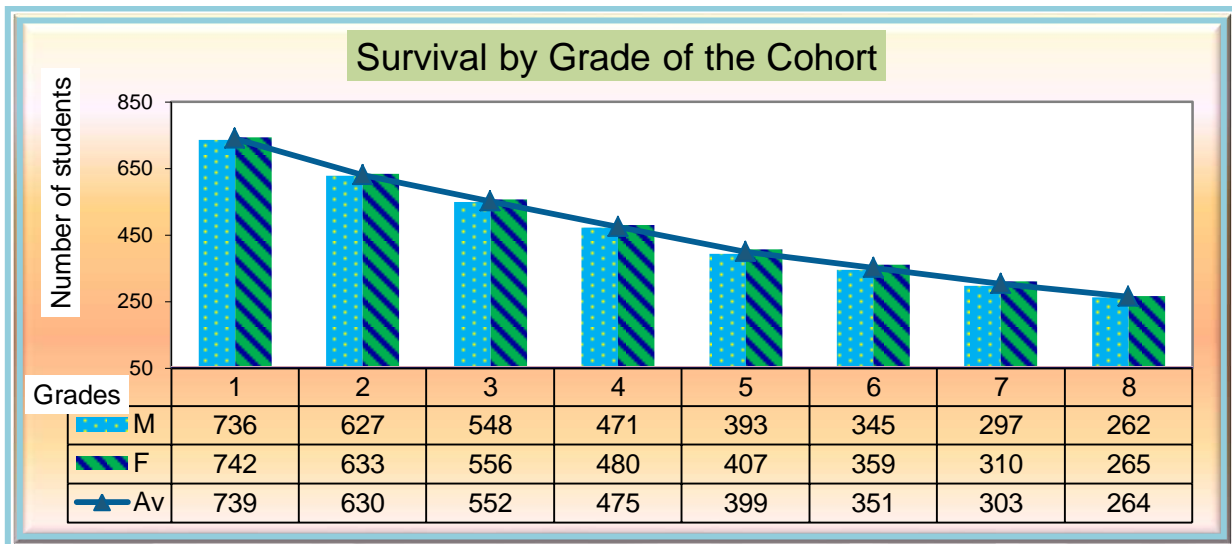

Table 2.3.13 above shows among 1000 students enrolled in grade 1, only 73.9% (M=73.6%, F=74.2%) are survived to complete grade 1 in the cohort. The rest 26.1% (M=26.4%, F=25.8%) left the school before completing grade 1. In addition 47.5% (M= 47.1% and F= 48.0%) students survived to complete first cycle primary.

From the 1000 pupils started the cohort, only 26.4% (M=26.2%, F= 26.5 %) will finally survive at grade 8. This shows that 73.6% (M=73.8%, F=73.5%) of students left the system without completing primary education. So we can imagine how the issue needs serious attention.

TABLE 2.3.14 NUMBER OF PUPILS SURVIVED IN EACH GRADE OF THE COHORT

Number of Pupils Survived in Each Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	736	627	548	471	393	345	297	262
F	742	633	556	480	407	359	310	265
Average	739	630	552	475	399	351	303	264

GRAPH 2.3.11 SURVIVAL BY GRADE OF THE COHORT

As shown in the graph 2.3.11 above, as the level of grade increases, the survival rate of students from grade 1 to 8 decreases. Hence more students leave the system before completing grade 8.

B. Dropout by Grade of the Cohort

As shown in the table 2.3.15 below, most of the students left the system early in grade 1 and 2. About 26.0% (M=26.3%, F=25.7%) of the pupils of the cohort left the system before completing grade one. Majority of the children leave the system at the early stage compared to dropouts at upper grades. This is undesirable situation to which planners and decision makers should pay immediate attention to it.

TABLE 2.3.15 PERCENTAGE OF DROPOUT BY GRADE OF THE COHORT

Percentage of Dropout by Grade of the Cohort (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	26.3	10.7	7.6	7.4	7.7	4.1	4.3	3.3
F	25.7	10.7	7.5	7.2	7.2	4	4.4	4.3
Average	26	10.7	7.6	7.3	7.5	4.1	4.4	3.7

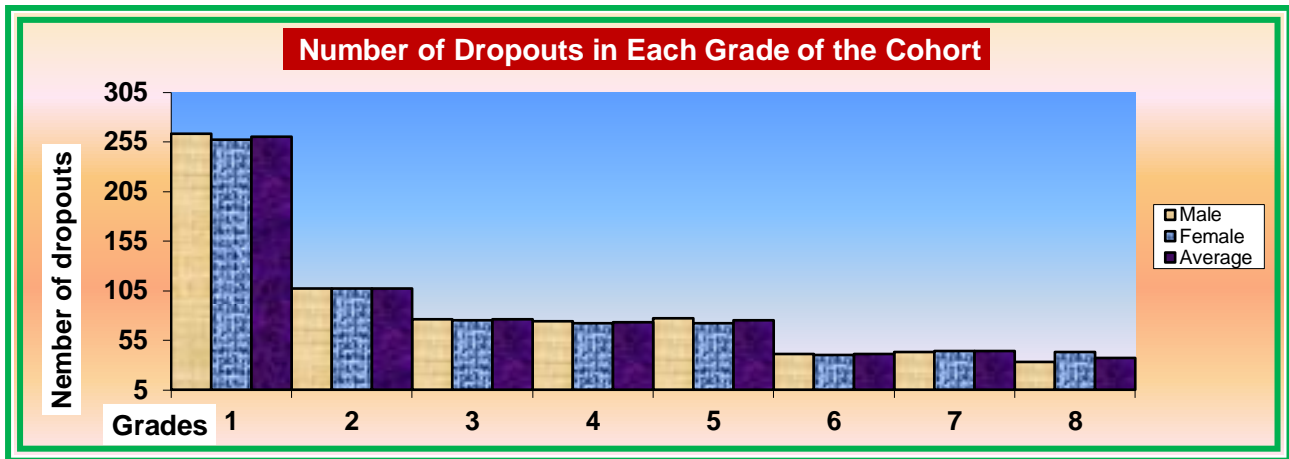

Dropout is the proportion of students who leave the system at each grade. It is the most serious problem in education system. The cohort data on the table 2.3.16 below shows that among the cohort of 1000 pupils, 260 of them left the school before completing grade one.

TABLE 2.3.16 NUMBER OF DROPOUT BY GRADE OF THE COHORT

Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	263	107	76	74	77	41	43	33
F	257	107	75	72	72	40	44	43
Average	260	107	76	73	75	41	44	37

As shown in table 2.3.16 above the number of dropout is higher in grade one and lower in grade eight for this academic year.

GRAPH 2.3.12 NUMBER OF DROPOUTS IN EACH GRADE OF THE COHORT

C. Repeaters by Grade of the Cohort

TABLE 2.3.17 REPEATERS BY GRADE OF THE COHORT

Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	106	77	62	55	53	36	33	15
F	104	78	62	56	58	38	38	15
Average	105	77	62	55	55	37	35	15

The cohort data on the table 2.3.17 above shows that among the cohort of 1000 pupils, 105 of them repeated at grade one. Number of repeaters gradually decreases from grade to grade while it goes up to the higher grade as indicated on the table.

GRAPH 2.3.13 NUMBER OF REPEATERS OF THE COHORT BY GRADE

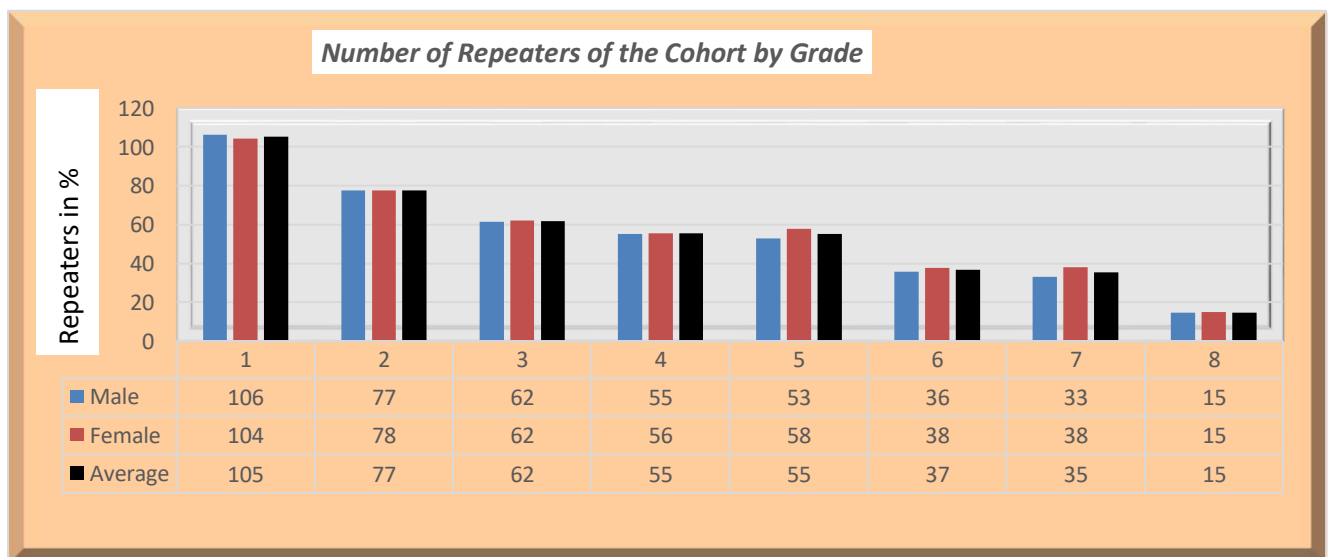

TABLE 2.3.18 PERCENTAGE OF REPEATERS BY GRADE OF THE COHORT

Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	10.6	7.7	6.2	5.5	5.3	3.6	3.3	1.5
F	10.4	7.8	6.2	5.6	5.8	3.8	3.8	1.5
Average	10.5	7.7	6.2	5.5	5.5	3.7	3.5	1.5

Table 2.3.18 above shows that 10.5 % (M=10.6%, F=10.4%) of pupils of the cohort repeat at grade 1. When we compare both levels, majority of children repeat in the early grades than the upper one.

D. Number of Graduates from the Final Years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete primary first cycle of 4 years of study and promoted to the first grade of second cycle primary (Grade 5) or those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort shown on table 2.3.9, out of 1000 pupils registered in 2011 E.C at grade one, 326 pupils will graduate grade 4 without repeating at any grade during their stay in school. Another 121 pupils will also graduate at grade 4 after repeating once and 28 of them will be graduated after repeating twice at one of the grades. Number of graduates of first cycle primary for this cohort is 475.

Similarly, 133 pupils will graduate grade 8 by 2018 E.C. without repeating, 93 pupils will graduate grade 8 in 2019 E.C by repeating once, finally 37 pupils will also graduate grade 8 by 2020 E.C by repeating any of the grade twice. According to the cohort, the possible number of pupil graduates from the complete primary system or grade 8th is only 264. Accordingly, only about 26.4% of the pupils complete primary education out of 1000 pupils of the cohort system. Unfortunately, about 736 (73.6%) pupils of the cohort were left the system before completing primary education. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

TABLE 2.3.19 NUMBER OF GRADUATES FROM THE FINAL YEAR

Number of Graduates from the Final Year		
Male	Female	T(Average)
262	265	264

G. Indicators of Wastage in the Cohort

TABLE 2.3.24 INPUT/OUTPUT RATIO FROM THE COHORT

Input/Output Ratio from the Cohort		
M	F	T
2.3	2.3	2.3

TABLE 2.3.25 COEFFICIENT OF EFFICIENCY FROM THE COHORT

Coefficient of Efficiency from the Cohort		
M	F	T
43.4	43.3	43.4

The result approaching 100% indicates a high level of internal efficiency in producing graduates and no wastage due to repetition and dropout. Coefficients below 100% reflect the impact of repetition and dropout on the efficiency of the educational process in producing graduates. As the reciprocal, the optimum input-output ratio is one, and inefficiency arises from any point which is greater than one.

TABLE 2.3.26 PERCENTAGE OF WASTAGE SPENT ON REPETITION AND DROP OUT IN THE COHORT

Percentage of Wastage Spent on Repetition and Drop out in the Cohort			
Title	M	F	T
Wastage Due to Drop Out	88.3	87.7	87.9
Wastage Due to repetition	11.7	12.3	12.1

CHAPTER THREE

Secondary Education

As stated in Ethiopian Education and Training Policy launched in 1994 (2011/12 G.C), Secondary education is four years duration, consisting of two years of general secondary education which enable students identify their interests for further education, for specific training and for the world of work. The second cycle of secondary education and training (Grade 11-12) is aimed to enable students to choose subjects or areas of training which will prepare them adequately for higher education and for the world of work. But, from 2012 (2019/20 G.C) academic year, MoE proposed secondary education as to be general secondary education (grade 9-12) in the country in the new education development Roadmap (July, 2018 G.C). Depending on this secondary education has been started to delivered in secondary (grade 9-12) in our region since 2012 (2019/20 G.C) academic year. Hence, the data and information of secondary education in this document is compiled to grade 9-12.

3.1. Equitable Access in Secondary Education

This chapter gives key statistical indicators about equitable access in the Secondary sub-sector in year the 2012 (2019/20 G.C).

3.1.1. Number of Secondary Schools

I. Secondary Schools by Ownership & Grade Level

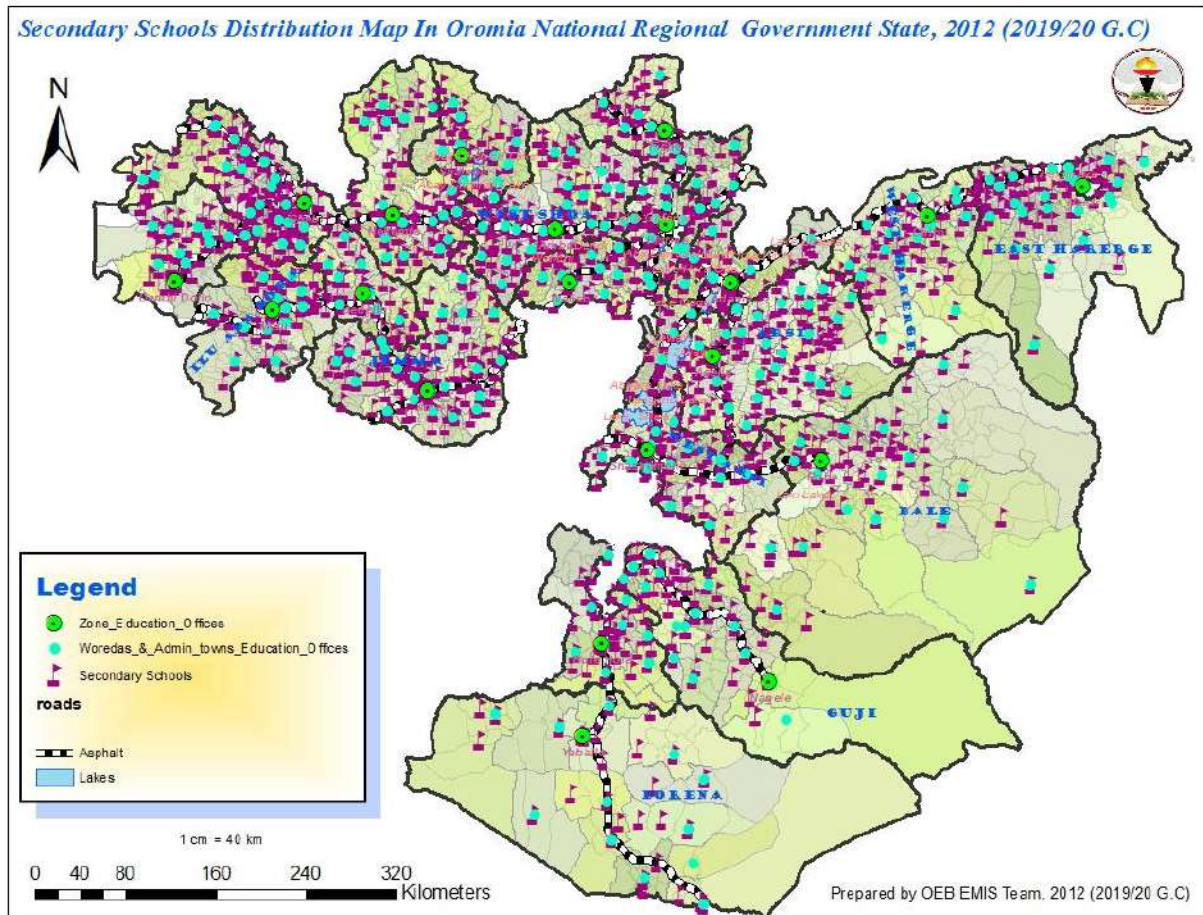

Table 3.1.1 below shows secondary schools in the region by zone, administrative town, ownership and grade level. Accordingly, 91.9% of secondary schools (grade 9-12) are owned by government as compared to 8.1% of the secondary schools (grade 9-12) are owned by Non-governmental organizations. As the data shows Government involvement is seems like higher than non-governmental organizations. In terms of zonal distribution, the intervention of non-government organization is in 9 zones and 13 administrative towns in secondary schools.

TABLE 3.1.1 NUMBER OF SECONDARY SCHOOLS BY OWNERSHIP AND GRADE LEVEL

Number of Secondary schools by Ownership and Grade Level in 2012 (2019/20 G.C)																				
SN	Zones /Administrative towns/	Secondary Schools By Ownership								Secondary Schools by Grade Level

II. Geographical Locations of Secondary schools

MAP 3.1.1 GEOGRAPHICAL LOCATIONS OF SECONDARY (GRADE 9-12) SCHOOLS

Map 3.1.1 above shows the distribution of secondary schools (grade 9-12) in the region. As we can see from the map the schools were relatively denser along the main road of the central and north east & west areas of the region and scattered in the other areas.

As can be seen from map above the distribution of secondary schools are more scattered specifically in the south eastern area of the region like Borena, Guji and Bale Zones, which are mainly pastoralist areas in the region. The point data on the map shows schools by grade level with different colors. The map also shows woredas and the accessibility of the road to schools by type of road.

III. Representative Index/RI/ in Secondary Education

The representative Index measures/gauges the amount of equitable education services that one region earned among the available services rendered. It helps to verify/confirm the equitable distribution of schools as per the number of school age student population in zones/towns of a region we use the following formula

The representativ eindex (RI) of Zones/ Towns

$$= \frac{\text{Rate of the share of the schools in the Zone/Town}}{\text{Rate of the share of the students in the Zone/Town}}$$

The calculated result of Representative Index (RI) can be one of the three;

- If the result is 1 the distribution is equitable.
- If the result is below 1 it is not equitable & under representative.
- If the result is above 1 it is over representative.

Table 3.1.2 below shows the distribution of secondary schools in zones and administrative towns those have over representative share and equitable share of distribution. Accordingly, the three most zone with under representation are East Hararge, West Hararge and West Arsi. On the other hand the three most administrative towns with over representation are Dukem, LegeTafuLegeDadhi and Sebeta.

TABLE 3.1.2 REPRESENTATIVE INDEX (RI) OF SECONDARY SCHOOLS IN 2012 (2019/20 G.C)

3.1.3. Secondary Education Enrolment Rates

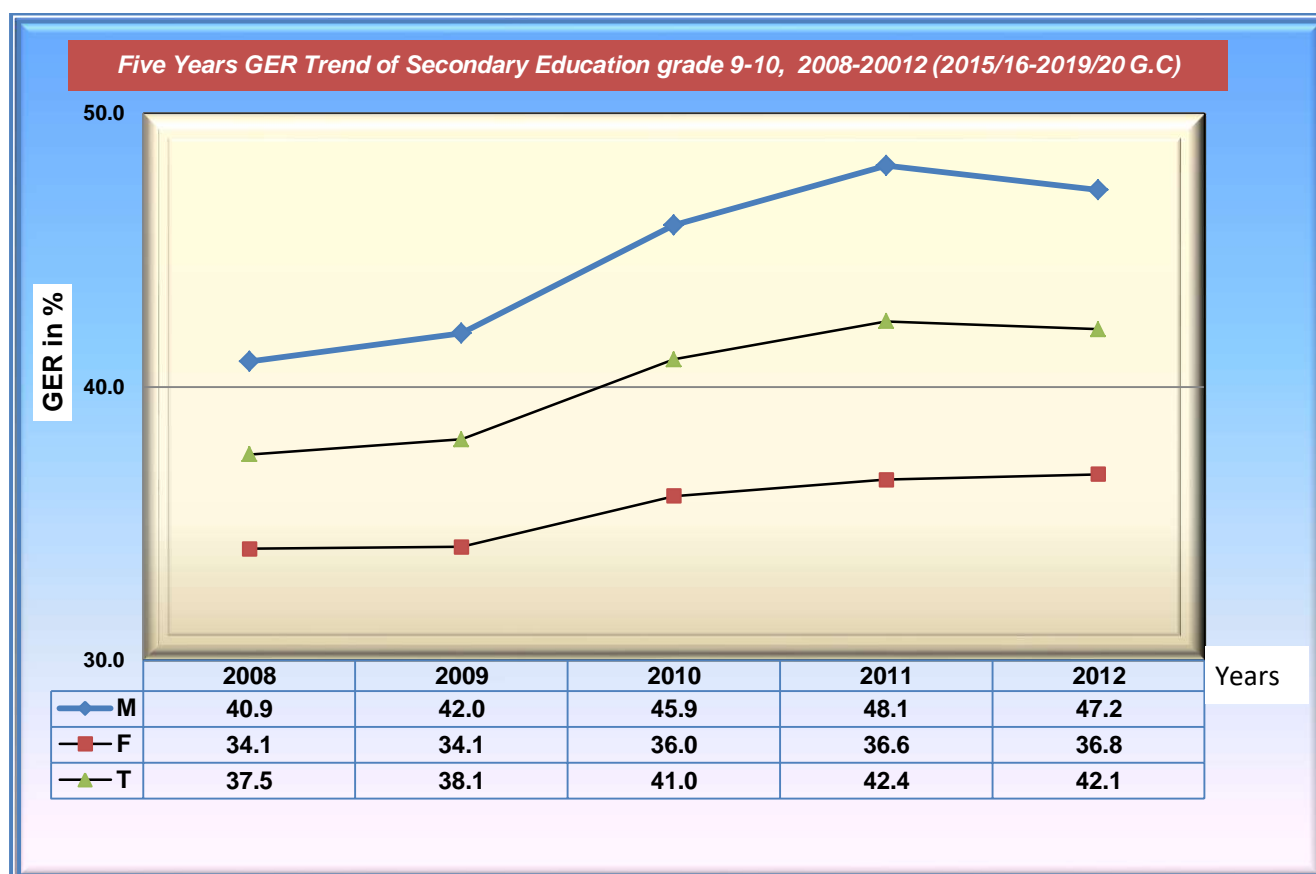

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female), special needs and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that able to achieve educational success. Besides, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

I. Gross Enrolment Rate (GER) of Secondary Education, Grade 9-10

Gross Enrolment Rate (GER) of secondary education (Grade 9-10) is the proportion of all enrolments with regardless of school age population at this level. It compares the total number of students in the secondary school grade 9-10 with the school-age population of this level. In Ethiopia, the official school age for secondary grade 9-10 is 15-16 years old.

$$\text{Grade 9 - 10 GER} = \frac{\text{All age grade 9 - 10 enrolments}}{\text{School Age population (SAP) of age 15 - 16}} \times 100$$

GRAPH 3.1.1 FIVE YEARS GER TREND OF SECONDARY EDUCATION, GRADE 9-10

Graph 3.1.1 above shows the last five years trend of GER of secondary education grade 9-10. Accordingly, it was 37.5% (M=40.9%, F=34.1%) in 2008 (2015/16 G.C) and increased to 42.4% (M=48.1% and F=36.6%) by 2011 (2018/19 G.C) and declined to 42.1% (M=47.2%, F=36.8%) by 2012 (2019/20 G.C). Even though the reasons were not yet identified through research, the GER of the level is not in a position fast improvement for the last five years. Thus, whatever the reason it needs serious attention from educational officials and concerned bodies.

Graph 3.1.2 below shows the gender gap of secondary education grade 9-10 that there was an increment of GG in the last four years continuously from 2008 - 2011(2015/16 - 2018/19 G.C). Accordingly, the gender gap of (9-10) was increased from 6.8% in 2008 (2015/16 G.C) to 10.5 % in 2012 (2019/20 G.C). Hence, in secondary grade 9-10 schools, for the reason that disparities are increasing it needs research to come up with solutions.

GRAPH 3.1.2 FIVE YEARS TREND OF SECONDARY GRADE 9-10 GENDER GAP

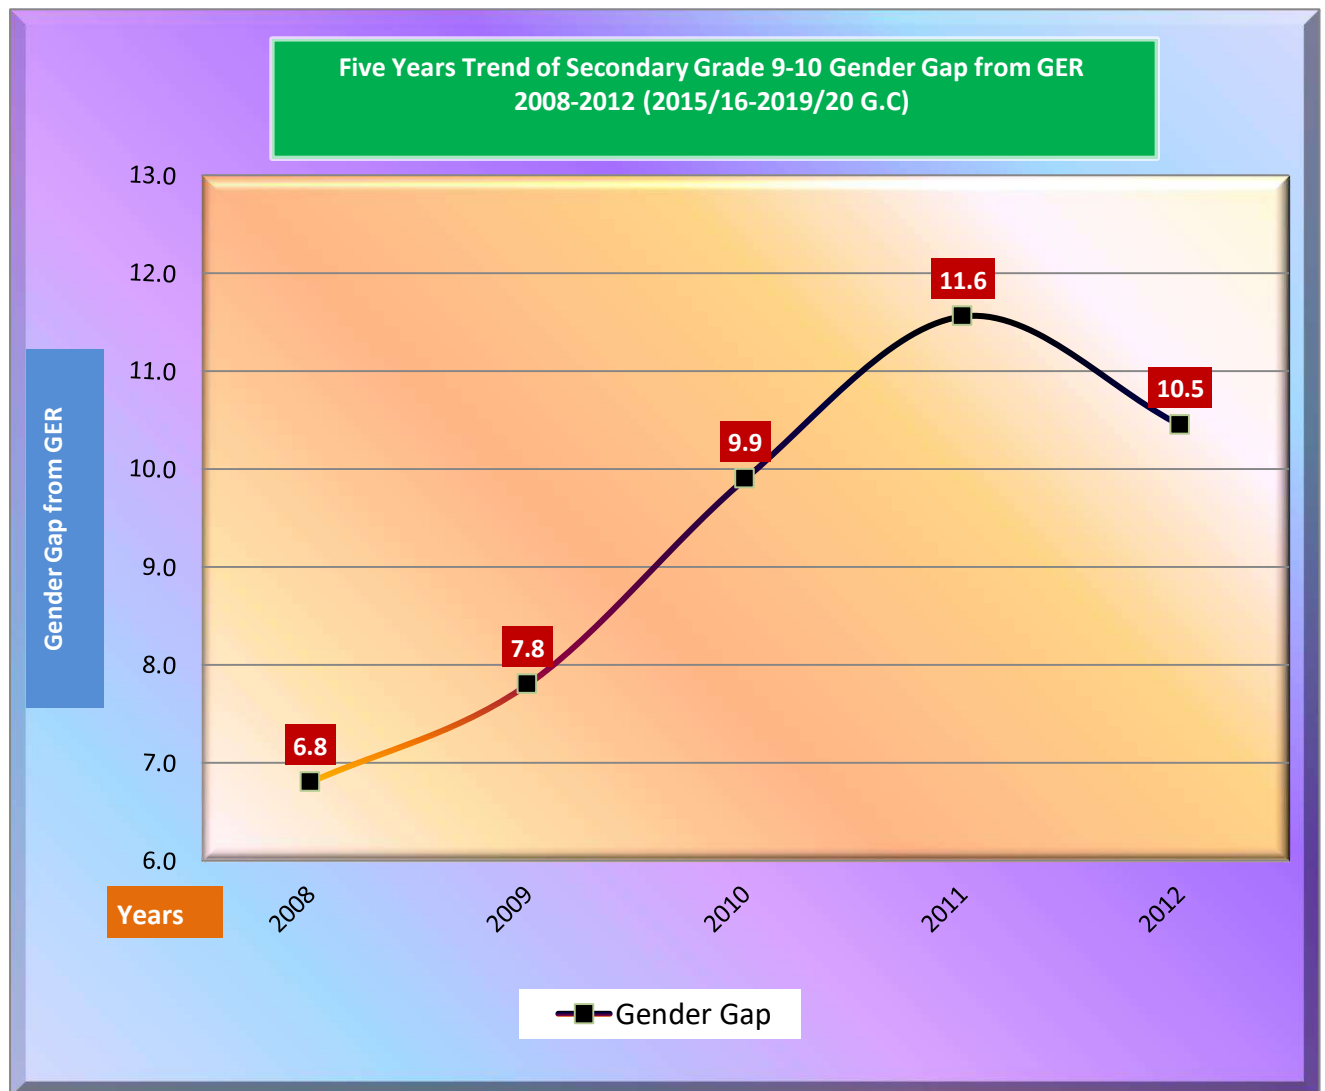

TABLE 3.1. 13 SECONDARY GRADE 9-10 GROSS ENROLMENT RATE AND GENDER EQUITY INDICATORS

The table 3.1.13 above also shows the GER of secondary school(grade 9-10) at regional level, by zone and administrative town in 2012 (2019/20 G.C). Accordingly, seven zones and eighteen administrative towns have GER above the regional average, 42.1%. From the same table it is possible to see that there are sixteen administrative towns those have GER greater than 100%. Even though, the causes haven't been identified with basic research yet, the major suspected reason behind the GER exceeding 100% in those administrative towns is that, students who are living in surrounding zones and woredas came to those towns to attend their secondary education. This may led to the increment of enrolment in secondary education. That is why the rate goes beyond the expected rate when it is calculated with respect to school age population of those towns. Concerning GPI, five zones and seven administrative towns have registered above the regional average, which is 0.8.

II. Net Enrolment Rate (NER) in Secondary Education, Grade 9-10

At this level, we consider students enrolled in secondary education, grade 9-10 whose age is from 15 and 16 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 9 - 10 NER} = \frac{\text{Grade 9 - 10 enrolments of age 15 - 16}}{\text{School Age population (SAP) of age 15 - 16}} \times 100$$

GRAPH 3.1.3 FIVE YEARS NER TREND OF SECONDARY EDUCATION, GRADE 9-10

Graph 3.1.3 above indicates the NER of secondary education, grade 9-10 of the last five years. It was 17.9% (M=18.1%, F=17.7) in 2008 (2015/16 G.C) and rose to 20.4% (M=21.5, F=19.3%) in 2012 (2019/20 G.C). As the data indicates NER of the level didn't show significant change during the last five years. So, the issue needs attention from the education officials and concerned bodies.

Table 3.1.14 above also shows the NER of secondary education, grade 9-10 at regional level by zone and administrative towns. Accordingly, thirteen zones and one administrative town have registered below the regional NER average 20.4%. Specially, Borena, West Guji zones and BishanGuracha administrative town have NER less than 10%. On the other hand, the NER of Dukem Administrative town exceeds 100% which is illogical. Therefore, the issue needs particular attention to improve the huge gap shown in these zone and illogical NER of these Administrative towns.

III. Gross Enrolment Rate (GER) of Secondary Education, Grade 11-12

GER of secondary education, grade 11-12 is the proportion of all enrolments regardless of age with school age population at this level. It compares the total number of students in secondary school, grade 11-12 with the school-age population of this level. In Ethiopia, the official school age for secondary education grade 11-12 is from 17-18 years old.

$$\text{Grade 11 - 12 GER} = \frac{\text{All age grade 11 - 12 enrolments}}{\text{School Age population (SAP) of age 17 - 18}} \times 100$$

GRAPH 3.1.4 FIVE YEARS TREND OF GER FOR SECONDARY EDUCATION GRADE 11-12

As shown in graph 3.1.4 above, the GER of secondary education grade 11-12 has shown improvement in the last five years as it was 9.2 % (M=10.3%, F=8.2%) in 2008 (2015/16 G.C) and increased to 28.6% (M=33.4%, F=23.8%) in 2012(2019/20 G.C).

Table 3.1.15 below also shows the GER of secondary education grade 11-12 by zones and administrative towns. As shown in the table, most of secondary education grade 11-12 student enrolment is concentrated in urban areas. Among the 20 zones in the region 12 of them have GER below the regional average 28.6%. The least GER registered zones are Oromia Special Zone Surrounding Finfinne (9.5%), East Shoa (11.3%) and Arsi (13.3%). On the other hand, eight zones; West Wollega (70.3%), HoroGuduruWollega (65.3%), KelemWollega (58.2%), East Wollega (47.8%), Ilu Aba Bora (33.7%), BunoBedelle (32.5%), West Shoa (32.4%) and West Guji (29.8%) have registered above the regional average. Regarding to administrative towns, only BishanGuracha administrative town (14.1%) has registered below the regional average. The rest 18 administrative towns have registered above the regional average GER which is 28.6%. However, only Dukem (126.1%) administrative town have registered GER above 100%

Regarding GPI, the performance registered in secondary education grade 11-12 is somewhat low when compared with primary (1-8) and secondary (9-10) education. Accordingly, the GPI of secondary education grade 11-12 in 2012 (2019/20 G.C) at regional level is 0.7. Concerning zones and administrative towns, nine zones and twelve administrative towns have registered above the regional average.

TABLE 3.1. 15 SECONDARY SCHOOLS, GRADE 11-12 GER& GENDER EQUITY INDICATORS

IV. Net Enrolment Rate (NER) of Secondary Education Grade 11-12

For this level, we consider students enrolled in secondary schools in grade 11-12 whose age is from 17-18 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 11 - 12 NER} = \frac{\text{Grade 11 - 12 enrolments of age 17 - 18}}{\text{School Age population (SAP) of age 17 - 18}} \times 100$$

GRAPH 3.1.5 FIVE YEARS TREND OF NER FOR SECONDARY EDUCATION GRADE 11-12

As shown in graph 3.1.5 above, NER of secondary education grade 11-12 has been increasing for the last four years, and has decreased in 2010. For example, it was 5.2% (M=5.5%, F=4.9%) in 2008 (2015/16 G.C) and then rose to 5.6% (M=5.9%, F=5.4%) in 2009(2016/17 G.C). In 2010 (2017/18 G.C) it has decreased to 5.2% (M=5.8%, F=4.7%). Again it increases in 2011 (2018/19 G.C) to 8.0% (M= 8.6%, F= 7.4%) and in 2012 (2019/20 G.C) to 13.3% (M=14.5%, F= 12.1%).

In table 3.1.16 above, the NER and GPI of secondary education grade 11-12 in 2012 (2019/20 G.C) have shown by zones and administrative towns. As illustrated in the table, zone and administrative town's performance concerning NER is quite far apart from one another. Accordingly, the three high NER registered administrative towns are Dukem, Nekemte and L/T L/Dadhi have 91.5%, 44.5% and 41.7% respectively. Whereas BishanGuracha administrative town has been registered the least NER which is 3.1%

Regarding zones, Oromia Special Zone Surrounding Finfinne, East Shoa, Arsi and East Hararge are the four least NER registered zones which have 3.9%,6.1%, 6.5%, 6.5% respectively.

Concerning gender parity index /GPI/, it had been 0.86 in 2011 (2018/19 G.C) and this value has decreased to 0.8 in 2012 (2019/20 G.C).

V. Gross Enrolment Rate (GER) of Secondary Education, Grade 9-12

GER of secondary education, grade 9-12 is the proportion of all enrolments regardless of their ages. It compares the total number of students in secondary school of grade 9-12 with the school-age population of this level. In Ethiopia, the official school age for secondary education grade 9-12 is from 15-18 years old.

$$\text{Grade 9 – 12 GER} = \frac{\text{All age grade 9 – 12 enrolments}}{\text{School Age population (SAP) of age 15 – 18}} \times 100$$

Table 3.1.17 below shows the GER and GPI of secondary education grade 9-12 in 2012 (2019/20 G.C) by zones and administrative towns. The average GER of secondary education in the academic year reached 35.6% (M=40.5% and F= 30.5%). As illustrated in the table zones and administrative towns have registered different GER that reveal above or below regional average. Accordingly, the three high 9-12 GER registered administrative towns are Dukem, Nekemte and Lege Tafo Lege Dadhi those have 242.3%, 116.3% and 115.5% respectively. Regarding zones, twelve of the have registered grade 9-12 GER below the regional average. More specifically, Oromia Special Zone Surrounding Finfinne, West Hararge and East Shoa have registered the least grade 9-12 GER which are 18.1%, 20.6% &20.9% respectively.

TABLE 3.1. 17 SECONDARY SCHOOLS GRADE 9-12 GROSS ENROLMENT AND GROSS ENROLMENT RATE

VI. Net Enrolment Rate (NER) of Secondary Education, Grade 9-12

For secondary education grade 9-12 we consider students enrolled in those grades whose age is from 15-18 and compare it to the total number of populations belonging to the mentioned age group.

$$G((Grade\ 9 - 12\ NER = \frac{Grade\ 9 - 12\ enrolments\ of\ age\ 15 - 18}{School\ Age\ population\ (SAP)\ of\ age\ 15 - 18} \times 100$$

In table 3.1.18 below, the NER and GPI of secondary education grade 9-12 in 2012 (2019/20 G.C) have shown by zones and administrative towns. As illustrated in the table, zone and administrative town's performance concerning secondary education grade 9-12 NER is quite far apart from one another. Accordingly, the four high NER registered administrative towns are Dukem, Holeta, Sebeta, and LegeTafuLegeDadhi which have 209%, 83.3%, 83.0% and 81.3% respectively. Whereas BishanGuracha administrative town has been registered the least NER which is 11.2%.

Regarding zones, Oromia Special Zone Surrounding Finfinne, Borena, East Hararge and West Hararge are the four least NER registered zones which have 14.3%, 14.5%, 15.1% and 15.2 respectively.

3.2. Quality Indicators of Secondary Education

Among the major educational inputs, which contribute a remarkable role to ensure quality of secondary education are the availability of sufficient and qualified teachers, class size and text books. Compared to primary education percentage of qualified teachers, student-teacher ratio and student-section are better for secondary education in the region. The minimum qualification required for first cycle is BEd/BA/BSc, and MEd/MA/MSc for second cycle secondary school teachers.

3.2.1. Secondary School Teachers, Principals, Vice Principals and Supervisors

I. Secondary School Teachers

The strength of any educational system largely depends on the quality and commitment of its teachers. Teachers play a major role in the delivery of quality education.

Education policy indicated that secondary school teacher in Ethiopia should hold at least a first degree. The performance of pupils in secondary schools is often affected by the quality of teaching staff.

The Annual School Census of 2012E.C captured the total number of teachers in secondary schools by zone and gender. The information about secondary education teachers presented: grade level they teach, ownership, highest education level, specialization, rank, and SAMSEE teachers. As illustrated in tables 3.2.1, 3.2.2, 3.2.3, 3.2.4, 3.2.5, 3.2.6, 3.2.7, and 3.2.8 below. Accordingly there were a total of 38,126 (M=31,789 and F=6,337) teachers where 26,655 (M=21,312 and F=5,343) of them are in secondary schools grade 9-10 and 11,471 (M=10,477 and F=994) in secondary schools grade 11-12. The percentage of qualified teachers for grade 9-10 schools at regional level is 95.0% (M=95.1% & F=94.7%). The percentage of qualified grade 11-12 school with masters and above qualification is 22.4% (M=22.4% & F=22.7%) at regional level. Thus, qualification of teachers, especially, for grade 11-12 requires improvement.

II. Secondary Schools Pupil to Section Ratio

As can be seen in table 3.2.1 below, pupil to section ratio for secondary school grade 9-10 has been increasing over the last five years. For instance, in 2008 it was 62:1 and became 68:1 in 2012. Similarly, pupil to section ratio for secondary school grade 11-12, which was 53:1 in 2008 has been boomed to 65:1 in 2012.

GRAPH 3.2.1 FIVE YEARS TREND OF SECONDARY EDUCATION, 9-12 STUDENTS SECTION RATIO

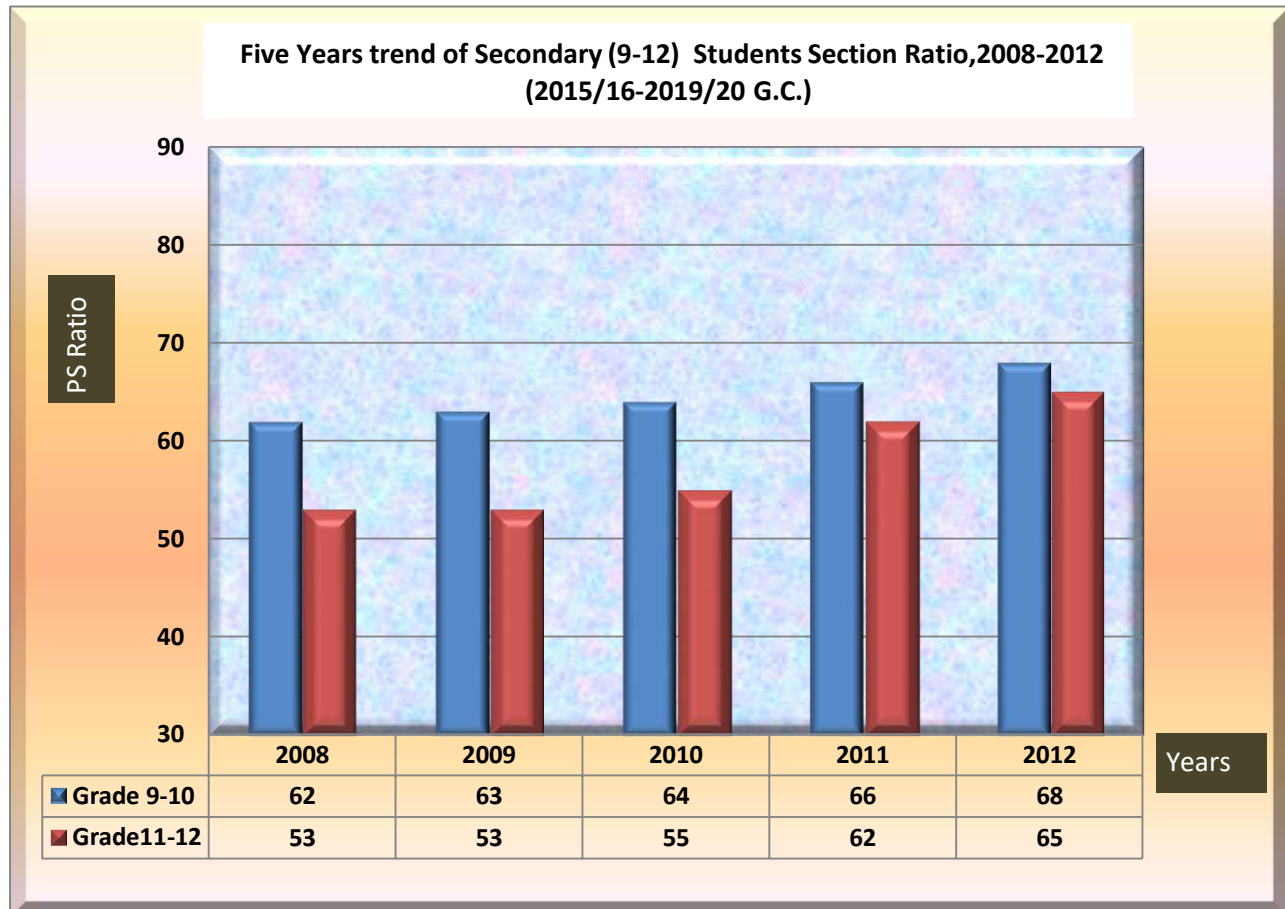

Table 3.2.14 shows that pupil section ratio for secondary school (9-10, 11-12, and 9-12) in 2012(2019/20 GC) were 68:1, 85:1, and 74:1 respectively. The same table also shows that Oromia Special Zone Surrounding Finfinne, Borena, East Shoa zones' pupil to section ratio are found relatively small, which are 61:1, 63:1, and 63:1 respectively). Out of a total of 19 administrative towns in the region three of them (Dukem, Modjo, and Sebeta) have relatively the lowest pupil to section ratio (53:1, 53:1, and 56:1 respectively). On the other hand, Ambo and Waliso from administrative towns, and West Guji and East Hararge from zones have relatively the highest ratio (92:1, 84:1, 92:1, and 82:1 respectively).

3.2.4. Secondary Schools Facilities

Researchers conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of students with complex needs. In this document the availability of secondary school facilities included. Some of these school facilities include water, toilets, electricity, library, internet, computers and others.

I. Secondary Schools Availability of Water by Source, and Ownership

Water is one of school facilities that secondary schools must own. Accordingly, as table 3.2.16 below has shown, out of 1,278 secondary schools in the region, only 718 (56.2%) of them have water facility. As far as ownership is concerned, while 615 (52.3%) out of 1,175 government owned secondary schools in the region are supplied with water, all non-government (103) schools are supplied with water. The same table also shows among the 19 administrative towns all secondary schools in 15 of them supplied with water. Out of 20 zones BunoBeddelle, Guji, Ilu Aba Bora and West Guji zones have the least percentage in supplying water for their secondary schools by having only (22.9%, 30.0%, 34% and 34.2% respectively).

Although 718 secondary schools have reported for having water facilities, this number has increased to 748 when they are counted by source of water, because some schools may get water from more than one source. Accordingly, as shown in table 3.2.16, among the 748 secondary schools 618 (95.4%) of them get water from pipe water in the school and related to the school (pipeline). On the other hand, 17 schools get protected hand pump, 2 bottled water, 2 cart with small tank, 2 protected spring water, 34 public tap/ stand pipe, 11 rain water collection, 5 surface water/ River Dam, Lake), 2 tanker truck, 49 Tube well, 3 unprotected hand pump and 3 unprotected spring water.

II. Secondary Schools Toilet Availability

As can be seen from table 3.2.17 below out of 1278 secondary schools in the region 1,226 (95.9%) of them have toilet. Still 52 (4.1%) schools have no toilet for their students. Concerning ownership, out of 1175 government owned and 103 non-government organizations owned secondary schools in the region 1,123 (95.6%) and 103 (100%) of them have toilet.

In the same table availability of toilet is also shown by zone and administrative towns. Accordingly, in 19 administrative towns all of their secondary schools have toilet. Out of 20 zones, East Shoa, East Wollega, KelemWollega, and Oromia Special zone Surrounding Finfinne reported that all (100%) of their secondary schools have toilet. But Borena, Ilu Aba Bora and BunoBeddelle zones have the least percentage of schools with toilet (87.5%, 85.1% and 80.0% respectively).

Table 3.2.17 also shows secondary schools toilets by type of toilets. Accordingly out of a total of 1,226 government and non-government owned secondary schools, which have toilet in the region, 730 (59.5%) of them have improved toilet and 496 (40.5%) have traditional. More specifically, out of 730 secondary schools those have improved toilets, 1 is composting, 695 are flush and 34 are poured flush toilets.

III. Secondary Schools Electricity Availability

As can be seen from table 3.2.18 below, out of a total of 1278 secondary schools in the region 977 of them reported that they are supplied with electricity. In terms of ownership, out of a total of 1175 government owned secondary schools 875 (74.5%) of them are supplied with electricity. Likewise, out of a total of 103 non-government owned secondary schools almost all of them (102=99%) have access to electricity. AS the same table has shown, out of a total of 19 administrative towns in the region, 15 of them have secondary schools supplied with electricity. The remaining four administrative towns (LegeTafuLegeDadi (75%), Dukem (80%), and Bishoftu (92.9%) have some schools without electric power supply. Similarly, West Guji, Borena, Duji, and West Wollega zones' secondary schools are the least supplied with electricity (55.3%, 62.5%, 66%, and 66% respectively).

Table 3.2.18 below also shows that out of a total of 977 secondary schools supplied with electricity in the region. 865 (88.5%) of them are supplied with hydroelectric power. In addition, 103(10.5%), and 9 (0.9%) of them are sourced with generator and Solar energy respectively. When the supply of electricity in secondary school is seen in terms of location, the same table has shown that out of 875 government owned secondary schools, and 103 non-government owned secondary schools 226 (23.1%) of them are situated in rural, and 751 (76.9%) are in urban.

V. Secondary Schools Library Availability

The importance of library in secondary school is not something debatable. To this end, secondary schools are supposed to have a library. While the role of library remains the same, its design, digital platform, strategies, and tools dynamic that might be resulted from technological change. As Table 3.2.20 below has shown, out of a total of 20 zones in the region, secondary schools of three of them (BunoBeddelle (60%), West Wollega (64.9%), and West Guji (65.8%) are among the least supplied with library as a school facility. Similarly, while Gelan is with no school supplied with library, Batu (66.7%), and Dukem (80%) are administrative towns with large number of secondary schools without library.

3.2.5. Secondary Schools (Grade 9-12) Inspection

The process of quality assurance is fundamental to the improvement of schools. Inspection is a form of quality assurance, a process of independent external evaluation. It can provide an objective assessment of how well schools are performing - the quality of education that they provide as well as the outcomes and ethics that their students achieve.

It can be a powerful tool for promoting improvement, by establishing the minimum levels of quality that all schools should achieve and by making schools accountable for their performance and progress. The result of inspection for the last three years at zonal, administrative towns and at regional level is indicated in table 2.2.25 below, Accordingly, out of a total of 1278 secondary schools in the region, 1054 (82.5%) of the were inspected. Based on the standard of Ethiopian inspection framework, out of a total of 1054 schools inspected, 92 (8.73%) of them ranked as level I, 761(72.2%) are ranked as level II, and 201 (19.07%) are ranked as level III. But no secondary school in the region is yet ranked as level IV.

3.3. Internal Efficiency in Secondary Education

3.3.1. Secondary Education Dropout and Repetition Rates

As indicated in table 3.3.1 below, grade 9 Repetition Rate (RR) was 17.6 (M=16.1%, F=19.6%) by 2011 (2018/19 G.C.) at regional level. However; Zones and administrative towns were registered different average value than the region. For instance, Sululta, Shashamanne, and Jimma administrative towns have the lowest RR, which is 0.0%, 6.4% and 6.6% respectively. On the other hand, Modjo administrative town, West Shoa, and East Wollega, were zones with the highest repetition rate by having (28.4%, 28.3% and 26.1%) respectively.

The same way, the regional level grade 11RR was 5.2% (M=5.3%, F=5.2%) by 2011 (2018/19 G.C.), however zones and administrative town were registered their RR differently. For instance, Guji, West Arsi, and Ilu Abba Bora zones have highest with its repetition rate of 13.1%, 11.8% and 9.9% respectively.

As shown from table 3.3.1 grade 9 and 11 Regional level Dropout Rate (DR) were 19.0% (M=20.2%, F=17.5%) and 9.0% (M=8.9%, F=9.0%) respectively. The zonal and administrative town DR were also registered as higher or lower than the region for example; Batu, Dukem and LegeTafuLegeDadhi Administrative Towns have largest dropout rate of grade which is (32.8%, 29.6% and 29.4%) respectively. Some way, the highest dropout rate (DR) for grade 11th (32.5%, 21.7%, and 17.6%), were for in BishanGurracha, Batu and LegeTafuLegeDadhi Administration towns respectively. Contrariwise, the least dropout rate of grade 11th registered as (0.4%, 1.1%, and 1.4%) in Guji, East Shoa zone and Holeta Administrative Towns respectively.

CHAPTER FOUR

Non-Formal Education

Under this chapter we attempted to address the data of Alternative Basic Education (ABE) and Integrated functional adult literacy (IFAL) programs.

4.1. Alternative Basic Education /ABE/

4.1.1. Alternative Basic Education /ABE/ Institutions

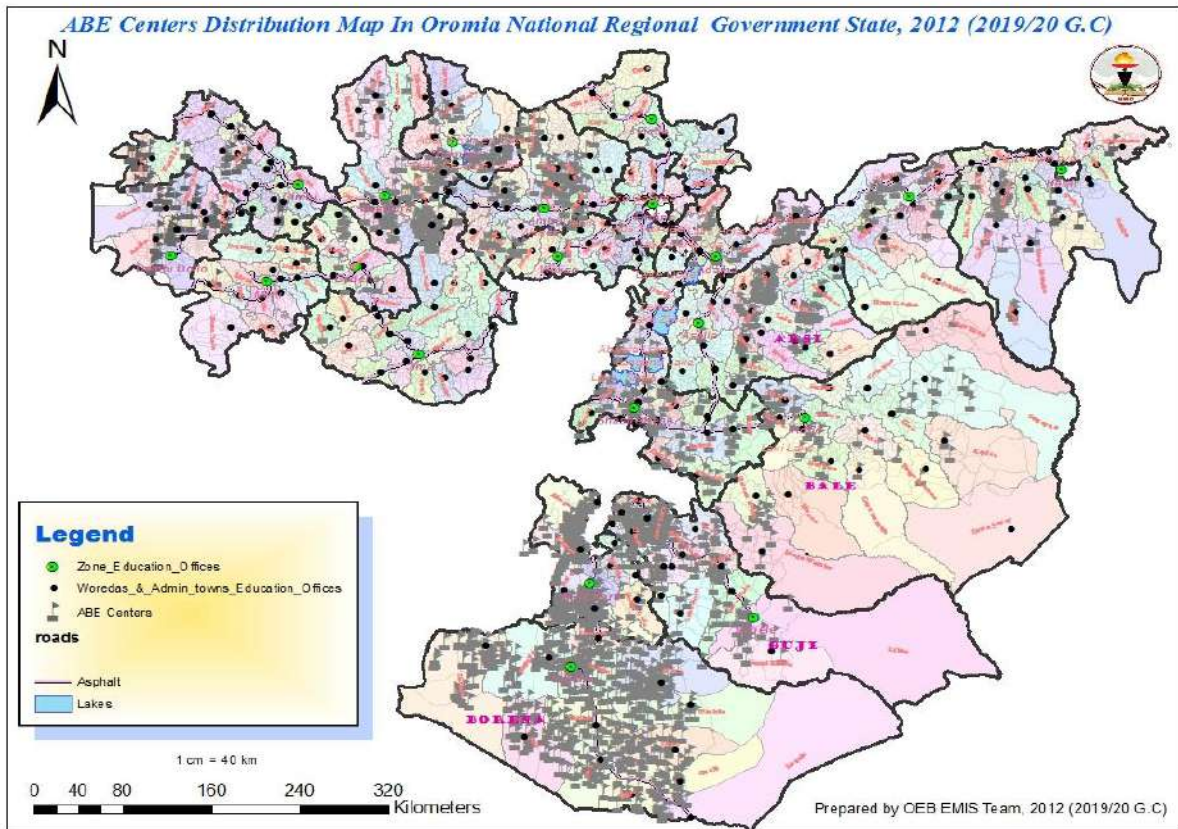

As its name indicates, Alternative Basic Education (ABE) is the provision of primary first cycle education intended to address the Primary education needs of children who haven't addressed and accessed in a formal education system. It is designed to reach children particularly in pastoral areas and where schools are far from residences as well as in areas where children are not able to start schooling at exact age because of different reasons. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention for the issue, our region has planned to reduce illiteracy in this regard. Even though, great efforts have made to meet the access, still hard work is expected to attain the plan.

The number of ABE centers in the region has decreased from 1859 in 2011 (2015/16 G. C) to 1729 in 2012 (2019/20 G.C). Table 4.1.1 below elaborates the number of ABE centers by ownership at regional and zone as well as administrative towns' level. Accordingly, among the total number of 1,729 ABE centers 94.6% (1,634) of them are owned by government. The rest of 5.4% (93) of them are under the ownership of non-government organization. Concerning zonal distribution pastoral areas like Borena, Guji and West Guji have the largest share of ABE centers that accounts (28.4%, 12.1% and 10.6%) respectively in the region. North Shoa zone is the only zone that has no ABE centers. On the other hand, the share of administrative towns is very low, and among the 19 administrative towns 13 of them have no ABE centers.

MAP 4.1.1 DISTRIBUTION OF ABE CENTERS

As can be seen from map 4.1.1 above, ABE centers are relatively dense in southern and western parts of the region. Specifically, they are common in Borena, Guji, West Gujii, West Arsi, Bale and East Wollega zones. On the other hand, Jima, OSZS Finfinne, South West Shoa, BunoBedelle and Ilu Aba Bora are zones where ABE centers are scarcely distributed.

4.1.2. Alternative Basic Education /ABE/ Enrolment

It is clear that this approach has played significant role in addressing children who have not got chance to join primary education. But due attention has not been given to strengthen the sector. For example; large number of children is still not joining school in the region. Hence, even though the reason has not identified by basic research, our assumption for the challenges happened might be; low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like are an expected assumptions. Therefore, we recommend that the issues needs serious attention and follow up.

As the number of ABE centers getting decreased from year to year, the number of students enrolled in ABE centers has been decreasing from year to year too. Graph 4.1.1 below shows the number of ABE students enrolled for the last five years.

GRAPH 4.1.1 FIVE YEARS TREND OF ABE ENROLMENT

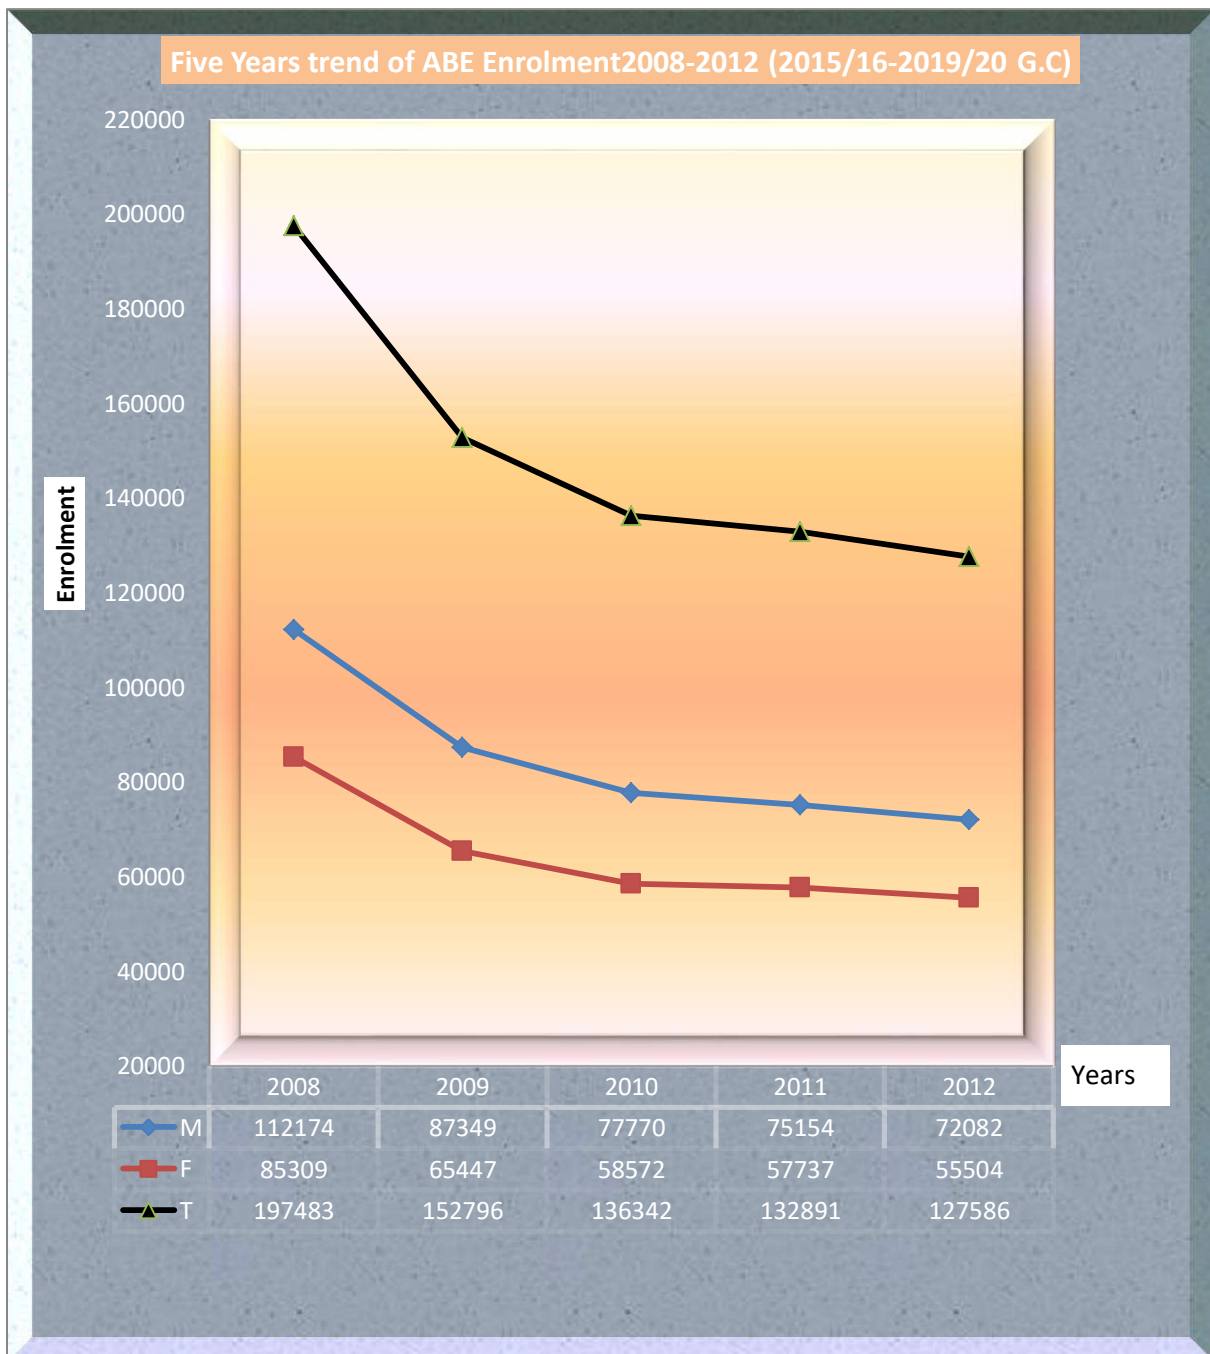

Table 4.1.2 below also shows ABE enrolment of the year 2012 (2019/20 G.C) by level, age, zones and administrativetowns.

4.2. Integrated Functional Adult Education /IFAE/ Program

Integrated Functional Adult Education (IFAE) program is a functional literacy program that reaches out to adults and young people aged 15 or older. The main goals of the program are to increase literacy rates, to promote women's empowerment, to improve participants' health and to raise the general standards of living within communities. The program consists of two six-month courses that participants complete within two years. Topics taught include literacy, gender issues, environmental protection, civic and ethical education, health, disease prevention, family planning, and agriculture. The main objective of the program is to increase the adult literacy rate in Oromia. Besides improving literacy, the program also aims to teach participants fundamental skills and knowledge that will increase the standard of living in communities.

CHAPTER FIVE

Tertiary Education

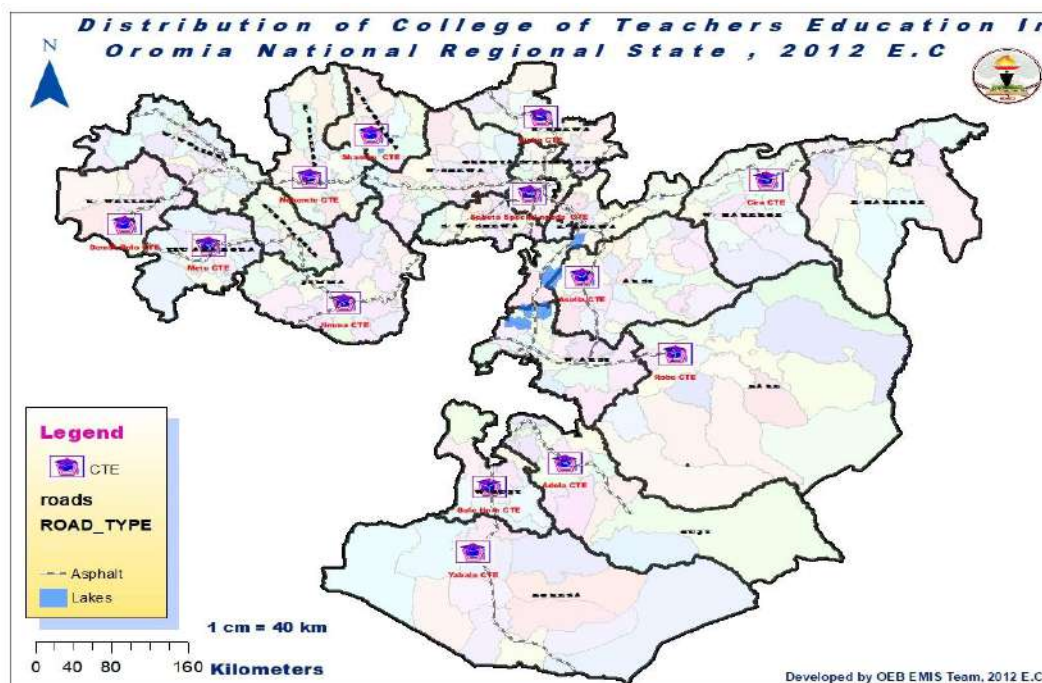

5.1. Colleges of Teachers' Education

Colleges of Teachers' Education (CTE) are institutions those aimed to train teachers for primary schools.

5.1.1. Number of Colleges of Teachers' Education

There are 13 CTEs in the region in 2012 (2019/20 G.C) those have been working to fulfill the desired teachers in quality and quantity wise for the sector in regular, evening and weekend diploma program. In addition to this, the instructions have been fully dedicated to in-service-training that helps TTI (certificate) teachers to upgrade to the Diploma level in summer program too.

MAP 5.1.1 DISTRIBUTIONS OF COLLEGES OF TEACHERS EDUCATION

5.1.2. Candidates Teachers in Diploma Program

5.1.2.1. Candidates Teachers in Regular Diploma Program

As can be seen from table 5.1.1, there were a total number of 9,378 (6,585 male & 2,793 female) regular diploma program candidate teachers for three years study in the 13 CTEs. Out of these most of the candidates 7,920 (84.5%); have attending training in the two recently introduced modalities called Specialist and Generalist that accommodates 6,553 (69.9%) and 1,367 (14.6%) candidate teachers respectively.

5.1.2.2. Candidates Teachers in Weekend Diploma Program

As Table 5.1.2 shows, out of the 13 CTEs in the region only 6 of them have candidate teachers in weekend program for only the 4th year of study. In these six CTEs, there were 6,075 (3,594 male & 2,481 female) candidate teachers enrolled for weekend diploma program. Dembidolo and Nekemte CTEs are the two CTEs those have the highest number of candidate teachers in this program by having 2,235 and 2,056 respectively.

5.1.2.4. Candidates Teachers in Summer Program

Because of the COVID-19 pandemic, there was no 1st year summer program in the academic year 2012 (2019/20 G.C). Number of teachers engaged to up-grade their education level to diploma through in-service summer training in 10 CTEs except Mutu, Sebeta and Yabelo have shown in table 5.1.3. Accordingly, there were a total number of 15,214 (9,229 male & 5,985 female) teachers have been following their training in the academic year.

5.1.3. Oromia CTEs Graduates in Diploma Program

As shown in graph 5.1.1 below, there were 26,824 (17,247 male & 9,577 female) teachers were graduated in Regular, Evening, Weekend and summer in-service-training programs. Amongst 9,481 and 8,956, candidate teachers have been graduated from summer in-service and evening as well as 5,082 and 3,305 candidate teachers have been graduated from regular and weekend programs respectively,

GRAPH 5.1.1 SHARES OF GRADUATES IN DIPLOMA PROGRAM

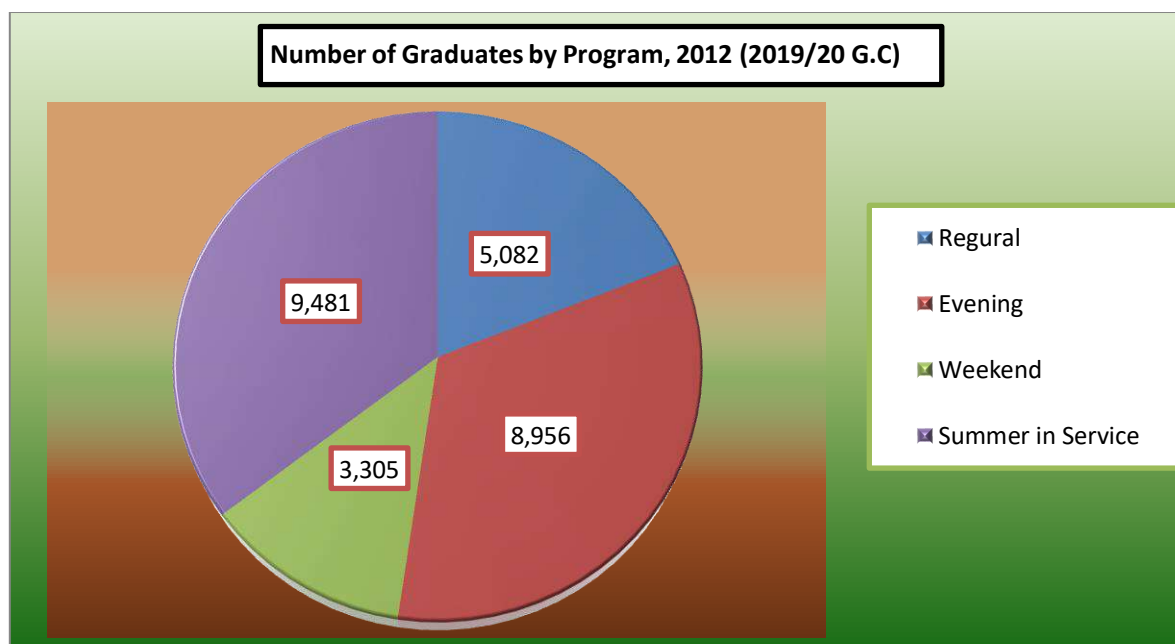

Table 5.1.4 also shows, number of graduated candidate teachers by CTE, program and modality. Accordingly, Nekemte, Jimma and Shambu CTEs have the highest number of graduates in the academic year by having 3506, 3307 and 3075 respectively. Regarding program highest numbers of graduates were from regular program. Concerning modality, most of the graduates were from specialist and generalist modalities by having 17,826 and 5,532 respectively.

CHAPTER SIX

Different Indicators by Woredas

In the above sessions of this publication the data and other statistical information have been presented by Zone and administrative town. From this page on words the data and other statistical information will be presented by Woreda and Administrative towns. There are about 317 Woredas and 19 administrative towns in our region. Some of the data and other statistical information we present by woreda here under are like number of institutions, number of enrolled students, AIR, NIR, GER, NER, internal efficiency; DR, RR, PR, number of teachers, number of sections, schools' different facilities availability information and others.
